CHEST-STYLE COOLERS

Classic—Easy to carry. No. 4AAP6 has a push-button lock that allows one-handed opening and molded handles in the body. No. 4AAP7 includes a drain and a lid with cup holders, hatch, and swing-up handles.

Marine Ultra™—Tie-down loop secures cooler to boat deck. Additional features include swing-up handles and stain- and odor-resistant liner.

Nos. 15F158 and 15F159 have a triple-snap drain plug and molded-in ruler to measure fish length. No. 15F159 provides 4-day cooling, and has a snap-fit latch to secure the lid closed.

Quick & Cool®—Threaded drain plug for hose hookup. Dual-snap lock and childproof safety lid latches.

Polar—Ultratherm® insulation in body and lid keeps ice frozen up to 5 days. Features reinforced swing-up handles, dual snap-fit latches, and threaded drain plug.

Elite—Rugged coolers have 2" thick polyurethane insulation that retains ice up to 10 days. Features freezer-grade gaskets, molded-in and hinged handles, nonskid and nonmarking raised feet, and corrosion-resistant stainless steel hardware. Certified bear-resistant by the IGBC.

WHEELED COOLERS

Performance—Heavy-duty wheels and telescoping handle let you roll over almost any terrain. ThermOZONE™ insulation keeps items cold for 3 to 4 days. Features Have-A-Seat™ lid and molded cup holders and handles.

Xtreme® 5—Extra ThermOZONE™ insulation keeps ice up to 5 days in temperatures up to 90°F. Easily transported with all-terrain wheels and comfortable, 2-way handles. Hinged lid has 4 cup holders to keep drinks within reach. Include rustproof, leak-resistant channel for no-tilt draining.

No. 493R91

No. 1RY39

No. 1RY36

CAMELBAK®

Each includes a low-profile Mil Spec Antidote™ reservoir with Quick Link™ exit port and QL HydroLock™ bite valve adapter.

HydroBak®—Ergonomic, versatile, and economical hydration-only pack for everyday tasks. Features double-ripstop construction, a rear reservoir access flap, and a front zip pocket. Holds enough water for 1-2 hours of activity.
- **Front and back panel are 300 Denier polyester fabric**

ThermoBak™ 3L—Quick-release shoulder straps unclip for easy removal and storage inside back panel stash pocket. Double-ripstop construction, external fill to Crux™ reservoir, and two-zipper fill cover. Hydration only.
- **500 Denier Cordura® fabric**

Watermaster™—Tough pack is constructed with a tearaway harness and easy strap management. Features one-handed flow control, Big Bite™ valve cover, integrated access port cover, stash pocket on fill flap, and mesh back panel. Insulated pack keeps water cool.
- **500 Denier Cordura® fabric**

Stealth™—Quick-release shoulder harnesses and a hook-and-loop panel for name tags and unit badge. Double-ripstop construction and CRUX™ reservoir with external fill. Hydration only.
- **500 Denier Cordura® fabric**

Hi-Viz™—High visibility color for worker safety. Tearaway harness helps prevent accidents and convenient stow pocket holds keys and other essentials. External access CRUX™ Reservoir delivers 25% more water per sip. Hydration only.

BFM™—Features low-profile Mountain™ MOLLE panel on front for secure attachment of accessory pouches. Double-ripstop construction. 4 zippers on main compartment allow for multiple access points to gear plus 7 exterior pockets. Offers multiple drink tube exit ports for routing tube over the shoulder or underan arm. The new Futura™ harness, which adjusts for individual torso length and plate carrier configurations, stays comfortable on even the longest of operations.
- **500 Denier Cordura® fabric**

ERGODYNE CHILL-ITS® LOW-PROFILE
- **420 Denier nylon (Nos. 1RY36 and 1RY39)**
- **600 Denier water-resistant rip stop polyester (No. 32NC04)**

Hydration packs help keep workers hydrated. The insulated pack and tube keep water cool. Each pack includes a zip-up cover, plus the cover on the 100% antimicrobial bite valve keeps out debris and contaminants. Breakaway shoulder straps for extra security. Nos. 1RY36 and 32NC04 have 2-tone reflective chevrons for visibility at night.

Cooling Vests

HyperKewl™ Evaporative Vests—Up to 10 hr. evaporative cooling is activated with 1 to 2 min. in water; squeeze out excess. Front zip closure.

Vests for Inserts—100% cotton zip-front vest has 4 pockets for inserts (sold separately) and hook-and-loop shoulder and side straps to ensure a snug fit.

Feathered Ice Insert No. 5WYD5 has a pliable powder that conforms to your body when frozen. Phase Change Insert No. 5WYD6 freezes in refrigerator or ice water. Delivers a constant 58°F temp. up to 3 hr.

Evaporative Cotton Vests—Lightweight vest protects against excessive heat for up to 72 hr. Polymer fabric is activated by soaking in water for 5 to 9 min. Cotton shell has hook-and-loop closures.

Chill-Its® Evaporative Nylon Vests—Nylon vests feature evaporative polymer-embedded fabric that activates when soaked in cold water for 2 to 5 min. Quilted nylon V-neck shell with zipper closure and water-repellent liner.

Dry vests can be filled with water for up to 3 days of cooling ability. V-neck with zip closure and mesh side panels to provide additional ventilation and stretch.

Phase Change Vests—Thermal-lined cotton vests zip closed to hold cooling inserts close to the wearer. Reusable inserts (included) are activated by ice water or in refrigerator and stay cold up to 3 hr. Zip-closed cooler bag included.

Vortex Vests—Allow adjustable or continuous cooling through perforated inner lining. Vortex tube forces heat exchange to separate compressed air into cold air streams.

ANSI/ISEA Z308.1-2015 Standard for First Aid Kits

The new standard introduces two classes of first aid kits, Class A and Class B. The kits are further designated by type (I, II, III). Each type is intended to address the needs of the work environments where they are used.

Class A—Designed for the most common workplace injuries.

Class B—Designed to be equipped with supplies to deal with injuries encountered in more complex or high-risk environments.

Type I: Intended for use in stationary, indoor applications where kit contents have minimal potential for damage. These kits are not intended to be portable and should have a means for mounting in a fixed position.

Type II: Intended for portable use in indoor applications where the potential for damage to kit supplies due to environmental factors and rough handling is minimal.

Type III: Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage of kit supplies due to environment is not probable. These kits should have the means to be mounted in a fixed position and have a water-resistant seal.

STEINER

Fire/First Aid Blanket

- Meets Federal Standard Title 16 CFR Part 1610 for flame-retardant use

Durable wool blanket can be used to smother flames, drape over injured victims, and cover stretchers and other rescue carriers. Fully serged hems. The blanket stores neatly in the highly visible fluorescent red, vinyl-coated nylon tote pouch. Tote is flame-retardant, weather-resistant, plus resists grease and most acids and chemicals.

ZOLL®

Mobile Rescue Systems

These mobile rescue systems come with equipment and guidance to help users respond to traumatic events. Emergency medical kit No. 55KM13 guides users with real-time instructions with Mobilize Rescue App on how to use supplies to provide care for severe bleeding, seizures, choking, hypothermia, broken bones, allergic reactions, and more. Medical pack No. 55KM14 has an integrated rescue app and is portable and can be stored in vehicles or in remote locations. Law enforcement kit No.55KM15 works with Mobilize Rescue App and is compact and light and can be kept in work trucks, in the office, or with emergency response team members. Trauma kits Nos. 55KM16 and 55KM17 provide direction with Mobilize Rescue App and come in smaller cases and can be stored in classrooms, glove compartments, or other small spaces.

ZOLL®

Automatic AEDs

Full-rescue AEDs provide Real CPR Help® for rate and depth of chest compressions during CPR. Voice prompts and graphics guide rescuer through Chain of Survival, starting with checking responsiveness and ending with CPR compressions.

AED units with PlusTrac™ provide a third-party web-based service that ensures AED is properly maintained and has all necessary components. Acts as a resource for employees and ensures compliance with Good Samaritan laws. PlusTrac system includes medical direction with prescription, emergency response plan, dedicated account manager, AED registration/EMS notification, database setup, interactive AED management, e-minders and alert notifications, and interactive reporting console.

PlusTrac1 is a 1-yr. management program, and PlusTrac5 is a 5-yr. management program.

AED Plus® Fully Automatic—Fully automatic devices provide audible prompt: "DON'T TOUCH PATIENT," and then begin analysis. Automatically delivers shock if needed. If "NO SHOCK REQUIRED," prompts rescuer to begin CPR.

AED Plus® Semiautomatic—Semiautomatic AEDs require medical direction (included with every AED Plus® unit). Unit includes 10 batteries and 1 set of CPR-D-padz®. Pedi-padz II® No. 1YNR9 (pediatric pads) are sold separately.

AED Pro® Semiautomatic—Advanced functionality helps improve a patient's chance of survival. LCD displays ECG while using a 3-lead monitoring cable (No. 4EGN9, sold separately). Manual override for extra flexibility. Real CPR Help® feature helps user achieve optimum rate and depth of compression levels. See Thru CPR® feature helps professionals to view a patient's underlying ECG rhythm. Batteries sold separately.

AED Packages

Keep automated external defibrillators (AEDs) available for victims of sudden cardiac arrest.

HeartSine samaritan® PAD 350P/360P/450P AEDs—Up to 56% smaller than other AEDs. User-friendly, visual and voice prompts guide rescuer through entire resuscitation process, including CPR. With just an On/Off button or SHOCK button, PAD (public access defibrillator) uses electrode technology. A low energy escalating waveform automatically adjusts for differences in patient impedance. IP56 rated to guard against dust and water. No. 6GJN2 offers semiautomatic shock delivery and includes cabinet. No. 6GJN3 transmits automatic shock after analyzing heart rhythm.

LIFEPAK® CR Plus—Specially designed for the first person to respond to a victim of sudden cardiac arrest. Simple to turn on. Easy to find, remove, and place electrodes correctly. Fully automatic with ClearVoice prompts and shock therapy. Automatically escalates to 360 joules if needed. No. 454H59 delivers semiautomatic shock and includes a storage cabinet.

LIFEPAK® 1000 AED—Designed for professional responders. Large, intuitive screen displays clear, easy-to-read graphics and ECG readings. cprMAX™ technology minimizes CPR interruptions by allowing compressions to continue during AED charging.

Lucas 3® Chest Compression System—Intended for use as an adjunct to manual CPR when effective manual CPR is not possible. Ideal during patient transport, or extended CPR when fatigue may affect the delivery of successful/consistent compressions, or when EMS personnel are unavailable to perform CPR. Unit delivers consistent, high-quality chest compressions.

Semiautomatic AEDs

Easy-to-use semiautomatic AEDs help any user provide treatment for sudden cardiac arrest. Designed for use as standard equipment, devices have a simple 2-button interface, calm voice prompts, status indicator, and progress lights. No. 24VL57 Starter Kit includes AED, wall-mount cabinet with alarm, CPR rescue pack, 3-way wall sign, and prescription card. Other defibrillators come complete with adult electrode pads, battery pack, carrying case, and rescue kit with CPR mask, scissors, antiseptic wipe, razor, and nitrile gloves. Include a medical prescription/authorization coupon. See Grainger.com® for contents.

Bradley®

Emergency Combination Drench Shower and Eye/Face Wash Stations

- Meet ANSI Z358.1-2014

Feature SpinTec™ showerheads that provide a more even spray pattern, stay-open ball valves, and identification and inspection tags.

Halo™ Models—Space-saving design provides maximum washdown coverage and spray pattern. Designed with an ergonomic stainless steel push handle that can be reached from any direction. Integral strainer reduces debris and reduces clogging.

Classic Models—Include PVC push handles.

Barrier-Free Stations—Shower pull-handle and eye wash bowl extend to accommodate people with physical disabilities.

Halo Heat Trace Stations—Heat Trace cable protects units from freezing temperatures to -50°F. Include shower temperature control thermostat, freeze protection valve, and power indicator light.

Accessory—Shower alarm alerts others when drench shower/eye wash is in use. 3-ply vinyl privacy curtain is mildew-resistant and measures 70"L x 145"W.

Haws®

Emergency Combination Drench Shower and Eye/Face Wash Stations

- Meet ANSI Z358.1-2014

Units provide both drench shower and eye/face wash or eye wash. Innovative AXION® MSR eye/face wash head uses an inverted directional laminar flow to wash contaminants away from the nasal cavity. Hydrodynamic showerhead design helps maintain equal distribution of water through the entire footprint of flow. Chrome-plated brass stay-open ball valve features stainless steel ball and stem. Self-adhesive high-visibility safety green and bright yellow stripes and a universal sign are included.

Heat Trace Station—Can operate down to -30°F. Features ¾" insulation, ABS jacket, thermostatically controlled 120VAC electric heat cable, and automatic thermal actuator to help prevent freezing. CSA Certified to ANSI Z358.1, Type 4 Electrical.

Emergency Combination Drench Shower/Eye Wash Stations

- Meet ANSI Z358.1-2014

Stations have combined drench shower and eye/face wash or eye wash and include a 10"-dia. showerhead with stay-open ball valve and stainless steel pull rod. Eye and eye/face washes have 11½"-dia. eye wash bowl and feature twin spray outlet heads, stay-open ball valve, and cast-aluminum flag-type handle. Spray heads have internal filter and dust cover. Include ANSI-Compliant identification sign and inspection tag.

Heat Trace Station—Prevent freezing down to -40°F. Thermostat activates when internal piping temperature falls below 75°F.

Barrier-Free Stations—Shower pull rod and eye wash bowl extend to facilitate use by people with physical disabilities. Meet ANSI 117.1.

Granular Sorbents

Condor®—Absorbent Montmorillonite clay absorbs moisture and neutralizes odors to help reduce hazards. Absorbs most oils, water, grease, and acids.

Oil-Dri®—QuickSorb® smaller clay granules absorb quicker with less product. Premium® maximizes absorption and minimizes dust. Sweeping Compound® nonpetroleum compound is 100% biodegradable and meets all U.S. disposal requirements.

Spill Magic®—Absorbs and disinfects in one step. Fast liquid or semiliquid spill response. Leaves surfaces clean and dry with no residue. Environmentally friendly.

Oil Gator®—Environmentally friendly, all natural, and biodegradable. Absorbs oil or oil-based spills.

DZ-100—Environmentally friendly, all-natural corncob material absorbs cutting oils, grease, water, and other fluids. Not for use with aggressive fluids.

Re-Form™—Environmentally responsible absorbent is virtually dust free and absorbs fluid such as oils, solvents, and lubricants. Small granules leave no stain marks—great for concrete floors and porous surfaces. Made from 100% recycled materials. Not for use with aggressive liquids.

PIG®—Fast-wicking absorbents start soaking up fluids as soon as they touch the spill. Absorb and retain oils, coolants, solvents, and water. Silica-free. LITE-DRI® recycled cellulose is lighter than clay and absorbs up to three times more. Nonabrasive composition does not harm finished floors or machinery. DRI cellulose-based kaolin granules are 100% recycled content. No. 30RD13 is made from 100% #2 vermiculite. It is an excellent choice as an absorbent cushioning for overpack shipment, as it adds very little weight to the shipping container and flows into cracks and crevices to create a snug fit between the container and overpack.

Natural Mineral Sorbents

Environmentally friendly sorbents provide superior absorptive abilities to clean up water, oil, and grease.

EP Minerals® Diatomaceous Earth— Multipurpose absorbent for quick-and-easy cleanup of liquid spills. Effective on oil, fuel, solvents, and water. Absorbs 50% more than traditional clay sorbents.

Oil-Dri® Montmorillonite Clay— Maximizes absorption and minimizes dust. All-purpose natural sorbent is nonflammable. Quickly picks up most acids, oils, water, and grease.

Sorbent Socks, Pillows, and Drum Top Pads

Flexible absorbent products can be shaped and positioned exactly where needed to soak up fluids. Tube-shaped socks conform to corners and uneven surfaces to collect spills and drips. Pillows are great for use under spill pallets or machines, and in hard-to-reach areas such as sumps and catch basins. Drum top pads help eliminate messy drips and overflow when mixing or pumping liquids from a drum barrel.

Grippy® Absorbent Mats

No. 30PZ37

Full-coverage adhesive backing holds tight without shifting or sliding. 8-layer fine-fiber polypropylene absorbs oils, coolants, water, gasoline, solvents, battery acid, and most other fluids. Backing creates a liquidproof barrier to keep benches and floors completely dry, and peels up easily for quick changeouts. Tough spunbound top layer has zigzag stitching for durability. Dark color hides grime. Trims easily to fit. High-traction surface helps reduce slip and trip hazards around workstations, walkways, and machinery.

4 in 1® Absorbent Mats

No. 30PZ80

Tough, highly absorbent PIG Mats can handle a variety of leaks, drips, and spills and simplify your stockroom. Use as a pad for drips and spills; rolled out to cover large areas; folded along score lines to make a thick, absorbent sock; or torn along score lines for use as a low-lint wiper. Scuff-resistant, spunbound outer layer resists wear and tear under foot traffic and abrasive conditions. Universal matting absorbs oils, coolants, solvents, and water. Oil-Only matting absorbs oils and oil-based liquids but not water.

Blue® Absorbent Mats and Socks

Pads, Rolls, and Drum Top Mats—Superabsorbent natural fibers are fused with strong synthetics to soak up big spills and leaks with fewer change-outs. Absorbs oils, coolants, solvents, and water; not recommended for acids, bases, or other corrosive liquids. Easy-tear perforations. Contains 75% preconsumer recycled cellulose.

Socks—Heavyweight, extra-absorbent socks are filled with vermiculite to hug floors, provide an effective barrier, and stop spills from spreading. Absorb most industrial liquids including oils, water, solvents, and coolants.

Universal Sorbents

Pads, Pillows, Rolls, and Drum Top Mats—Flame-resistant, thermally bonded, 8-layer 100% polypropylene material will not rip, tear, or fray, even when saturated. Exclusive dimple pattern speeds wicking of liquid for faster, easier cleanup of oils, coolants, solvents, and water. Easy-tear perforations help reduce waste, and the material can be wrung out and incinerated after use to reduce waste or blend fuels.

Socks—Formable socks hug corners to control everyday leaks and can surround machine bases to absorb machine leaks, contain puddles, and help keep your workers safe. Tear-resistant polypropylene skin contains organic cellulose material to effectively absorb most common industrial liquids including oils, water, solvents, and coolants.

Ceiling Tile Pads—8-layer pad with polypropylene backing prevents minor drips from discoloring or destroying ceiling tiles.

Oil-Only Sorbents

Sorbents clean up oils and oil-based liquids including lubricants and fuels. They float on the surface of water for easy retrieval. Bright white color draws attention to machine leaks and shows saturation level during spill response.

Pads and Rolls—Highly absorbent, fine-fiber construction and exclusive dimple pattern quickly wick oily fluids into the mat for fast, easy cleanup. Strong thermally bonded construction with 8 layers of 100% polypropylene will not rip, tear, or fray, even when wet or saturated. Perforated for cost-saving right-sized use. Flame-resistant material melts instead of burning; can be wrung out and incinerated after use. Available in a grime-hiding brown color for extended service life.

Booms—Booms confine and soak up oily fluids. Rope along the length of the boom withstands up to 400-lb. loads, adding strength for deployment and retrieval. Feature a UV-resistant polyester mesh outer skin and zinc-plated carbon steel attachment clips and rings to easily link them together. Can be incinerated after use.

Booms have polypropylene pulp filler within a polyester inner skin. Recommended for water or land use. They hug the ground for land-based spills.

Spaghetti Booms have 100% polyester spaghetti-strip filler that's great to pull in thick oil such as crude or use in fast-moving waters. Not recommended for use on land.

Socks—Polypropylene skin resists tearing; reduces dust and holds in liquid even when saturated. Nos. 30RC52 and 30RC53 Skimmer socks skim oil from chemical baths in open-top dip tanks. No 30RC43 outdoor sock is UV-resistant up to one year, and abosorbs leaks on land. No. 30RC45 Sheen Clean® sock cleans up the thin, oily residue floating on water that other absorbents leave behind. No. 30RC55 indoor sock is for use where UV rays aren't a factor, with an economical design for general daily use.

Chemical Sorbents

Absorb and retain a wide range of acids, bases, corrosives, and unknown liquids—including high concentrations such as 98% sulfuric acid and 30% sodium hydroxide. Easily recognized pink color helps assure correct mat is used in an emergency.

Pads and Roll—Chemical-resistant mat resists reaction to corrosive spills. Heavyweight, highly durable pads and rolls feature 8 layers of 100% polypropylene thermally bonded for strength.

Acid Encapsulating and Neutralizing Absorbent Mat Pads—Absorb, encapsulate, and neutralize corrosives in one easy step for safer spill cleanup. Color of mat changes as liquids are taken in, then returns to normal when neutralization is complete; helps identify the best time to handle with the least amount of risk.

Pillows—Offers more absorbency for large chemical cleanups. Features a large surface area, high capacity, and fast-wicking filler to quickly soak up liquids.

Socks—Contain and absorb spreading spills; excellent for quickly diking and stopping the spread of smaller chemical spills. Can be incinerated after use to reduce waste.

Industrial Universal Sorbent Mats

Ideal for areas with heavy foot and forklift traffic. All handle industrial spills and provide sure footing.

Heavy-Traffic—Highly absorbent, dimpled, 2-ply polypropylene matting for oil, solvents, and water-based fluids.

BattleMat®—Abrasion-resistant upper 2-ply construction mat absorbs oil, solvents, and water-based fluids. Camouflage design hides stains and drips.

Barrier Spill Mat™ (BSM)—3-ply needle punched polypropylene material with a nonstick backing prevents fluids from penetrating to the floor. Absorbs water, oil, and chemicals.

Sorbent Industrial Rug™ (SIR)—100% nonwoven needle punched polypropylene fibers handle the most aggressive liquids. Helps eliminate tracking between plant and office areas.

RAG RUG—Economical mat made of recycled cotton and polyester fibers. Absorbs water- and solvent-based fluids and oil.

Sorbent SOCs

For routine spill containment and control. SOCs mold around machines and conform to uneven surfaces.

Cobra Coil® Universal—Diking SOC filled with vermiculite sorbent used for most fluids.

ALLWIK® Universal—All-purpose polypropylene suitable for most industrial applications. Wringable and incinerable.

SLIKWIK® Universal—Corncob-filled SOC used for all nonaggressive fluids.

Basic Universal—Economical absorbent SOCs filled with a cellulose fill. For use with most nonaggressive fluids.

Oil-Only—100% polypropylene repels water or water-based solutions.

HAZWIK® Chemical—Polypropylene SOC for use with aggressive fluids. Color-coded green for safety.

Oil-Only Sorbents

Highly absorbent construction provides effective oil response to leaks, spills, and helps you avoid costly cleanups. Mats and pads are tough enough to stand up to foot and vehicle traffic. Socks are easy to deploy and are ideal for surrounding spilled fluids or wrapping around leaky machines. They're flexible so you can place them around machine bases for a snug fit.

SpillTech

Chemical/Hazmat Sorbents

Use for a fast and efficient response to spills of hazardous or unknown liquids. Rolls are ideal when you need to cover large spill areas. Socks allow you to contain spills so fluids won't spread out into larger or hard to access areas. They're flexible so you can deploy them around the bases of leaky machines with no seepage.

Spill Kits

SpillTech

Portable spill kits provide the right absorbents to help you contain spills and reduce slip-and-fall hazards. They can be easily positioned in a warehouse, factory, or other facilities for fast containment and cleanup. Choose a tote bag, bucket, or duffle bag with the absorbents you need for your specific spill. Their compact design allows easy storage in fleet vehicles. Overpack kits come in a durable, lightweight, and chemical-resistant container that contains a variety of absorbents and protects them from damage, dirt, and moisture. Wheeled overpacks can fit easily through doorways and aisles and are easy for you to maneuver in tight spaces without the need for a hand truck or other material handling equipment. Lockable overpacks help protect contents.

Description	Volume Absorbed per Pkg.	Includes	Mfr. Model	Item No.
Portable Kits with Tote Bag				
Spill Kit/Station/Bag, Universal	7.49 gal.	(20) Absorbent Pads, (2) Absorbent Socks, (2) Disposal Bags and Ties, (1) Safety Goggles, (1) Pair of Gloves, (1) Tote Bag	SPKU-TOTE	**443U03**

Spill Containment Trays

Foldable Utility—Portable 1-pc. trays made of high-visibility, 18-oz. PVC fabric unroll and unfold for setup.

Utility—Polyethylene construction with ribbed bottom to keep containers elevated above small spills or leaks.

Laboratory Trays—Polypropylene (PP) trays are for use with safety mats or wire grid. Low-density polyethylene (LDPE) trays have heavy walls and wide top flanges.

Pallet Racks—Polyethylene trays fit under shelving and pallet racking. Help contain small spills and leaks from palletized containers. Additional trays and connectors configure larger areas.

Leak Diverters

No. 10C889

- Vinyl-coated clear and translucent diverters resist punctures, UV, and mildew
- White and yellow diverters are flame-retardant

Diverters capture overhead leaks and redirect the fluid. Connect standard garden hose to the bottom fitting and route to floor drain, collection drum, or tank. Include steel rings in each corner for easy installation. No. 42X297 also includes a bungee cord.

Leak Diverters

Easy-to-hang diverters catch leaks and channel them to a floor drain or container.

Roof Leak Diverters—Diverters accept a standard ¾" hose connection. Hose and hanging straps sold separately, except self-hanging Umbrella-Style Kits include diverter, hose, and drain fitting for longer hoses.

Roof and Pipe Leak Diverter Kits—Contain supplies for rapid response to leaks.

Drain Catch Basin Inserts

No. 3BU44

No. 32V033

Inserts keep sediment, oils, and other equipment runoff from entering the water system.

Storm Sentinel™—Self-supporting designs adjust to fit most basin sizes. Drain Dam No. 3BU45 attaches to drain grating at curbside to redirect water into catch basin inserts.

Ultra-Drain Guard®—Inserts exceed 80% sediment removal efficiency. Nos. 3EWN9 and 10D417 feature filter strips to increase oil and grease absorption. Grate Hook No. 3EWP2 safely lifts grate from catch basins, drains, and other inlets.

Build-A-Berm® Barriers

Designed for long-term use to contain leaks from machinery or storage areas, and keep liquid away from equipment. Open-cell foam core springs back into shape after you walk or drive over the berm.

Barrier Components and Kit— Durable 18-oz. vinyl cover withstands being driven over with light wheeled equipment. Straight sections are easily cut to length. 90° corners create liquidproof junctions. Wall end pieces seal flush against floor and wall.

Heavy-Duty Barrier Components— 40-oz. vinyl-coated fabric cover helps provide permanent or semipermanent containment in areas with frequent heavy vehicle traffic on concrete, asphalt, or most sealed surfaces.

Barrier Kit No. 30RF31

SpillBlocker® Barrier Dikes

No. 30PW54

Nonabsorbent, easy-to-install barriers deliver fast protection.

Reusable dikes feature tacky bottom layer that makes a tight, liquid-blocking seal on smooth surfaces.

No. 30PW61's super-tacky bottom layer forms a liquid-tight seal on asphalt. Includes 1 connector. Intended for 1-time limited use—do not use long term.

Portable Containment Berms

Fast assembly for immediate spill containment response.

Stinger Yellow Jacket™ Units— Lightweight, portable pallets fold up for compact storage and transport. Snap-up support strips provide sturdy sidewalls to contain acid and hazmat spills.

Stinger Snap-Up Berms™—Heavy-duty, easy-to-assemble snap-up design permits immediate response. Excellent rip, tear, and puncture resistance for demanding applications. Lap joint welds for maximum strength. Fuel- and chemical-resistant. Compact and easy to store and ship.

Stinger Rail Berm™—Lightweight, durable containment pad provides portable spill containment and control for below-loading/unloading rail tank cars. Outside rail side compartment features two 2" drains with a quick-coupling system to transport spilled material.

Stinger Snap-Foam Berms™—True drive-in/drive-out capabilities: foam log end caps allow tanks and trucks to enter and exit at will without assistance. Feature a reliable two-way air relief system.

ULTRATECH INTERNATIONAL, INC.

Ultra-Containment Berms®

Larger sizes protect heavy equipment from spills; smaller sizes provide total containment of drums, tanks, generators, and other equipment. Constructed of durable Copolymer 2000™. Economy, Compact, and Collapsible models feature sidewalls that lower quickly for convenient entry and exit.

Economy—Space-saving design is excellent for use anywhere floor space is a premium. L-shaped aluminum brackets provide sturdy sidewall support and easy assembly. Fit comfortably into tight storage spaces.

Compact—Lightweight, portable design folds for easy storage on trucks and hazmat response vehicles. Deploy without inflation; just insert sidewall struts into their pockets.

Collapsible—Support feet on rugged PVC sidewall assemblies swivel to lower or raise the walls quickly.

Rapid Rise—Sidewalls stay lowered during normal operations; no setup or takedown required. Vehicles drive in and out from any angle. In the event of a spill, the foam ring around the top perimeter rises with the level of spilled liquid.

Ultimate—Entry and exit walls are supported every 12" with a proprietary two-way hinge. Hands-free drive-in/drive-out endwalls automatically spring back to vertical. PVC sidewall assemblies easily swivel up or down for storage or transport.

Lab Packs, Overpacks, and Salvage Drums

EAGLE®

HDPE (high-density polyethylene) containers. Safety yellow, except Nos. 2RNY7 and 2RNY8 are blue.

LAB PACKS/OVERPACKS

- Lab packs, except No. 3TZW5, meet DOT 49 CFR 173.12
- Overpacks meet DOT 49 CFR 173.25
- Nos. 2RNY7 and 2RNY8 also meet FDA 21 CFR 177.150

Use lightweight, nestable lab packs and overpacks for storage, transportation, cleanup, and spill containment. Yellow lab packs have plastic lever-lock or screw-top lids. Blue lab packs have plastic lids with metal lever-lock rings.

14 and 20 Gal. Lab Packs—Easily store 5 gal. pails or smaller containers. 20gal. containers have handles.

30 Gal. Lab Packs—Stackable; can be used as a shipping container, lab pack, or spill kit container.

Overpacks—Feature screw-top lids and include handles for forklift use.

SALVAGE DRUMS

- Meet 3 psi pressure test and DOT 49 CFR 173.3

Nestable drums provide safe secondary containment for storage, transport, and cleanup. Removable poly head and metal band. No. 4RF63 features handles.

DRUM ACCESSORIES

Drum Tray—Chemical-resistant tray goes under 5 to 55 gal. containers during dispensing or filling. Reservoir with raised supports keeps container away from spills.

Metal Drum Tray Dolly—Welded construction and rubber wheels.

Drip Pan—Filled with polypropylene sorbent to hold up to 1 gal. of oils, water-based liquids, and other nonaggressive liquids.

Overpack/Salvage Drums

ENPAC

- Meet UN Group 1 Standards
- Meet DOT 49 CFR 173.3(c)
- Meet EPA, SPCC, and NPDES Regulations

Provide secure secondary containment of leaking liquids and hazardous materials. Chemical-resistant polyethylene construction with screw-top lid is great for indoor or outdoor use. Full drums can easily be moved with forklift.

Locking Overpack/Salvage Drum—Easy twist-down closing with secure 4-pt. system "locks" stacked salvage drums. Lock Down Security Kit No. 5LPZ1 is an optional, additional lockable serialized identification system to account for hazardous material from point A to Z.

Wheeled Overpack/Salvage Drums—Built-in handles and 6" polyolefin wheels enhance mobility and versatility, offering quick response on the move.

Spill Containment Platforms and Pallets

Constructed of HDPE (high-density polyethylene) for excellent chemical resistance and durability. Compatible with pallet ramp No. 45ZA01 for simple loading and unloading, except as noted.

Platforms—Modular units feature a low-profile design with removable black grating for easy cleaning. 1-, 2-, and 4-drum units can be easily connected with built-in U channels.

Pallets—Units come with removable grating for easy cleaning and built-in pockets for forklifting.

Spill Pallet Ramp—Durable ramp enables easy loading and unloading on and off pallets and platforms.

Spill Containment Platforms and Pallets

PLATFORMS, PALLETS, AND SUMPS

- Meet EPA 40 CFR 264.175

Platforms and pallets have chemical-resistant HDPE construction; yellow tub with black flat-top removable grating for quick spill inspection.

Modular Platforms—Flexible to reconfigure drum storage and dispensing areas. Interlocking low-profile design makes loading and unloading easier. Built-in U-channel connectors. All except 1-drum platforms feature forklift pockets. 1-drum platforms are injection molded for improved performance.

Platforms—Platforms are ideal for larger-quantity storage needs. Feature forklift pockets. 6- and 8-drum platforms are injection molded for increased capability.

- SPCC Compliant

Pallets—Provide mobility for transfer, dispensing, and waste collection areas. All feature forklift pockets.

Spill Sumps—Black polyethylene construction.

- SPCC Compliant

RAMPS

- Weight cap.: 1500 lb.

Polyethylene spill platform ramps make platform unloading easy. For use with all platforms listed below except Nos. 3PA32 and 35U062 to 35U064 and pallet Nos. 35U069 to 35U072.

Spill Containment Platforms and Pallets

ULTRATECH INTERNATIONAL, INC.

These containment platforms and pallets are used to contain spills, drips, and leaks. They are made from 100% polyethylene and compatible with a wide range of chemicals, including acids and corrosives. Low-profile design reduces the potential for hazardous liquids to splash into eyes or face. Ramps are used to load and unload drums. Platforms and pallets meet SPCC and EPA contain storage regulation 40 CFR 264.175.

Eagle Drum System (Components Sold Separately)

ENPAC® Drum Rack System No. 4TAL6

Spill Containment Systems

Eagle Drum Containment System— Chemical-resistant, polyethylene modular system can be configured for desired setup. Cradle No. 5PV96 interlocks with spill pallet grating for stable drum storage. Shelf No. 5PV99 attaches to single or double unit to support containers while dispensing from drums.

- Use with Eagle's spill containment pallets and platforms (see page 1863)

ENPAC® Drum Containment System— Polyethylene system consists of base module, stack module, and dispensing shelf. Double dispensing well accommodates safety cans and 5-gal. pails.

ENPAC® Drum Rack System— Polyethylene system holds two horizontally stacked 55-gal. drums. Shelf permits simultaneous dispensing, and bottom well holds 5-gal. pails and contains incidental spills and splashes. Can be moved with a forklift.

Portable Spill Containment Units

Mobile Drum Spill Dolly— Protects against spills and leaks while moving drums. Features poly push/pull handle with a vertical locking port and 5 swivel casters (2 locking).

Drum Spill Platform Cart— Polyethylene construction. Features flat-top removable grating on steel frame, push/pull handle, plus 2 swivel and 2 fixed casters.

Spill Containment Caddies— 100% polyethylene drum handling, dispensing, and spill containment systems hold 55-gal. drums. Can be transported with forklift. Dispensing accommodates a variety of containers. Indoor Caddy No. 3KP15 has 10" polyolefin wheels. Outdoor Caddy No. 3KP22 has 10" semipneumatic wheels. Removable caddy liner available for easy cleaning.

No. 30RF41

Aerosol Can Recycler System

- No. 30RF41 meets EPA 40 CFR 261.1(c)(6)

Designed to puncture and drain aerosol cans to help render them exempt from hazardous waste regulations. Works with 9½"H domed mini, standard, and jumbo aerosol cans. Complete with puncture unit, goggles, instruction sign, plastic sleeve, 2-pc. carbon/coalescing filter, and grounding wire. Recycler mounts directly into a 2" bung on a 30- or 55-gal. drum to capture residual liquids. Features a carbon cartridge changeout indicator strip—carbon cartridge life is 3 mos., coalescing filter life is 6 mos.

Description	Mfr. Model	Item No.

Portable and Flexible Spill Pallets and Grates

ENPAC

Pallets provide temporary movable containment use and spill control. Can be used as portable washdown pad or pumping station. For indoor or outdoor use. Polyethylene foam Grates, Nos. 4TAL8 and 4TAL7, provide a firm foundation and clearance to capture incidental spills for items stored on spill pallets. Flexible construction allows for hand truck traffic and ample storage and transport.

In-Line Spill Deck Bladder Systems

ULTRATECH INTERNATIONAL, INC.

- Meet EPA 40 CFR 264.175 spill containment regulations
- SPCC compliant

Polyethylene containment deck systems consist of connected modules that enable spills to flow from module to module. Hidden containment bladder unfolds for additional spill capacity. Can connect to additional in-line systems for expansion. Low-profile design with narrow depth saves valuable floor space.

Description	Spill Cap.	Load Cap.	L	W	H	Mfr. Model	Item No.

Secondary Containment Rack Sump

ULTRATECH INTERNATIONAL, INC.

- Meets EPA 40 CFR 264.175
- SPCC Compliant

Low-profile design fits into most warehouse racking and allows forklift access to pallet while sump remains in place. Polyethylene construction resists rust, corrosion, and chemicals. Holds up to four 55-gal. drums and can accommodate 40" x 48" or 48" x 48" wooden pallets. Translucent yellow color. Nestable design allows for easy storage when not in use.

Roll-Top Spill Containment Units

No. 3FTY1

- Meet EPA 40 CFR 264.175
- Comply with SPCC

Allow safe storage of hazardous drums with pumps and funnels in place. Lockable polyethylene units are resistant to rust and corrosion. Roll-top cover offers easy access. Can be safely moved by forklift or dolly.

1-Drum—Tall, 25¾" head space allows easy access to drum pumps and conical funnels. Lightweight upper section can be removed for loading or unloading.

2-, 4-, and 8-Drum—Enclosure design has wide-swinging front doors that allow drums to be easily accessed from either side. Low-profile containment pallets for safe, easy pouring or pumping. Spill Platform Ramp No. 3FTZ2 provides easy drum handling and stores inside unit.

Storage Building

No. 5PW03 and No. 4RF65 (Sold Separately)

- Meets EPA 40 CFR 264.175

Covered hut can securely store up to four 55-gal. spill containment drums. It is made of high-density polyethylene (HDPE) with UV inhibitors, and has vented door louvers and a removable grating. The building has 4-way forklift pockets for transport when full. Empty building is easily positioned with the integrated top hooks. Optional ramp helps ease loading.

Hard-Top Containment Systems

No. 9CG52

- Meet EPA 40 CFR 264.175 spill containment regulations
- SPCC Compliant

Hard-top systems feature lockable hinged covers to provide secure outdoor storage of hazardous materials. Easy-open covers have steel lift brackets to temporarily remain in an open position. Weather-resistant polyethylene construction is compatible with a range of chemicals. UV inhibitor helps resist damage. Removable deck grates for easy cleaning of sump area. Pallets, also available separately, have bright yellow translucent sidewalls that enable visual leak detection. No. 4LNR5 is not for use with 2-drum pallets.

IBC Spill Containment Units

ULTRATECH INTERNATIONAL, INC.

Units have all polyethylene construction for chemical resistance; will not rust or corrode. Large 52" x 52" deck with removable grates for easy cleanup. Forklift access. All except No. 4LNT2 have a low-profile design for safe, convenient dispensing. Single and double-stack units have a small footprint. Double-stack unit holds 2 IBC tanks stacked on top of each other; meets EPA and SPCC container storage regulations. Twin units feature a 1-pc. molded sump that meets EPA and SPCC spill containment regulations for 2 IBC tanks.

IBC Spill Containment Units

EAGLE®

- Meet EPA 40 CFR 264.175

Polyethylene units resist rust, corrosion, and most chemicals.

Single IBC Spill Units—Platform supports IBC tanks up to 50" square and can hold up to two IBC tanks vertically. Wide size helps contain side puncture-type leaks.

Double IBC Spill Unit—Accommodates two IBC tanks and fits most IBC dispensing units. Can be moved with a forklift. Two front bucket wells provide safe dispensing.

Safety Storage Cabinet Information

Consider the following when selecting a safety cabinet:
- **Federal, state, and local compliance requirements**
- **Hazardous chemical flash point**

Determine whether liquid is Class I (Flammable) or Class II and III (Combustible) by using the liquid's Material Safety Data Sheet (MSDS). The flash point of your liquid classifies it as flammable or combustible.

OSHA COMPLIANCE:

The combined total of Class I and Class II liquids should not exceed 60 gal.

NFPA 30 COMPLIANCE:

The combined total of all Class I, Class II, and Class III liquids should not exceed 120 gal.

FLASH POINT GUIDE:

Class I Flammables - Flash Point: Below 100°F

Class II Combustibles - Flash Point: 100° to 139°F

Class III Combustibles - Flash Point: 140°F and above

COMMON FEATURES:

Double-wall construction with 1½" air space, continuous piano hinges, self-latching doors with 3-point key lock, 350-lb. capacity adjustable shelves, dual vents with flame arrestors, 2" leakproof bottom sill, leveling feet, built-in grounding connection. Includes English, Spanish, and French warning labels.

DOOR TYPES

Manual—Doors open full 180° and self-latch when pushed closed.

Self-Close—Doors automatically shut and latch after release. Fusible links hold doors open and melt at 165°F for automatic closure. Bifold, sliding style glides smoothly on spring-loaded track for one-handed access. Self-closing doors are mandatory in certain states that follow the NFPA Fire Code. Contact local fire marshal for specific requirements.

Steel Safety Storage Cabinets

- FM Approved except Nos. 1AKG3, 4KPX5, and 4-gal. cabinets
- Meet OSHA and NFPA Code 30 Standards

Constructed of fully welded, 18-ga. galvanized steel with powder-coat finish. U-Loc™ paddle handle with slip-resistant grip features fail-safe, 3-point self-latching system and 2 keys; will accept a padlock for added security. SpillSlope™ shelves adjust on 3" centers and have built-in troughs to catch drips and lead to leakproof sump. Haz-Alert™ reflective labeling for added safety.

Standard—Nos. 1AKG3 and 4KPX5 feature a dual-padlock steel security bar.

Standard with Safety Cans—Cabinet has a 2" leakproof sump and includes Type I, 5-gal. red galvanized steel safety can No. 6AW03, also sold separately on page 1874.

- Can is UL Listed

Slimline—Slim width allows extra storage space.

Countertop—Ideal anywhere space is at a premium.

Stackable—Stack or mount on top of 30- and 45-gal. cabinets. Can also be wall- or bench-mounted.

Under Counter Mount—Recessed 2½" kick plate mounts flush with other cabinetry. Dual vents on back wall provide increased airflow.

Specialty Safety Storage Cabinets

- Steel cabinets (except No. 32XT36) meet OSHA and NFPA Code 30 Standards
- FM Approved, except 4-gal. steel cabinets (Nos. 1YNG6 and 1YNH8) and all polyethylene cabinets

18-ga. galvanized steel cabinets have powder-coat finish. Justrite® models feature a padlockable U-Loc™ paddle handle, SpillSlope™ shelves, and Haz-Alert™ labeling. Eagle models feature recessed paddle handle with key lock and shelf brackets. Polyethylene cabinets include 1-gal. internal and top sump areas, integral handles with locking tab and door storage area. Jamco® model includes paddle latch, adjustable shelf, and two polyethylene trays.

Paint and Ink—Cabinets have a baked-on, high-gloss epoxy powder-coat finish.

Flammable Liquid—These cabinets have a high-gloss power coated red finish with a yellow warning message. They feature a 3-point latch system and 2" raised, leakproof door sill.

Aerosol Can—Epoxy/polyester powder-coat finish for chemical resistance. Smaller-footprint, nontip cabinets are wall-mountable.

Corrosive—Clearly labeled for acid/corrosive contents. Lockable handles. Galvanized Steel cabinets have a corrosion-resistant powder finish.

Corrosive Modular Quik-Assembly—Ideal for labs and industrial settings. Lockable doors open 180°. Adjustable shelves.

Pesticide—High-gloss powder-coat finish. Inside bottom polyethylene platform and poly shelf trays.

Steel Hazardous Waste and Flammable Drum Storage Cabinets

- Meet OSHA and NFPA 30 Standards
- Vertical 1-Drum Cabinets are FM Approved, except No. 13M581

Constructed of fully welded 18-ga. galvanized steel (except Nos. 55EC26 through 55EC29 are steel) with powder-coat yellow finish. Eagle® models feature flush-mounted handle with key lock and shelf bracket with 4¾" centers. Justrite® models feature U-Loc™ paddle handle with slip-resistant grip and 2 keys plus will accept a padlock for added security. SpillSlope™ shelves adjust on 3" centers and have built-in troughs to catch drips and lead to leakproof sump. Haz-Alert™ reflective labeling for added safety. Jamco models feature a flush-mounted, lockable handle (2 keys) with a 2" leakproof sill to contain any spills.

Flammable Cabinets—Have upper and lower vents, which provide connections for 2" threaded fittings. Justrite and Eagle vertical models include 1 shelf. Nos. 4HTX2, 1YNH2 and 6VTG5 have rollers inside the bottom to assist in loading and unloading.

Drum Cradle—Easily moves horizontal 55-gal. drums up to 800 lb.

Cabinet Ramps—Fit over sill to keep securely in place for moving drums.

DENIOS
THE HAZMAT PRO®

Outdoor Storage Lockers

- 90 mph wind rating
- Lockable hinged doors
- Sumps are sized to provide compliant spill volumes
- FM Approved, except Nos. 8DPR3 and 9UA63

Safely store flammables and hazardous chemicals. All lockers include spill-compliant sump, passive ventilation, exterior grounding lug, anchoring point, and NFPA 704 placard.

NONCOMBUSTIBLE IBC STORAGE LOCKERS—K17 SERIES

Designed for small volume storage and processing.

NONCOMBUSTIBLE OUTDOOR STORAGE—N05 SERIES

Durable 11-ga. welded steel for exterior drum storage.

2-HR. FIRE-RATED STORAGE LOCKERS

Firewall design complies with fire rating requirements for storage of flammables within 10 ft. of your facility. Drum lockers are suitable for storing, collecting, and filling small containers and drums.

Propane Cylinder Storage Cabinets

Vestil

- 10-ga. welded steel
- White painted finish

Durable cabinets are ideal for storage of standard #20 propane gas cylinders. Each shelf can hold 6 cylinders. Lockable front door (padlock not included) constructed of expanded steel mesh or solid steel. Back and sides are steel mesh and top is solid sheet steel. Include red-letter unattached signage with verbiage: "PROPANE EXCHANGE" and "FLAMMABLE-NO SMOKING". Meet NFPA 58 and OSHA Section 1910.110 design standards.

JUSTRITE® EAGLE®

Type I Safety Cans

Safety cans with leaktight, self-closing spouts provide temporary storage of flammable liquids such as gasoline (red), kerosene (blue), diesel (yellow), and oil (green). Automatic vent feature protects against rupture or explosion, and flame arrestors protect contents from external ignition sources. Galvanized steel models feature an ergonomic, all-steel handle and chemical-resistant, high-gloss powder-coat finish. High-density polyethylene cans are impervious to many liquid chemicals, solvents, and corrosives.

Type I Safety Cans—Cans have a single opening for both filling and transfer of flammable liquids into containers with wider openings. Justrite® and Eagle galvanized steel cans have a trigger-release cap. Justrite® galvanized steel cans have a full-fisted grip handle that swings for easy handling, except No. 6UZN1 features a trigger handle. Eagle polyethylene cans have stainless steel fittings and a flame arrestor. Justrite® polyethylene cans have plated steel or stainless steel fittings and a flame arrestor and content ID zone for identification of fuels being stored.

Type I Safety Can Combo Kits—Include all the features of Eagle Type I Safety Cans Nos. 2W428, 2W429, 2W313, 4RF73, and 4RF74 with Funnel No. 6X853.

Funnels For Type I Safety Cans—Polyethylene funnels fit Type I cans. No. 3AG33 features a 2-position hinge that allows user to fill or pour without removing the funnel. No. 6X853 self-locks and is FM Approved.

No. 9FA80

No. 19MP69

GA GRAINGER APPROVED

JohnDow Industries

Portable Fuel Caddies

These mobile fuel caddies help you transport fuel safely to jobsites.

GA—Molded-in baffle prevents spills during transport. Spring-loaded nozzle with 2-way rotary hand pump and 10-ft. hose. Calibrated in 2-gal. increments. Polyethylene construction is resistant to chemicals, rust, and dents. Aluminum nonsparking axle and pneumatic tires with nylon bearings and wheel hubs. UN Approved, DOT Approved.

JohnDow Industries—Heavy-duty bidirectional pump provides suction for 5.7 gal./min. @ 72 rpm dispensing (1 gal. per 12 turns). Semipneumatic wheels provide safe, easy movement. Also features 2" filler neck for bulk filling. UL Listed.

Fuel Cans

- Meet EPA standards
- DOT and CARB Compliant

Provide temporary storage of flammable liquids such as gasoline (red), diesel (yellow), and kerosene (blue). Child-resistant fuel cans are self-venting for safe and easy pouring with auto shutoff. Angled and tapered design prevents spills, leaks, and reduces gas emissions. Nos. 55GU74–55GU78 have an intuitive press button spout that gives you precision flow control for an accurate, no-mess pour. No. 33UZ30 includes 0.9 mm cold-rolled steel walls, an interior rust-proof Rezol lining, internal breather pipe for splash-proof pouring, a three handle configuration for easy carrying, a leakproof bayonet closure, plus a locking pin for the cap.

GarageBOSS™ Press 'N Pour Spout—For use with all GarageBOSS fuel containers.

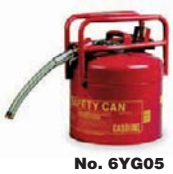
EAGLE® JUSTRITE®

Type II Safety Cans and DOT Transport/Dispensing Cans

Galvanized steel safety cans with leaktight, self-closing spouts provide temporary storage of flammable liquids such as gasoline (red), kerosene (blue), diesel (yellow), and oil (green). Feature ergonomic, all-steel handle, flexible metal hose, automatic vent, and flame arrestor. Chemical-resistant, high-gloss powder-coat finish.

Type II Safety Cans—Cans have two openings for filling and pouring and a trigger release cap.
- FM Approved, UL and C-UL Listed, TUV Certified

Type II AccuFlow™ Safety Cans—Vented AccuFlow™ manifold provides superior pour control and precise smooth flow. Features easy-trigger handle, 3½" stainless steel flame arrestor, and quick-open port with ergonomic lift handle. Warning label with extra-large ID zone identifies contents.
- FM Approved, UL and C-UL Listed, TUV Certified



Type II DOT Transport/Dispensing Cans—Specifically designed for applications requiring DOT/UN compliance. Roll bar construction protects the fill and pour mechanism from damage. Dual fusible-link bracket guards against spillage and vapor release during transport. 100% leak tested.
- Meet DOT requirements
- FM and UN Approved

Safety Can Spill Tray—Large diameter surface supports safety cans up to 5-gal. capacity.
- Meet OSHA and NFPA Code 30 Standards
- Carb Compliant

JUSTRITE® EAGLE®

Hazardous Liquid Safety Cans

- Meet OSHA Standards
- FM Approved

24-ga. galvanized steel cans with red powder-coat finish are used for general purpose solvents. Polyethylene cans are used with corrosive liquids or alcohol. Plunger and bench cans feature dasher plate to keep contents from ignition sources.

Plunger Cans—Permit fast, easy moistening of cleaning cloths when applying solvents to parts. Surplus liquid drains back into reservoir. Eagle® brand models include brass plunger assembly. Justrite® models have Ryton™ and brass plunger assembly.

Bench Cans—Ideal for easy cleaning of small parts in solvents. Eagle brand models feature spring-loaded, perforated dasher plate. Justrite brand models feature steel dasher plate that serves as an effective flame arrestor. Hinged cover minimizes evaporation loss.

Solvent Can with Tray—Portable, leaktight can features spring-loaded, self-closing lid. Controls VOC emissions and cleaning agents. Accepts standard long cotton-tipped applicators and small cleaning utensils. Tray makes it easy to carry to point-of-use.
- Meets EPA 40 Requirements

Safety Containers for Laboratory Environments

Laboratory Faucet Cans—Self-closing faucet provides safe dispensing. Fill spout has pressure-relief cap with flame arrestor. 5-gal. models include a built-in vacuum breaker. Brass faucet, except No. 3NKU4 faucet is stainless steel. Cans are shelf-mounted with a bottom-mount faucet, except Nos. 3NKU4, 3NKJ4, and 3NJX9 faucets are located on the top.
- FM Approved
- No. 3NKJ4 is UL Approved

Self-Close Acid/Corrosive Safety Cans—Store acids and caustics. Spring-close cap provides tight seal. Containers are marked in liters, quarts, and gallons for accurate filling and dispensing.

Bottle Safety Jacket—Protects 4L and 1-gal. glass bottles from breakage. Bottle fits into bottom half of cover, and lid twists securely for safe pouring.

Dispensing Squeeze Bottles—Feature stainless steel wire with shapable stem that dispenses a fine, targeted stream of flammable liquid directly onto or into small objects and allows access to hard-to-reach areas.

Dispensing Bottles—1-handed brass dispensing valves are leakproof and self-closing. Body is textured and shaped for a firm grip.
- FM Approved

Fire Extinguisher Information

UL FIRE CLASSIFICATIONS

Class A: Common combustibles (wood, paper, cloth, etc.)

Class B: Flammable liquids and gases (gasoline, propane, and solvents)

Class C: Live electrical equipment (computers, fax machines, etc.)

Class D: Combustible metal (magnesium, sodium, potassium, etc.)

Class K: Cooking media (cooking oils and fats)

UL EXTINGUISHER RATINGS

The number indicates the extinguisher's relative power against that class of fire. An extinguisher rated 2A is twice as powerful against common combustible fires as one rated 1A.

Classes C and D do not have a numerical rating.

UL Rating	Cap.	Extinguisher Type	H	Dia.	Cylinder Material	Fire Extinguisher Bracket Type	Operating Pressure	Discharge Time	Range Max.	Mfr. Model	Item No.
Pro "Class ABC" Dry Chemical											
1A:10B:C	2½ lb.	Dry Chemical	14½"	3.25"	Aluminum	Wall Mount	100 psi	8 to 12 sec.	15 ft.	PRO 2.5MP	**5T904**

Rechargeable Fire Extinguishers

Kidde

Pro and ProPlus Dry Chemical—5-, 10-, and 20-lb. units include hose. ProPlus feature ergonomic, curved steel handle.

Rechargeable Fire Extinguishers

BADGER

ADVANTAGE

Cylinders have aluminum valves, handles, and levers. 2-piece nameplates provide easy-to-read operating instructions. Aluminum models are ideal for marine environments.

STANDARD

Dry chemical fire extinguishers are effective on common fires in most commercial and industrial applications. Feature aluminum valves, handles, and levers, durable O-rings, and heavy-duty stem valves.

EXTRA

All Extra series extinguishers feature chrome-plated brass valves, and stainless steel handles, levers, and pull pins. Include heavy-duty hose and couplings and durable O-rings.

BRIGADE CARTRIDGE-OPERATED

Multipurpose extinguishers for Class A, B, and C fires. 360° swivel discharge nozzle can be easily used by both right- and left-handed users. UL Recognized.

Rechargeable Fire Extinguishers

- Meet DOT Requirements

Feature all-metal valves with steel or aluminum cylinders.

High Flow Dry Chemical—Designed to attack flowing liquid and pressurized gas fires. Capable of fast knockdown.

Carbon Dioxide—Residue-free agent for use on Class B and C hazards.

Halotron—Clean agent gas for Class B and C hazards. Halon replacement.

Wet Chemical—Required in commercial kitchens for cooking oil fires.

Aluminum Disposable Dry Chemical Fire Extinguishers

- Aluminum cylinder with aluminum valve
- Nos. 479W99 and 479X03 include retention strap bracket
- UL Listed

Mariner extinguishers are for regular marine use. Easy-to-read pressure gauge and easy-pull pin. No. 479W99 is for most common fires. Use No. 479X03 for liquid and energized electrical fires.

Water and Water Mist Fire Extinguishers

Reliable extinguishers all feature a rechargeable stainless steel cylinder. No. 3YWG4 uses a water stream as the extinguishing agent. Nos. 13J015 and 35WT24 use deionized water (sold separately) as the extinguishing agent; a misting nozzle improves cooling and soaking characteristics.

Wheeled Fire Extinguishers

- 50-ft. hose (except No. 8RY81 has 25-ft. and No. 8UKR9 has 40-ft. hose)
- 16"-dia. semipneumatic tires, (except Nos. 13J006 and 13J010 have 36" x 6" steel wheels)

Feature brass fittings and live swivels.

Stored Pressure—Can be activated instantly, with agent and pressurized gas stored in the same cylinder.

Direct Pressure—A separate pressurized gas cylinder simplifies recharge.

Regulated Pressure—Deliver constant pressure and complete discharge, employing a regulator to control transfer of pressurized gas to the agent cylinder. Residual pressure clears the hose.

GA GRAINGER APPROVED

Fire Extinguishing Spray and Fire Retardant

Fire Extinguishing Spray—Instantly cools down surfaces that are too hot to work on or around. Sprays into hard-to-reach areas from any position. Meets UL 2N75, NFPA 18, and EPA Standards.

Fire Retardant—Spray on to fabrics, combustible materials, and other Class A surfaces to help inhibit the spread of flames and smoke. Will not stain.

Fire Extinguisher Cabinets

GRAINGER APPROVED

- For indoor use only
- Clear window allows visibility
- White color

Steel cabinets accommodate most common sizes of fire extinguishers and provide easy access in an emergency. Excellent for use in offices, warehouses, etc.

Smoke and Combination Smoke/CO Alarms

Alarm Types: Ionization respond best to fast-raging fires. Photoelectric respond best to slow-smoldering fires. All interconnect units must interface directly with their own brand of interconnectable smoke and carbon monoxide alarms.

SMOKE ALARMS

- Meet UL Standards

Test/Reset button verifies alarm circuitry, alarm activation, and battery function. 85dB horn. Easy installation. Operating temp. range: 40° to 100°F.

Battery-Powered—Provide continuous alarm operations during a power outage. Feature LED power-on indicator, tamperproof locking pin, and low-battery warning.

Interconnectable—Feature power-on and alarm indicators. Latching alarm identifies initiating alarm. Locking mechanisms lock the battery drawer and secure alarm to base, except No. 1XTG8 includes optional locking mechanism that deters removal of unit.

Interconnectable, for the Hearing Impaired—Strobe light flashes distinct patterns for smoke and, if connected to a CO alarm, carbon monoxide. 85dB horn. Features alarm latch for initiating unit and low-battery visual indicator.

- Meets UL 1971 visual signaling requirements

Hardwired Bridge Unit for Wireless Detectors—Add wireless capability to an interconnected system by replacing one wired unit. Helps avoid pulling wires through walls for retrofit and remodel projects.

Wireless—Interconnectable alarms simplify adding detectors to every room in a retrofit/remodel project. 85dB horn. Require Bridge Unit, sold separately.

COMBINATION SMOKE/CO ALARMS

- UL Recognized

Test/Reset button function tests alarm circuitry, alarm activation, and peak level memory. Feature visual indicators for alarm and power-on. 85dB horn. Easy installation. Operating temp.: 40° to 100°F.

Battery-Powered—Provide alarm function during a power outage. Voice warning announces "Fire," "Carbon Monoxide," or "Low Battery."

Interconnectable—Allow multiple alarm signals to be triggered from one source of hazard.

Nos. 1XTH3 and 5MPL0 feature voice that announces "Fire," "Carbon Monoxide," or "Low Battery" warnings when detected. No. 2FTP5 voice warning includes location of danger, and has latching features to indicate initiating alarm and low battery.

INTERCONNECTABLE HEAT ALARMS

- No. 20JK13 meets UL 217 Standard
- No. 2FTN6 meets UL 539 Standard

Designed to give early warning of heat from fire. Alarm sounds before it reaches the fixed temperature rating of 135°F. 85dB horn. Originating alarm and power-on LED indicators.

Nos. 20JK13 and 2FTN6 can be interconnected with smoke alarms. No. 20JK13 operating temp. range: -20° to 100°F.

No. 2FTN6 operating temp. range: 10° to 135°F.

INTERCONNECTABLE STROBE LIGHTS

- Meet UL 1971 Standard

Use with a smoke, heat, or CO alarm to provide a visual warning to the hearing impaired and in quiet/silent areas. Produce separate flash patterns to differentiate smoke/heat and carbon monoxide warnings. LED power-on indicator. Mount to any standard electrical box up to 4" octagonal. Operating temp.: 40° to 100°F.

INTERCONNECTABLE ALARM MODULES

- UL Recognized

Activate auxiliary warning devices such as external bells, sirens, or exhaust fans. Feature one set of form C contacts.

Carbon Monoxide Alarms

- UL 2034 Listed

85dB horn sounds when sensor detects high levels of CO. Select models feature visual alert when alarm needs replacement. Operating temp.: 40° to 100°F.

Battery-Powered CO Alarms—User-friendly detectors have easy-access battery compartments. No. 3YNJ3 has a battery lockout system.

Plug-In CO Alarms—No. 6AJW6 has tamper-resist feature that sounds a constant alarm if unit is unplugged or comes loose from wall outlet. Nos. 2FTN5 and 20JK12 include a 6-ft. extension cord for table or shelf mounting.

Plug-In Combination CO and Explosive Gas Alarm—Unit also detects methane or propane gas. Includes extension cord for table or shelf mounting.

Interconnectable CO Alarms—When interconnected with smoke alarms, Nos. 1XTH1 and 1XTH2 feature two different sounding patterns to differentiate smoke and carbon monoxide warnings. No. 2FTN2 features latching alarm indication and a locking mechanism to prevent theft of battery or unit.

Optional Drywall Anchors	5CGZ7	**5CGZ7**

Smoke Alarm Aid

SAFEAWAKE

SafeAwake Smoke Alarm Aid works in tandem with, and is activated by traditional, audible smoke alarms to improve fire safety for elderly and hard-of-hearing populations. When an alarm sounds, the SafeAwake is triggered to flash a bright light and set off its own loud, low-frequency audible alarm that can be heard by the hearing impaired. It also sets off a motorized bed shaker to wake up slumbering residents. Easy setup makes it an excellent choice for homes, hotels, hospitals, senior residences, and independent and assisted living facilities. With automatic shutoff and restart, turn-on indicator light, test button, and battery backup (batteries included). UL Listed.

Fire Barrier Products

Pillows and Self-Locking Pillows—STI® brand pillows are lightweight and intumescent on all sides. Reinstallable for fast, convenient retrofitting of cables. UL Classified and FM Approved.

3M™ brand self-locking pillows have strips that adhere to each other to make overhead installation easier.

Composite Sheets—Fire-stop large openings through fire-rated walls and floors with multiple penetrations. Anchor sheets to the wall or floor with common tools. Cut to fit irregular shapes. Can fire-stop openings up to 36 sq. ft. STI brand sheets are lightweight for easy handling and fabrication.

Mortar—Use for filling large openings in concrete floors and walls. Nonshrinking; can be poured, pumped, or troweled. Will not crack due to temperature fluctuations. STI brand yields approx. 1250 to 1425 cu. in. 3M brand yields approx. 697 cu. in. UL Classified except No. 4MM45.

Wrap Strips, Duct and Plenum Wrap—Use wrap strips to fire-stop metallic and nonmetallic pipes, insulated pipes, and cable bundles. Duct wrap protects both grease and ventilation ducts. UL Classified except Nos. 1XTJ1 and 3BE40. Plenum wrap protects plastic pipe.

Plugs—Intumescent fire-stop plugs temporarily or permanently seal metallic conduits or conduit sleeves from the inside, through gypsum or concrete/masonry walls. Install with no special tools required. UL Classified.

Pipe Collars—Intumescent devices expand during a fire to help close off plastic pipe that penetrates fire-rated walls and floors. Seal off burning ABS and PVC pipes, both solid and foam core, as well as CPVC, PVDF, and FRPP pipes. 3-hr. fire rating. Nos. 3BE43 and 3BE44 are UL Classified.

Accessories—Mineral Wool Board No. 3BE69 provides high-temperature thermal control and fire resistance. Foil Tape No. 4MM48 and Metal Restraining Collar No. 4MM49 are for use with STI brand wrap strips. Use No. 4MM48 for tuck-in installation; for external mounting, use No. 4MM49.

Packing Material No. 1XRT3 is for use around metallic, nonmetallic, and insulated pipe; UL Classified.

Fire Barrier Products

PENETRATION SEALANTS

Material expands when exposed to heat or fire. Can be applied to vertical or overhead surfaces. Easy installation, cleanup, and disposal. Nonhalogen formula requires no mixing. Paintable, sag-resistant sealants remain flexible.

4-hr. Latex—STI® brand models are FBC compatible and acoustically tested to reduce noise transmission. Versatile LCI commercial-grade formula has fast-acting intumescence that expands up to 10 times for a wide range of applications. SSS industrial-grade multiviscosity formula has 2-stage intumescence for extremely fast expansion.

3M™ brand bonds to concrete, metal, wood, plastic, and cable jacketing. Formula dries tack-free in 10 to 15 min.; paintable after 72 hr. All models are CPVC compatible.

2-hr. Latex—Dries tack-free in 8 to 12 min.; paintable after 72 hr. CPVC compatible.

4-hr. Watertight Silicone—3M™ intumescent sealant adheres to concrete, gypsum, metal, plastic, and wood.

PENETRATION AND JOINT SEALANTS

Latex sealants are resistant to water; they dry without shrinking and will not re-emulsify after drying. Endothermic fillers absorb heat and release water. Silicone sealants are for through penetrations and joints. Low modulus for ±50% movement capabilities. Ozone- and UV-resistant. CPVC compatible.

JOINT SEALANTS AND SPRAYS

For sealing fire-rated joints. Water-based sealants are highly elastomeric and easily installed. Sprays can be applied with conventional airless spray equipment and have acoustic properties to reduce noise transmission.

PUTTY, PUTTY PADS, AND PUTTY STICKS

Flexible putty has intumescent and endothermic properties and molds easily into penetrations. Pads provide easy application to electrical boxes or other penetrations. Putty sticks stay pliable to allow easy access for cable mining at a later time.

SMOKE AND ACOUSTICAL CAULK AND SPRAY

Use halogen- and solvent-free material for sealing through penetrations in smoke-rated walls. Flexible.

RESIDENTIAL FIRE BLOCK

Halogen-free sealant resists high temperatures, has minimal shrinkage, and will not sag or run in vertical or overhead applications. Tack-free in 15 min.

FIRE BLOCK FOAM

Foam-in-place fire block and draft stop for nonrated residential and commercial construction. Helps seal, fill, insulate, and bond. Also helps reduce air infiltration. Bonds to concrete, brick, metal, wood, plastic, and cable jacketing.

FIRE BARRIER FOAM AND DISPENSING GUNS

1-step foam is a convenient alternative to 2-part epoxy, mineral wool, or bricks. Expands at a consistent pace in horizontal and vertical applications. Dispensing guns offered separately. Battery-powered cordless gun includes charger, lithium-ion battery, and soft-sided bag. Dispenses up to 60 cartridges per charge.

FIRESTOP 3M

Fire Barrier Products

Cable Pass-Through Devices and Brackets—Intumescent material expands rapidly when exposed to fire or high heat to quickly seal pathways. STI® EZ Path® devices eliminate the need to remove and reinstall or adjust fire-stop materials. Nos. 6LE11 and 3BE71 include the EZ Path device and 1 set of wall plates and labels. Nos. 53XH82 and 53XH83 are UL and C-UL Classified. 3M™ pass-through device is hinged for easy retrofit installation around cables.

Cable Grommets—Eliminate the need for putty or sealant. 2-pc. polymer grommets snap together for easy installation. UL and C-UL Classified.

Sleeve Kits—Ready-to-install kits include sleeves, brackets, screws, and putty. Nos. 5GUZ6 and 5GUZ7 are UL Classified.

STROBE LIGHTS

Streamline® Low-Profile—Use on control panels, forklifts, and other flat or flush surfaces where space is limited. 7000-hr. lamps: 65 to 95 fpm; 4000-hr. lamps: 80 fpm. NEMA 4X, except Nos. 5WF84 and 5WF85 are NEMA 3R.

Electraflash®—Use on maintenance vehicles or material handling equipment. 80 fpm. NEMA 3R.

Fireball®—Vibration-resistant light provides a superior visual signal in high noise industrial environments. 90 fpm. NEMA 4X.

Starfire®—Intense double-flash for use in a variety of emergency warning applications. 80 fpm. NEMA 3R.

REVOLVING LIGHTS

Electraray®—Designed to be easily accessed for quick inspection and replacement. 90 fpm. NEMA 4X.

Commander® LED—Heavy-duty lights employ a reflector-focused 12-LED array to produce a high-intensity beam that rotates 360°. NEMA 4X.

STEADY BURN LED LIGHTS

StreamLine® Low Profile—For a variety of applications where space is limited. NEMA 4X.

WARNING LIGHT WALL-MOUNT KIT

Includes bracket, plate, and mounting screws. Suitable for NEMA 3R applications.

VEHICULAR WARNING LIGHTS

851 Series—For harsh environments. Feature open-style aluminum base with built-in high/low double flash.

Firebolt™—Economical light with replaceable strobe tube. Available in single-flash (Nos. 3TDR1 and 3TDR2) or double-flash (Nos. 3TDR3 and 3NRP2). Magnetic-mount models Nos. 3TDR2 and 3NRP2 include 10-ft. power cord with plug adapter. 60 fpm.

SOUND SEAL
CONTROLLING NOISE IN EVERY ENVIRONMENT

Noise Absorbers

- Meet ASTM E84 Class I Fire Rating

Eliminate noise and echo in industrial and community environments.

Wall Blanket—Abrasion-resistant fiberglass blanket has one quilted side and is impervious to dirt, grease, and solvents. Mounts on walls, ceilings, or anywhere with hard reflective surfaces. Edges are sewn and finished. Also has 4 grommets for easy installation.

Portable Screen—Use portable screen individually or in groups to form partial noise enclosures. Powder-coated tubular steel frame with a reinforced vinyl barrier and absorber curtain.

Perforated Steel Panels—22-ga. powder-coated panel encases a 3-lb. density fiberglass core. Built-in mounting brackets. Panels mount on walls, ceilings, partitions, or other flat surfaces.

Overhead Sound Baffle—Standard economy baffle has a smooth casing.

Acoustical Ceiling Tiles—Designed to replace existing grid ceiling tiles. Perforated metal tiles fit into existing support grid and have a powder-coated finish.

Decorative Fabric Panels—Ready-to-mount panels feature fabric-covered 6- to 7-lb. density fiberglass core that provides maximum noise absorption. Mount easily to walls, partitions, or any flat surface.

Convoluted Foam Sheet

Flat K-Foam

Quilted Absorber Roll

SOUND SEAL
CONTROLLING NOISE IN EVERY ENVIRONMENT

Acoustic Foam Sheets and Quilted Absorber Rolls

Can be easily cut into custom sizes and applied to most surfaces.

Convoluted Foam Sheets—1.5-lb. density, open-cell cone-shape polyurethane foam. Provide greater absorption to surface areas than flat foam. Ideal for low- to mid-range frequency sound absorption. Resist oil, alkali, and mild acids. Not for use near open flame or sparks. Temp. range: -45° to 250°F.

Flat K-Foam Roll—2-lb. density, open-cell flat polyurethane foam provides excellent absorption over a broad frequency range. Not for use near open flame or sparks. Aluminized Mylar®-faced roll is impervious to water, dust, and oils, and is cleanable. Resistant to moisture and lubricants. Temp. range: -20° to 120°F.

Quilted Absorber Rolls—Face side is abrasion-resistant and impervious to water, dust, oils, grease, and most solvents. Rolls easily attach to walls or other surfaces. Temp. range: -30° to 250°F. No. 1VDL9 is used for most broadband noise problems, and No. 1VDP5 is for noise levels higher in low-frequency bands.

NOTRAX MATS FOR PROFESSIONAL USE

Indoor Carpet Entrance Runners

Ideal for handling medium traffic at large entrances in offices, office buildings, and hotels, this attractive, color-coordinated runner combines three functional mats into one design. The first zone features a looped, nonabsorbent yarn to scrape debris and moisture from foot traffic. The second zone combines looped scraper yarns with absorbent looped pile to begin the drying process. The third zone consists of looped pile to complete the drying function. Nonslip vinyl backing. Beveled edges minimize tripping.

Indoor Carpet Entrance Mats

NOTRAX MATS FOR PROFESSIONAL USE

Combine mats for a complete, zoned entrance matting system that protects floors and reduces slip hazard by removing dirt, debris, and moisture from footwear. Rubber-backed mats have cleated backing to reduce mat movement, and molded beveled edging that creates a retention dam to trap moisture. Vinyl-backed mats reduce mat movement, and have beveled edges to help minimize tripping.

HEAVY-TRAFFIC

Barrier Rib™—Durable, antimicrobial, 26-oz. crush-resistant mat has a molded dual-ridge/cross-rib pattern and carpeted beveled edges for maximum scraping and debris. 3/8" thick. Model #161.

Arrow Trax™—Chevron design offers extreme functionality and attractiveness, providing nondirectional scraping and moisture retention. 38 oz. of needle-punched yarn per sq. yd. 3/8" thick. Model #118.

Estes™—High/low, dense-tufted 33-oz. berber provides excellent water retention. 3/8" thick. Model #132.

Uptown™—High/low, looped-pile, upscale carpet retains moisture with 40 oz. of tufted, crush-resistant Decalon® yarn per square yd. 3/8" thick. Model #138.

MEDIUM- TO HEAVY-TRAFFIC

Guzzler™—High/low, crushproof waffle design and rubber-edged perimeter provide superior water and soil control, with a low profile to fit under narrow clearances. 26 oz. of yarn per sq. yd. 3/8" thick. Model #166.

Portrait™—Tri-rib, high/low parquet design provides nondirectional scraping as traffic passes from all directions. Low profile is good for narrow-clearances. 26 oz. of yarn per sq. yd. 3/8" thick. Model #167.

Dante™—Densely tufted cut-pile Decalon® construction features 24 oz. of tufted yarn per square yard. 3/8" thick. Model #131.

Heritage Rib®—Heavier-weight, double-rib high/low design provides extra moisture retention and scraping action. 24 oz. of needle-punched yarn per sq. yd. 3/8" thick. Model #117.

LIGHT- TO MEDIUM-TRAFFIC

Sabre™—Cut-pile carpet mat offers good moisture and grime retention. 19 oz. of colorfast Decalon yarn affords functional service and easy cleanup. 5/16" thick. Model #130.

TRAX MATS FOR PROFESSIONAL USE

Wet-Area Antifatigue Matting

Matting for harsh, wet work environments. Beveled edges minimize tripping.

PVC

PVC vinyl construction is resistant to industrial chemicals, cutting fluids, oils, and greases.

Diamond Flex-Lok™—High-performance floor drainage tiles and ramps combine durability with ergonomic support and comfort. 1" thick. Model #620.

NITRILE/PVC BLEND

Closed-cell foam blend is highly resistant to greases, oils, and animal and vegetable fats—great for areas with occasional overspray and dripping.

Superfoam® with Perforations—Lightweight, easy-to-handle comfort mat has drainage holes for liquid drainage and easy debris removal. ⅝" thick. Model #T17P.

RUBBER

Resilient, grease-resistant compound relieves leg and back discomfort and withstands harsh industrial chemicals and oils. Offers long service life.

Sanitop®—Raised perimeter around large drainage ports adds to ergonomic flex. Lightweight mats are easy to move for cleaning. ½" thick. Model #562.

Niru® Versa Runner™—Slip-resistant mats have large drainage slots. Knobbed traction provides extra safety, and a reversible ribbed underside extends service life. ⅜" thick. Model #755.

VINYL

Solid PVC vinyl is highly resistant to industrial chemicals and provides outstanding relief from fatigue.

Cushion-Lok™—Mat features permanently affixed safety yellow vinyl borders on three sides. Raised broken diamond design around drain ports facilitates drainage. Diamond design on ramp edges maximizes traction. ⅞" thick. Model #520.

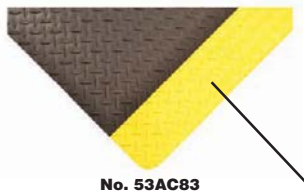
TRAX® MATS FOR PROFESSIONAL USE

Dry-Area Antifatigue Matting

Diamond-Plate Runner—Diamond-embossed top surface and 100% recycled vinyl compound offer nondirectional traction. Low profile allows for easy on/off cart traffic. ½" thick. Model #737.

Diamond Poly Max—Economical mat features heavy-duty PVC top surface bonded to 1" sponge backing to relieve leg and back discomfort. Durable diamond surface is easy to clean. 1" thick. Model #519.

Ergo Trax®—Durable PVC diamond-plate surface is bonded to a rubber sponge backing to provide antifatigue properties. 9/16" thick. Model #485.



Ergo Trax® Grande—Durable PVC diamond-plate surface is bonded to a rubber sponge backing to provide antifatigue properties. 1" thick. Model #985.

Grit Trax™—Has the same quality features as Ergo Trax®, but with a grit surface that provides excellent slip protection in addition to antifatigue properties. 9/16" thick. Model #486.

Low-profile design allows for easy on/off cart traffic

TRAX® MATS FOR PROFESSIONAL USE

Light- to Medium-Traffic Dry-Area Antifatigue Matting

LIGHT-TRAFFIC VINYL

Dense, closed-cell vinyl sponge construction offers exceptional comfort, helping to relieve back and leg strain. Easy to clean. Beveled edges on all 4 sides of mat minimize tripping.

Airug®—Low-profile corrugated top surface provides directional traction. Offers basic fatigue relief and floor protection. 3/8" thick, except No. 4LNJ1 is 5/8" thick. Model #410.

Pebble Step Sof-Tred™—Pebble-embossed, nondirectional top surface is enhanced with abrasion-resistant Dyna-Shield® protective barrier to extend service life. 3/8" thick. Model #415.

Diamond Sof-Tred™—Exclusive Dyna-Shield-enhanced top surface resists abrasion. Diamond pattern for extra traction. ½" thick. Model #419.

Bubble Sof-Tred™—Bubble-top pattern enhances traction and is easy to clean. Dyna-Shield top surface maximizes service life. ½" thick. Model #417.

MEDIUM-TRAFFIC RUBBER

Comfort-Eze™—Solid rubber construction is remarkably long-lasting. Raised bubble design on top and bottom facilitates comfortable movement and allows increased airiflow, boosting the ergonomic effect. Beveled edges minimize tripping. 3/8" thick. Model #447.

MEDIUM-TRAFFIC NITRILE/PVC BLEND

Superfoam®—Lightweight, textured, closed-cell PVC nitrile foam resists grease, oil, and animal and vegetable fat. Black color. 5/8" thick. Model #T17.

TRAX MATS FOR PROFESSIONAL USE

Heavy-Traffic Dry-Area Antifatigue Matting

Long-wearing top surface is fused to a sponge base using the exclusive UniFusion™ bonding process, which creates a virtually unbreakable bond. Red Stop™ backing eliminates mat movement without any tacky or sticky residue. Mats provide higher fatigue relief in the harshest dry work environments. All four sides feature a beveled edge to minimize tripping.

VINYL

Vinyl top surfaces are made with 100% recycled materials, are long wearing, and hold up to mild chemicals.

Cushion Trax®—Diamond deck-plate top surface helps protect against slips and falls. 9/16" thick. Model #479.

Cushion Trax® Ultra™—Ultra has the same quality as Cushion Trax. Mats are are thicker to provide additional support. ¾" thick. Model #975.

Saddle Trax™—With the same features as Cushion Trax mats, but also thicker to provide a greater level of support. 1" thick. Model #979.

Bubble Trax™—High-performance floor mat has a bubble-top surface design that provides ergonomic comfort and durability. ¾" thick. Model #482.

RUBBER

Rubber top surfaces are durable and provide ultimate traction.

Ergo Mat™—High-profile, corrugated-rubber top surface helps protect against slips and falls. This design provides extra comfort, channels away any incidental spillage, and facilitates repetitive, pivotal movement. ½" thick. Model #474.

Pebble Trax®—Deep pebble-embossed rubber top surface provides sure footing. Resists incidental damage from welding sparks and solders. ½" thick. Model #480.

Dura Trax™—Diamond deck-plate top surface bonded to a dense sponge backing provides comfort and durability. Holds up to welding sparks and solders. 9/16" thick. Model #490.

- **NFSI Certified**

DuraTrax Ultra™ and Dura Trax Grande™—Thicker versions of DuraTrax have the same quality features plus additional support. Ultra is ¾" thick. Model #976. Grande is 1" thick. Model #990.

Marble Sof-Tyle™—A smooth rubber antimicrobial top surface embedded with a marbleized pattern offers an attractive appearance and a durable surface. ½" thick. Model #470.

Ergo Mat™ Grande™—Rubber corrugated ribbed top surface provides directional traction to reduce slips, and offers superior antifatigue support. Nonslip backing eliminates the slipping and sliding of floor mats on smooth surface flooring. 1" thick. Model #974.

Marble Sof-Tyle™ Grande™—Has the same quality features as Marble Sof-Tyle mats and is thicker to provide additional support. 1" thick. Model #970.

Interlocking Antifatigue Mats

- 1" thick

100% recycled PVC matting helps reduce fatigue with an underside structure that distributes weight evenly, and an uneven top surface that encourages sway to help improve blood flow. Modular sections quickly snap together and can be configured and reconfigured to fit just about any space. Use drainage mats in wet areas. Mat Edging can be used with all mats.

TRAX MATS FOR PROFESSIONAL USE

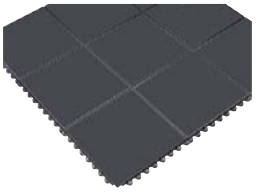
Interlocking Antifatigue Mats

Snap-together units can be assembled in a variety of configurations to suit your needs. Use drainage mats in wet areas; use solid-top mats in dry areas.

CUSHION-EASE®

Mats interlock on all four sides and are easily reconfigured. Beveled ramps (sold separately) are made from 100% nitrile and are grease-resistant.

Standard—Mats are made from SBR rubber for excellent fatigue relief. No. 6MRU5 has a bubble top for extra comfort.



Niru® GSII™—Mat is molded from a 100% nitrile rubber compound. A silicon carbide grit surface provides abrasion resistance and slip protection.

DIAMOND TOP INTERLOCK™

Solid rubber top surface has a diamond deck-plate pattern. Molded air pockets on the bottom offer traction and buoyancy. Available as a single mat, or as interlocking sections to create a longer-length matting system. For use in dry environments.

Nonconductive and Antistatic Matting

NONCONDUCTIVE

Vinyl compound insulates worker, preventing electrical shock. Each square foot of matting is tested in conformance with ANSI/ASTM D-178-01 Specifications. Recommended max. usage is 17,000V, Class 2 dielectric strength of 30,000V.

Diamond-Plate Switchboard— Diamond deck plate pattern top surface provides optimum traction and is easy to sweep clean. Yellow borders promote safety awareness. 3/16" thick. Model #831.

Switchboard—High-profile corrugated top surfaces enhance traction. Rib design facilitates repetitive pivotal movement. 1/4" thick. Model #830.

ANTISTATIC

Engineered to absorb and retain static electricity, these mats are essential for safeguarding sensitive equipment. All four sides are beveled to minimize tripping.

Diamond Stat™—Diamond-deck-plate vinyl top surface is uniwelded to vinyl sponge base to provide maximum fatigue relief. Red Stop backing stops mat movement without any tacky or sticky residue. Attached grounding cord for extra protection. 9/16" thick. Model #826.

Military Switchboard—Durable, fire-retardant, and electrically insulating floor mats are approved for use in military applications. Made of a nonconductive vinyl compound designed to provide insulation that prevents the worker from being grounded, thereby eliminating the possibility of electrical shock. Meets MIL-DTL 15562G Specification. Model #835.

Rubber Diamond-Plate Mats

High-performance, antifatigue floor mats each combine a rubber top surface with a dense sponge backing for comfort and durability in industrial environments. The rubber top layer offers a soft and comfortable work surface. The diamond-plate design offers enhanced slip resistance and is easy to sweep or mop clean. Safe for use in welding applications. Rubber Diamond Mats are 9/16" thick, Diamond-Plate Plus are 1" thick.

Drainage Runners and Work Station Mats

100% nitrile rubber compound provides a high degree of resistance to many industrial chemicals, greases, oils, and animal fats. Low-profile design allows carts to roll over the matting with ease. The ribbed underside adds comfort and channels liquids away from the work area, making mats suitable for industrial and food service applications. Antimicrobial matting inhibits the growth of bacteria and fungi. 3/8" thick. Drainage runners create a slip-resistant work surface. Work station mats are designed for safety and traction.

Reversible Rubber Mats

Antifatigue workstation mats feature static-dissipative properties. Lightweight design allows the mats to be moved routinely for cleaning. Reversible for longer life. Drainage system facilitates the removal of liquids and debris from work areas, while molded-in beveled edges reduce trip hazards when stepping on and off of the mats. Aggressive textured top surface design provides additional traction in wet or greasy areas.

SANI-TRAX MATS FOR PROFESSIONAL USE

Sani-Trax® Plus Mats

Entrance disinfectant mats clean and sanitize shoes at entrances to sensitive areas such as food processing plants or laboratories. Thick rubber borders allow the mats to hold disinfectant solution and immerse the soles of shoes as foot traffic passes. Flexible fingers bend to immerse soles, while also providing automatic scrubbing action to dislodge contaminants from footwear. Mats resist most chemicals and variations in temperature. Suction cups on the underside of the mats keep them in place. Model #351.

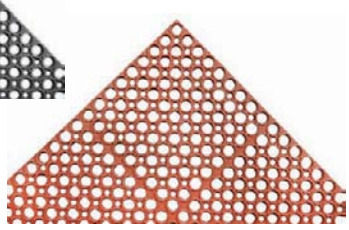
Condor



High-Tack Mats and Bases

Remove dust, dirt, and bacteria from shoes, casters, and wheels. Adhesive vinyl backing prevents shifting and allows mats to be removed without leaving residue. Each mat contains 30 disposable sheets that hold particulate matter on contact. Sheets are numbered to help identify remaining quantity. Can be used with optional bases or directly on smooth, clean floors.

TRAX MATS FOR PROFESSIONAL USE

Tek-Tough® Drainage Mats

- 7/8" thick

Mats each have a series of holes with raised edges that provide traction and slip-resistance in wet and greasy areas while removing liquid and debris from footwear. They also help to reduce fatigue from standing for long periods of time. Red mats are made with 100% heavy-duty nitrile rubber compounds that resist grease and oil.

Industrial Antislip Nosings, Rung Covers, and Decks

Maintenance-free, easy-to-install products are engineered for industrial environments, offering maximum antislip properties and long service life. They feature steel construction with silicon carbide aggregate. Safety yellow color for visibility.

Stair Nosings—Grit-coated nosings reprofile the leading edge of stairs, increase the shoe contact area, and guard against slip hazards from weather or fluid spills.

Ladder Rung Covers—Epoxy-finish, grit-coated covers help reduce slipping risk by increasing friction and providing a larger surface for foot contact.

Metal Decks—Grit-coated deck plates provide traction and slip protection on metal grates or smooth concrete floors.

Nonslip Tape, Strips, and Stair Treads

▶SAFETY TAPE

General Purpose, Commercial-Grade—Nonslip tape is recommended for indoor and outdoor stair and walkway applications.

Heavy-Duty Grade—Premium nonslip tape can withstand exposure to oil, diesel fuel, and weather in extreme environments.

Resilient, Medium Grade—Rubberized, textured nonslip tape is recommended for boat trailers, ramps, and ladders.

Mop Friendly—Easy-to-clean tape can handle heavy shoe traffic and frequent mopping.

FLEX TAPE ANTISLIP TAPE STRIPS AND RECTANGLES

Nonabrasive, embossed PVC tape provides grip suitable for bare feet in tub and shower applications. Mop friendly.

Safety-Walk™ Slip-Resistant Tape and Treads

300 Series—Resilient, nonmineral material is suitable for bare feet.

500 Series—Mineral-coated tape with aluminum foil backing conforms to irregular surfaces. Suitable for diamond-grade safety plates, steps, and ladder rungs.

600 Series—General purpose tape has a low-profile design to help reduce tripping hazards. Mineral-coated.

700 Series—Extra-large abrasive mineral particles and high-performance adhesive are suitable for extreme high-traffic areas, even wet or oily ones.

Antislip Marking Tape

Antislip Tape and Treads—Grit-coated polyester with permanent pressure-sensitive adhesive can be used indoors or out. No. 4T628 is suitable for use on steps and in entryways.

Heavy-Duty, Antislip Tape—Great on loading docks, ramps, and other demanding locations, with a deep-textured silicon carbide grit and aggressive adhesive that withstands harsh elements such as oil, fuel, and grease.

Antislip, Glow-in-the Dark Tape—Used for traction on steps and to mark egress pathways. Glows up to 10 hr.

Floor Marking Tape

3M

Series 471—Solid-color tape made of 5.2-mil thick vinyl backing with a rubber adhesive has good solvent resistance and removes cleanly. Conformable dead-stretch properties for straighter lines—great to mask, wrap, or seal many curved or irregular surfaces. Excellent for lane and safety marking.

Series 5702 and 5700—Striped floor marking and safety identification tape calls attention to dangerous work areas as it protects, masks, and seals. 5.4-mil vinyl backing with rubber adhesive resists most common solvents.

ADA Warning Pads

TufTile ULTRATECH INTERNATIONAL, INC.

- TufTile® pads comply with ADAAG/PROW/CA Title 24
- UltraTech pads comply with ADA 49 CFR 37.9

Raised, truncated-dome pads can be felt by the visually impaired with their feet and tapping cane.

TufTile pads are replaceable. Made of UV stabilized, high-impact polymer that is impact-, slip-, and wear-resistant and provides superior color stability and strength.

UltraTech pads are unbreakable, flexible urethane material that conforms to fit dips, slopes, and inclines in sidewalks and intersections.

Wet Set Pads—Pressed into freshly poured concrete. Each includes factory-installed anchors with tamper-resistant stainless steel fasteners.

Surface-Mount Pads—Install quickly and easily onto cured concrete.

TufTile pads feature low-profile design and beveled edges. Include anchors, tamper-resistant stainless steel fasteners, sealant, and a masonry bit.

UltraTech pads include adhesive and anchors.

Public Safety Vests

- Hook-and-loop closure

Highly visible vests are designed for EMS providers. Color-specific markings differentiate between various emergency responders.

No. E4207 is made from a 100% polyester fabric with 1"W high-intensity Reflexite® material and a clear plastic card holder. No. 24Y975 has polyester mesh upper and solid polyester body. No. H6445 is heavy-duty, double-stitched nylon with high-glow ANSI reflective stripes. Create your own positions with this breakaway vest. Vest includes one set of hook-and-loop placards imprinted with different positions, easily changed as the incident expands.

FLAREALERT LED LIGHTING

Red LED
No. H5597

LED Safety Lights

Water-resistant, crush-resistant, reusable flares produce 360° beacons of light that can be seen for miles. The magnetic base lets you elevate the light for better visibility. Require 4 AA batteries, not included except in kits.

0.5W LED light battery life is 40-hr. steady, 140-hr. flash. 1W LED light battery life is 20-hr. steady, 60-hr. flash.

Kit Nos. H5599, H5595, and H5596 include cone adapters that hold 1 or 2 lights vertically and weighted bases to keep lights firmly in place when marking a traffic pattern or landing zone.

PLASTICADE

ADA Pedestrian Barricades

Modular system features 2-pc. linking sections: a rugged polyethylene barricade top and 43-lb. self-weighted base that fit together securely. A straight barrier wall on the pedestrian side reduces tripping hazards. Each assembled section is 40"H x 43"L x 15¼"W, weighs 51 lb., and remains stable in windy conditions. Base has an integrated carrying handle. Assembly is fast and easy, and features a tamper-resistant system to link sections together. The system can be shaped to any layout. ADA Compliant.

Plastic Barricades, A-Frame/P-Cade Legs, and I-Beams

GA GRAINGER APPROVED

- Meet MUTCD and NCHRP 350, except Nos. 3YVX4, 20PF67, 20PF54, 3LUU8, and 1EKT5
- Nos. 13P868 and 13P869 are ADA Compliant to MUTCD

High-Intensity tape provides higher reflectivity than Engineer Grade.

Barricades—Used on highways and municipal roads, or as warning devices around potentially dangerous areas. Feature recessed and replaceable panels. Polypropylene construction. Accommodate flashing barricade lights, sold separately, this page.

Type 1—Single-striped panel has a 12" x 24" reflective top panel and a 4" x 24" nonreflective bottom panel.

Type 2—Two striped reflective panels are 8" x 24" on top and bottom.

Narrow Vertical Barricades—Easy to fold and transport.

Barricade Systems—All-plastic construction. For use in road closure situations where complete coverage is needed.

Type 3—Complete barricade system with three striped reflective panels, Nos. 6FGL0 and 6FGL1 8" x 48" and Nos. 3LWG1 8" x 96".

Barricade Accessories—No. 1EKT5 provides 4-lb. weight to barricade leg. No. 2KCX2 includes 2 arrow panels and hardware to convert a traffic barricade into a directional barricade.

A-Frame and P-Cade Legs—Used to protect workers in work zones and around manholes, and to cordon off restricted areas and parade routes. P-Cade Legs provide a continuous, obstruction-free guidance system. Lower rail will not trap canes. I-Beam is sold separately. An additional I-Beam can be mounted in the lower section of A-Frames for increased visibility. Weighted models include two 5-lb. inserts per leg.

I-Beams—Exterior-grade PVC provides year-round, all-weather durability.

Traffic Cone Accessories

Traffic Cone Bar—1 19/32"-dia. PVC bar includes two rings to lay on top of cones. May be used with any size traffic cone, including 28" or 36" wide-body cones.

Cone Holder and Clip—Holder No. 1EKW2 attaches to vehicle bumper to hold and transport stacked 18" or 28" cones. Steel construction with enamel finish. Clip No. 6FGJ6 attaches barrier tape to cone, to quickly cordon off and secure areas.

Stabilizer Weights—Fit over cones for increased stability.

No. 1EKW2

No. 6FGL4

Traffic Cone Signs—ABS plastic signs easily attach to cones and open top delineators. 11"W x 13"H.

Reflective Cone Collar Kit—Vinyl collar slips over 28" cone. Kit includes three of each 4" and 6" cone collars.

Portable Traffic Cone Cart—Heavy-duty dolly easily transports traffic cones. Durable and stable construction.

Safety and Security Mirror Selection Information

Choose a mirror with the lens and backing that suits your application.

MIRROR LENS

Acrylic: Lightweight, strong, and shatter-resistant. 20% brighter than glass.

Glass: Easiest to clean, highest reflectivity.

Polycarbonate: Strong, virtually unbreakable, and shatter-resistant.

Scratch-Resistant Acrylic: Special coating keeps surface smooth and resistant to scratching.

Stainless Steel: Highest corrosion resistance and superior strength.

MIRROR BACKINGS

Galvanized Steel: Weather-resistant. For indoor and outdoor use.

Hardboard: Strong. For indoor or covered outdoor use.

Plastic: Lightweight. For indoor or covered outdoor use.

Stainless Steel: Impact- and corrosion-resistant for extreme conditions.

Zinc: Chemical- and weather-resistant. For indoor and outdoor use.

Roll-Up and Rigid Sign Stands

In-Ground—Constructed of heavy-duty galvanized steel. Cross piece at bottom enables pushing into the ground by foot. Includes steel spring clips for a secure hold.

Stacker™—Wide 1-pc. rubber base with drop-in sign attachment provides wind stability. Stackable for bulk storage and transport.

DynaLite™—Four aluminum legs with extensions create an X footprint. Legs adjust for uneven terrain. Positive locking sign attachment.

DynaFlex™—Displays signs 12" off the ground. Heavy-duty springs provide stability in windy conditions.

UniFlex™—For long-term display in all weather conditions, including wind. Vertical spring prevents overturns. Adjustable aluminum legs with extensions provide a wide base. Sign locks into place. Kick-release legs.

Tripod—Three 1"-dia., orange powder-coated galvanized steel tubular legs deploy easily. No. 1UBP1 is for low- to medium-wind conditions. No. 23J508 is a heavy-duty sign stand with telescoping mast and flag holders.

TwinFlex™—Heavy-duty steel coil springs for stability in windy conditions. Foot-actuated leg releases with 2 locking positions for stability on uneven surfaces. Steel and aluminum construction.

Round Sign Posts

Steel Posts—High-tensile galvanized steel finished with zinc and acrylic to resist corrosion.

Portable Posts—Cast-iron with enamel finish. No. 1VC44 holds signs measuring 18" x 18", 24" x 18", or 24" x 24". PVC/rubber posts include breakaway feature. Nos. 1DYJ3 and 1DYJ4 accommodate signs up to 18" x 12" or 24" x 24"; mounting hardware included.

Post with Flexible Spring Base—Polypropylene construction endures collisions. Square base mounts to concrete or asphalt. Includes mounting hardware and post installation kit.

Sign Post Accessories

BREAKAWAY SIGN POST COUPLERS

Quickly repair sign posts. Breakaway couplers withstand winds up to 120 mph.

MANUAL FENCE POST DRIVER AND CAP

Post Driver No. 9ANX7, with solid steel head, drives posts up to 3½" dia. 28¼"L with 19"L handles. Drive Cap No. 3PNJ2 features high-strength alloy steel casting.

SIGN POST ANCHORS

V-Loc® Breakaway anchors mount flush to ground. Reusable after knockdowns.

V-Loc® Breakaway— Anchors mount flush to the ground, eliminating above-ground extensions and reducing tort liability. Reusable after knockdowns.

SIGN MOUNTING HARDWARE

Bracket Assembly No. 1DYJ6 consists of two 48" stainless straps to mount signs.

Tamperproof Hardware No. 4ZH36 prevents sign theft. Set includes 2 bolts, 2 washers, and nuts. For use with U-Channel and L-Square Posts.

Single-Sided Round Bracket Set No. 9FPR4 includes 2 brackets with all necessary bolts and nuts.

Double-Sided Sign Bracket No. 8LV70 secures 2 traffic signs to opposite sides of a round post. Includes all necessary hardware and fasteners.

Street Sign Cross-Piece Bracket No. 3PNG7 provides support for larger street name signs. Includes a set of stainless steel allen set screws.

SIGN POST BASES

Use with U-channel, 2⅜" O.D. round, or 2" square post.

Traffic Signs

- HIP meets MUTCD standards

Signs are available in aluminum and recycled aluminum materials, with engineering grade (EG) or high-intensity prismatic (HIP) reflective sheeting. HIP sheeting provides higher reflectivity than EG sheeting. Recycled signs are made from 90% recycled aluminum (80% postconsumer), which exceeds EPA procurement guidelines and supports LEED certification.

Safety Sign Information

Prevent injuries and reduce downtime with safety and informational signs that put important information at the point of need. Choose from OSHA, ANSI, or blank formats and a variety of materials.

Signs can be customized for your specific needs online at the Grainger Custom Product Center. Go to grainger.com/content/custom-product-center.

COMPLIANCE

OSHA 1910.145 and ANSI Z535 require that safety signs be used to identify and define specific hazards that, without identification, could lead to property damage or accidental injury of workers and/or the public.

MATERIAL TYPES

(A)-Aluminum—Abrasion- and chemical-resistant. For indoor and outdoor use.

(F)-Fiberglass—Longest-lasting material. Great for outdoors or harsh environments.

(P)-Plastic—Signs have a clear protective coat; recommended for temporary or light use.

(S)-Self-Adhesive Vinyl—Signs are high-gloss, durable, flexible vinyl suited for indoor/outdoor use.

Glow-in-the-Dark—Illuminating material absorbs light and is immediately visible in the event of a power outage.

Caution Signs

Condor

Signs identify potential hazards that may result in severe but not irreversible damage or injury. Available in (A) aluminum, (F) fiberglass, (P) plastic, and (S) self-adhesive polyester.

Note: Signs are arranged alphabetically by header, and then by lower legend text.

Emergency Light Stations

CYALUME Technologies

Help provide dependable light during power outages. Designed to hold 10" yellow SnapLight® light sticks that glow for 4 hr. and are visible up to 1 mi. in fog or smoke. Photoluminescent label on front cover helps to locate station. Wall mountable.

LightStation® Models 4 and 10—Blast- and fire-resistant case. All SnapLight® sticks stored in a station are activated when the front cover is pulled open. Ideal for small spaces.

LightStation® Model 20—Heavy-duty molded plastic case. 1 SnapLight® stick stored in a station is activated when the front cover is pulled open. Ideal for large common areas.

Recycled Danger Signs

Danger signs indicate an immediate hazard capable of producing death or irreversible damage or injury. Available in three recycled materials: (A) Aluminum, (P) Plastic, or (S) Self-Adhesive Polystyrene. All products support LEED certification. Aluminum and plastic materials are UL-E validated as made from 70% (A) or 90% (P) postconsumer recycled content.

Note: Signs are arranged alphabetically by header, and then by lower legend text.

Hi-Visibility Dimensional Facility Safety Signs

Condor

High-impact plastic signs have messages on both sides to help personnel and emergency responders quickly find the way out or locate equipment. V-shape signs project at a 45° angle, L-shape signs at a 90° angle. Flanged edges have predrilled holes for mounting to walls and columns.

Note: Signs are arranged alphabetically by legend text.

Neo4 and VnM®4 Label and Sign Printers

Fast, easy-to-use, stand-alone label and sign makers with built-in templates help you produce a variety of informational, regulatory, standard, and custom compliant safety message signs. They need no computer to produce a wide variety of labels and signs. Expand your choices with No. 36UT94 computer-based VnM Label Direct Software, sold separately. A separate GHS Software Package is available as a free download from vnmsignmaker.com.

Include four 25-ft. rolls of starter tapes and a black starter ink roll.

Neo4 Label and Sign Printer—Creates shelf and floor labels quick and easy. Cost-effective thermal transfer printer prints and cuts 1" to 4"W signs, labels, and bar codes for facilities with low-to-medium usage requirements. Great for keeping safety compliant when printing OSHA/ANSI or 5S signs and labels. UL Listed.

Cobra Systems, Inc.

VnM®4 Desktop Label Maker—Fast and easy-to-use, PC-free thermal transfer printer prints 5" per sec. Prints 1" to 4"W safety labels on demand from 8 standard templates, including HazCom, facility, pipe markers, and bar codes. Delivers fade-resistant labels and signs for GHS (Globally Harmonized System). Use alone or with a PC. UL Listed.

VnM Label Direct PC Software—Design, print, and save your most-used labels with this Windows® computer software for the Neo4, VnM4, and VnM8 label and sign makers. Reinforce messages and your branding with important safety symbols and images. Use database connectivity to boost larger label runs.

Industrial Label/Sign Makers and Accessories

BRADY

Benchtop sign and label printers feature a smart chip that automatically sets up labels, eliminating calibration steps, and reducing label waste. Easy material changeover: drop in cartridge, lock it, and start typing. USB and Ethernet connectivity to Windows® computers. 5-yr. manufacturer's warranty.

BBP®30—Provides an ideal solution for single color printing applications like pipe marking and shelf/bin labeling. Uses easy-to-load tapes and labels; ribbon cartridges snap into place and can't be installed incorrectly. Supports continuous and die-cut labels. Includes power cord, USB cable, quick-start guide, and cleaning kit.

BBP®31—A large touch-screen display allows drag-and-drop moving and sizing. Use as a stand-alone unit or connected to a PC. Works with MarkWare software. Includes a template library of 266 "pick and print" signs and labels and 192 built-in graphics, with ability to import more graphics and fonts.

BBP®33—Connects to a PC for setups. Select units include LabelMark™ labeling software for wire and data comm ID and ADM labeling; others include MarkWare software.

BBP®35 and BBP®37 Printers—Fast multicolor printer/cutters produce highly noticeable and memorable signs and labels for a wide variety of safety, facility, and productivity uses. Intuitive operation is great for multiple users, centralized locations, and Lean/5S events. They feature built-in label wizards, text formatting options, symbols, and special characters. Add multiple barcode symbologies, including QR, with the Brady Workstation app. BBP37 model adds an XY cutter for text and irregular shapes.

BBP®85 Sign and Label Printer

The large-format printer features intuitive touch-screen controls to let almost anyone create colorful, extra-large signs, labels, and warnings with minimal training. It makes signs and labels from 4" to 10"W, and banners up to 16-ft. long. 5-yr. manufacturer's warranty.

The BBP85 can be used as a stand-alone printer, or connect it to a Windows® PC with included USB cord and use the time-saving MarkWare®, MarkWare Lean Tools, or Brady Workstation software. MarkWare, available on Grainger.com®, features preformatted label layouts, preworded hazard statements, approved GHS/CLP symbols, data import capability, and prompts to enter your data. MarkWare Lean Tools—included with the BBP85 in all Kits on this page—supports visual workplace implementations employing 5S, total productive maintenance (TPM), standard work, or Kanban. Brady Workstation software is available as a free download from workstation.bradyid.com, along with purpose-specific free and paid apps. Simply enter information in your selected Brady Workstation app to produce compliant—or custom—signs and labels to print on the BBP85. Some apps save data for reuse. Printer includes a cleaning kit, documentation CD, print driver CD, Quick-Start guide, USB cable, and power cable.

Snap-On and Strap-On Pipe Markers Help Identify Pipes in Almost Any Condition

Grainger can help you effectively communicate the contents of pipes with 360° visibility. Coiled plastic snap-on markers and flat plastic strap-on markers with nylon straps may be applied to dirty, oily, greasy, or rough surfaces. Meet ANSI A13.1 Standards. For additional pipe marking options, go to Grainger.com® and search for "Pipe Markers".

Steel Hand Stamps

Use to permanently mark tools, components, nonmetals, and various metals. Character and size are indicated on the thumb side. Impressions are Gothic letters. For manual (tempered stamping head) or mechanical use.

Letter sets contain 27 stamps: A to Z and an ampersand (&) symbol. Number sets include 9 stamps: 0 to 8 with 6 also serving as a 9.

Combo sets contain a complete set of both letters and numbers and are packed in a plastic case.

General-Purpose—For medium- and light-duty marking. Can be applied on soft and hard metals without heat treatment.

Heavy-Duty—Designed for deeper marking in industrial applications. Can be applied on soft and hard metals without heat treatment.

Premier Heavy-Duty—Feature larger shanks that require less force and create better impressions in industrial applications. Can be applied on soft and hard metals without heat treatment.

Low-Stress Full Character—Designed for bold characters and light marking on soft metals and nonmetals.

Rhino Series—Largest shanks create excellent marks and require least force. Can be applied on soft and hard metals without heat treatment.

Low-Stress Dot Design—Dot character design is suitable for bold characters and light marking on soft metals and nonmetals.

Cr-V Steel Plate—Deliver professional results and durability. Can imprint metals up to Rockwell C58 to C62 hardness.

C.H. HANSON Since 1900 • Tools For Generations

Steel Letter and Numbers Hand Stamps

Use with a handheld hammer to permanently mark tools, components, locks, and various metals. Impressions are Gothic letters. Character and size are indicated on the thumb side. Each contains a complete set of letters and numbers, packed in a steel index box that can fit into tool boxes.

Standard are cost-effective stamps for general purpose use.

Premier stamps have large, tempered shanks to help provide extra safety under continuous hard hammering.

Reverse stamps provide raised markings on thin metal or forging dies, or in embossing and mold applications.

Low-Stress designs produce minimum stress on marked metal. Meet U.S. DOE Nuclear Energy Standard RDT F 7-3T.

YOUNG BROS. STAMP WORKS, INC. Since 1900

No. 18G326

Hand Stamps

- Steel construction
- Rockwell hardness: 50C

Make permanent marks on durable materials, including wood and many metals. Excellent for labeling tools, keys, machine components, and more.

Machine-Made—Economical, general purpose stamps provide deep, clear impressions. One thumb groove. Letter sets contain 27 pieces: A to Z and a period. Number sets contain 9 pieces: 0 to 8. Combo sets contain 36 pieces: A to Z and 0 to 8.

Specialty—Locksmith-specific stamps each contain standard messaging identifying keys as "Master," or instructing to "Do Not Copy" or "Do Not Duplicate".

Symbols—Heavy-duty set includes commonly used symbols. All contain 5 pieces: arrow, plus sign, star, asterisk, and pound sign.

Stamp Holder, Holds Shanks Up to 7/8" Square	18G259

Stencils

Easy-to-use stencils provide clear and legible warnings, precautions, and signs. Can be used with a variety of spray or brush-on paint.

BRASS ADJUSTABLE

Characters interlock by sliding adjacent grooves together. Easy to disassemble.

13-Pc. Number Kits—Include: one each of 0 to 9, beginner and period characters, and plain ender.

15-Pc. Number Kits—Include: one each of numbers 0 to 9, two large spacers, one dash, and one period.

33-Pc. Letter Kits—Include: one each of A to Z, ampersand (&) symbol, beginner, comma, dash, period, period ender, and spacer.

46-Pc. Number and Letter Kits—Include: one each of letters A to Z, numbers 0 to 9, comma, dash, and ampersand (&). Also include two each of large spacers, small spacers, and periods.

92-Pc. Number and Letter Kits—Include: four each of letter E; three each of A, I, N, O, S; 1 of Q; two each of remaining letters and ampersand (&) symbol; three each of numbers 1 and 0; two each of 2 to 9. Also one each of beginner, comma, dash, period ender, and plain ender; two periods; and three spacers.

PVC ADJUSTABLE

Characters interlock by sliding adjacent grooves together. Easy to disassemble.

138-Pc. Number and Letter Kits—Letters include six each of A, E, R, and S; three each of all other letters. Numbers include three each of 0 to 9. Also include three each of small spacers, larger spacers, periods, dash, dollar symbols ($), and ampersand symbols (&).

SAFETY LEGENDS

Flexible, PVC stencils are precut for application to numerous surfaces.

PARKING LOT LEGENDS AND SYMBOLS

Flexible stencils are made of high-impact, chemical-resistant plastic.

Handheld Type Holder and Steel Type Kits

Make legible impression of a series of characters with one hammer blow. Use on a wide range of metal surfaces. ⅛" and 3⁄16" holders have 15-character capacity; ¼" holder has 12-character capacity. Letters/numbers/blank spaces must always equal holder's full capacity. Each kit includes 48 individual pieces: letters A to Z (2 each of A, E, R, O, S, I, U, and T), numbers 0 to 9, a dash, and 3 blank spaces.

Safety and Regulatory Compliance Training

DVD kits include DVD program, employee quiz, training certificate, 5 posters, and 30 employee booklets. DVD programs are packaged in a 3-ring binder with instructor's guide, DVD, reproducible scheduling and attendance forms, employee quiz, and training certificate.

General Safety—Provides materials needed to promote and conduct a complete safety meeting.

OSHA and DOT Compliance—Provides materials facilities need to comply with OSHA and DOT regulations.

Construction Safety—Provides important safety and regulatory compliance training depicting activities on actual commercial and residential construction sites.

HAZWOPER—Provides employees with the information the regulation requires them to receive in their training sessions.

Laboratory Safety—Provides lab-specific training showing activities taking place in actual laboratories.

LEARNLAB

Vocational Hands-On Training Panels

These training panels allow students to learn, practice, and develop their job skills through this hands-on process. Each system includes hands-on training panels, student workbooks, printable PDF PowerPoint Presentations, and instructor guidebooks. For the engineering, maintenance, service, and technical fields.

Grainger EH&S Digital Solutions

Get fast, easy solutions to manage, track, and maintain workplace environmental, health and safety activity from your computer. Designed to help reduce injuries, accidents, and associated costs. Tools include:

Learning Management System (LMS) for administering and tracking safety training and documents.

Specialized Online Training courses that meet current safety standards and regulations.

Safety Data Sheet (SDS) Management for site-specific SDS and Globally Harmonized System (GHS) requirements.

Safety Assessment and Compliance Monitoring platform with reports and smart forms for actionable findings and corrective recommendations.

Incident and Inspection Management software that monitors the complete life cycle of all incidents and provides insight into potential incidents.

Occupational Health Tracking of audiometric and pulmonary test data, as well as respirator medical clearance.

Grainger Online Services are provided by Grainger Safety Services Inc., an affiliate of W.W. Grainger Inc.

BRADY

Visual Lockout Procedure Authoring Service

Maintain standards, compliance, and workplace safety with clear, machine-specific lockout/tagout instructions tailored to your facility. This service provides a complete set of the required written shut-down procedures for equipment in your facility.

How It Works

Brady field engineers gather machine-specific information and install color-coded energy tags on power sources at your site. The Type 1 procedures they produce have clear, step-by-step lockout instructions, equipment photos, and energy points, to help ensure employees can correctly and consistently lock out equipment to avoid unexpected electrical energization or startup.

What You Get

A binder of laminated point-of-use procedures, along with digital copies and a standardized template for ongoing updates to maintain compliance with Lockout Tagout Standard 1910.147.

Note: A separate Visual Lockout Procedure Installation Service is available; contact your Grainger Representative for more information.

OSHA's Top 10 Violations

GRAINGER KnowHow®

Last year, OSHA recorded more than 7,000 violations of standard 1926.501, General Requirements for Fall Protection. Do you know what else made the agency's top ten list?

Get an overview of the most frequently cited standards in 2019 to help make sure your safety program is prepared at **grainger.com/know-how/oshatop10**.

BRADY Condor Master Lock

Circuit Breaker Lockouts

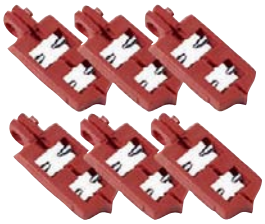
- Padlocks and lockout tags not included

Prevent accidental engagement of electrical circuits during maintenance.

Single-Pole Breaker Lockouts— Used to lock out circuit breakers with a standard toggle switch. Snap-on models work on breakers with holes in the side of the switch. Bar clamp or clamp-on models work on switches with or without holes. Use cleats with clamp-on lockout to assure positive restraint for breakers with long sliding switch throws.

Multipole Breaker Lockouts—For use on common trip circuit breakers that have two or more switches joined by a tie bar. No. 1D671 uses thumbwheel for secure fit on extra-wide range of breaker sizes. No. 3WNZ1 kit includes 1 Lockout Pouch, 1 Multipole Circuit Breaker, 1 No-Hole Circuit Breaker, 277V, 1 No-Hole Circuit Breaker, 480/600V, 1 Single-Pole Circuit Breaker, and 2 Lockout Tags.

Oversized Breaker Lockouts—Fit breaker switches up to 2¼" wide and ⅞" thick.



3-Phase Breaker Lockout—Works on single-, double-, and triple-pole circuit breakers. Fits over switch; no holes required. Tighten with screwdriver (not included) and secure with padlock.

DIN-Style Miniature Breaker Lockouts—Breakers are designed to mount to DIN rails. 3 styles; pin-in, pin-out, and tie bar. All pin-in and pin-out styles are used with single or multipole breakers. Pin-out style comes in standard and wide size. No. 2VU37 is used with multipole breakers that have a tie bar.

Circuit Breaker Lockouts—Properly lock all types of circuit breaker locations. Use No. 2XU96 for breakers that have a hole in the switch tongue. No. 2XU97 is for breakers that do not have a hole in the switch tongue. No. 2CJL3 Flexible Cable Shackle includes steel padlock with 5" steel cable. Numerous key changes minimize key duplication.

Blocking Bar Lockout—Installs to electrical panel in minutes. Use red arm to lock in Off position, or green bar to lock in On position. Includes two 4"L mounting rails, one 7⅜"L red blocking bar, one 7⅜"L green blocking bar, and 3 alcohol wipes.

Electrical Lockout Devices

Universal Plug Lockouts—Accommodate various cord diameters and high- and low-voltage plugs.

Small/Large Plug Lockouts—Devices accept lock or nylon tie to prevent a plug from being inserted in a wall outlet. No. 3VAF2 can be used to lockout pneumatic male fittings attached to compressed air hoses.

Plug Prong Lockouts—Use with existing lockout padlocks or lockout hasps with built-in lock.

Cinch Sack Plug Lockouts—Designed for oversized, awkward, and hard-to-reach connections. Accommodate up to 6 padlocks.

Wall Switch Lockouts—Hinges open for unobstructed operation of switch.

Emergency Stop Safety Covers—Install over push/pull or twist/release emergency stops.

Push-Button Safety Covers—Completely cover button to prevent access.

Cable and Pneumatic Lockouts

Tab- and Grip-Cinching Cable Lockouts—Cable cinches tight to provide better security than chains. No. 3MT22 allows you to squeeze device to tighten cable, then insert your padlock to secure the handle. Nos. 5TA70 and 5TA71 have a built-in loop to keep cable coiled for easy transport and storage.

Retractable Cable Lockouts—Self-winding mechanism automatically cinches the cable with the push of a button.

Adjustable Cable Lockouts—Flexible for use on side-by-side gate valve lockouts or multiple circuit breaker panels at the same time.

Double Looped Cable—Flexible cable lockout is ideal for locking out large valves. Lightweight and an excellent visual deterrent that the isolation point is locked out.

Pneumatic Lockouts—Isolate pneumatic devices without installing in-line lockout valves. No. 2CJN1 works with lockout hasps for multiple worker lockout.

Valve Lockouts

Gate Valve Lockouts—Fit most round-handle gate valves. Nonadherent plastic construction resists chemicals and hot/cold temperatures. Brady models' knockout feature accommodates OS&Y or "rising stem" gate valves.

Adjustable Ball Valve Lockouts—Nos. 3TAP3, 2VU39, 3TAP1, and 3TAP2 can also be used to lock valves open on pipes from ½" to 1¼" dia. No. 4EMY9 lockout is suitable for tight locations near pipes.

Universal Ball Valve Lockout—Pouch-style with strapping and locking mechanism. Design removes handle and conceals valve stem, eliminating reactivation.

Standard Ball Valve Lockouts—Designed for locking out quarter-turn ball valves with flat "dog-leg" handles. 1-pc. devices fit all major brand ball valves.

Universal Valve Lockouts—Single device locks out most ball, butterfly, and gate valves. Industrial-grade steel and nylon construction is chemical- and corrosion-resistant.

Plug Valve Lockouts—Compact and easy to use, effective for difficult-to-secure plug valves. Fit most manually-actuated plug valves. Durable and tamper resistant.

Butterfly Valve Lockouts—Solvent- and chemical-resistant. Resist cracking and abrasion.

Gas Valve Lockouts—Protect against accidental valve opening. No. 2CJN2 fits all pressurized gas valves up to 3" dia. and works with valve guard in place.

BRADY ★ Condor Master Lock

Padlock Lock Boxes, Stations, and Cabinets

- Padlocks sold separately; see page 1955.

Plastic Lock Boxes—Clear acrylic window provides visual check of contents. Wall-mountable with predrilled holes. Nos. 5TB19 and 5TB20 include attached plastic hooks. Nos. 3PDE2 and 5TA68 feature built-in lock rail and snap-in key hooks.

Steel Lock Boxes—Brady® models are tamper-resistant. Master Lock® models are wall-mountable with a stainless steel handle. Lockout message on box is in English, Spanish, and French. All boxes feature a powder-coat finish.

Steel Stations—Plastic-coated 14-ga. steel construction.

Cabinets—Durable PVC cabinets are excellent for office environments. No. 3ZG26 includes pegs for 8 keys. No. 3ZG27 has 20 key hooks. No. 15Y607 is a lockable steel cabinet with 2 keys.

Padlock Caddy—Features ergonomic handle, belt slots, and lanyard for keys. Plastic construction.

Lockout Hasps

- Scissor-action hasps open and close similar to scissors
- Snap-on hasps push open then snap closed with spring-loaded locking arm

Lockout Hasps—Locking holes accommodate most standard lockout padlocks.

Labeled Hasps—Lock out power on line or equipment while displaying tagout message on writable, erasable surface.

Safety Padlocks

GRAINGER APPROVED

- For more lock colors, see Grainger.com®

Plastic Covered Safety Locks, Short and Long Body—Built especially for safety lockout applications. They are completely insulated against electric shocks, offer a high level of heat resistance with aluminum body, and are available in many colors with multilingual warning stickers.

Plastic Covered Safety Locks with Steel Shackle—Designed for safety lockout applications, these locks are completely insulated against electric shocks, and are available in many colors with multilingual warning stickers. Encased aluminum body provides a high level of heat resistance. Steel shackle helps secure devices with smaller diameter holes.

Aluminum Safety Locks—Feature aluminum bodies that are suitable for a wide range of applications and are available in a number of different colors. Lightweight and helps keep the user safe, but does not weigh them down. Hardened steel shackle with enhanced anti-corrosion coating.

Locks come standard with a 6-pin cylinder for maximum key changes.

- **Minimum 70% postconsumer recycled content**

Ecolution™ 74 Series—High recycled content padlocks are spark-resistant and eco-friendly. Dielectric plastic-encased aluminum body and shackle provide extra safety and durability. Locks include trilingual labels for customization. Support LEED building certification.

Laminated Ecolution™ 41 Series—Our laminated steel safety padlocks are suitable for both safety and security purposes. They are made with high-quality recycled steel laminates that are individually coated with a non-hazardous cadmium-free plating, giving the lock an extremely good level of rust resistance. Colored vinyl bumpers are available for easy identification and compliance with OSHA regulations. The perfect safety lock for use in harsh conditions and for added security.

Master Lock AMERICAN LOCK

High-Visibility and Anodized Aluminum Lockout Padlocks

- 5-pin or 6-pin cylinder
- Keyed different or keyed alike, 2 keys per lock
- For custom lock configurations, see Grainger.com®

High-Visibility Powder-Coated— Vibrant colors allow easy lockout customization and identification. Aluminum body and baked-on, powder-coated finish ideal for corrosive environments.

Anodized—Anodized finish, corrosion-resistant 1½"-thick aluminum body with boron alloy shackle makes padlocks ideal for food service facilities and washdown applications.

Safety Lockout Padlocks

- 6-pin key-retaining cylinder (except No. H1700 is 5-pin)
- Keyed different or keyed alike, 1 key per lock
- Danger labels included

Note: For keyed alike or master keying, or for key numbers not listed, call 1-800-GRAINGER (472-4643).

Additional fees may apply.

Zenex™ Thermoplastic— Lightweight, nonconductive, and durable Zenex® thermoplastic padlock body can be customized with permanent write-on labels. Key retaining feature will not release key when lock is open. Ensures padlock is not accidentally left unlocked.

Nonconductive Shackle—Nonmagnetic and nonsparking padlocks are ideal for electrical temperamental environments and confined-space applications. Nonconductive nylon shackle, brass key, and cylinder.

Fiberglass-Reinforced Nylon—Padlocks have nonconductive bodies (Nos. H1705 and H1707 are completely nonconductive). Key retaining system prevents key from being removed until shackle is completely closed. No. H1700 is compact for small spaces.

RecycLock™ Safety Padlocks—High recycled content padlocks are spark-resistant and eco-friendly. Dielectric plastic-encased aluminum body and shackle provide extra safety and durability.

6-pin key-retaining cylinder. Locks include trilingual labels for customization.

- Minimum 70% post-consumer recycled content

Note: Keyed differently locks include 1 key per lock. For keyed-alike products not listed or master keying, call your local branch. Additional fees may apply.

Master Lock

Laminated Steel Padlocks

All padlocks have dual lever-locking shackle mechanism, antidrill hardened bottom plate, and include 2 keys.

MASTER LOCK® COMMERCIAL

Hardened boron and hardened steel shackle provides greater resistance to cutting. Include countersunk rivets to reduce potential for prying and dual bumpers to prevent damage to property. Proprietary rustproofing extends lock life.

BumpStop®—Provide high level for increased security against bump attacks.

Combo Packs—Keyed alike laminated padlocks with random key number assignments. No. 3HUJ5 has two padlocks, 3HUJ4 has three padlocks, and 3HWK7 has four padlocks.

Breakaway Shackle Padlocks

Master Lock

Laminated steel padlocks feature a warded tumbler and a special breakaway shackle for emergency access to sprinkler shut-off valves and fire hose. Shackle is easily broken with a hammer blow. Padlocks are keyed alike and include 2 keys.

No. 1U176

Government Padlocks

AMERICAN LOCK

Meet stringent U.S. Government CID-A-A-59486 and CID-A-A59487 standards, including bump-resistance requirement.

Solid Steel—For added security, all models have hardened steel shackles, 5-pin rekeyable cylinders, and nonremovable keys. Bodies are stamped "US". Zinc-plated. 2 brass keys included.

Solid Brass—Corrosion-resistant brass body stands up to the elements for outdoor use. 5-pin nonrekeyable cylinder. Bodies are stamped "US". Additional NSNs available, call 1-800-GRAINGER (472-4643).

Brass Padlocks

Master Lock · AMERICAN LOCK · GA GRAINGER APPROVED · ABUS Security Tech Germany

- Include 2 keys

Pro Series® Solid Brass—BumpStop® feature stops the transfer of force from the bump key to the pins, preventing rotation of the cylinder so the padlock remains locked. Solid brass body and brass cylinder. Replaceable hardened boron alloy shackle has dual ball-bearing locking mechanism. Rekeyable cylinder provides tens of thousands of key changes.

Solid Brass with Brass Tag—Have a zinc-plated boron shackle and 5-pin cylinder. Include a riveted blank brass tag, which can be field engraved for identification purposes.

GA Solid Brass—Provide value and security. Exclusively from Grainger.

Laminated Brass—Laminated brass body and brass cylinder. Shackle has dual lever-locking mechanism.

Economy Solid Brass—Brass body and cylinder offer corrosion resistance.

High Security Solid Brass—Feature a dimple key with up to 10-pin cylinder with antipick mushroom pins that offer high resistance to picking plus multiple key combinations. Reversible dimple key is easy to insert.

Master Lock. GA GRAINGER APPROVED

High- and Standard-Security Weather-Resistant Padlocks

Covered padlocks withstand harsh weather and corrosive environments. 2 brass keys included. Models with BumpStop® technology stop the transfer of force from the bump key to the pins, preventing rotation of the cylinder so the padlock remains locked.

Pro Series® Iron Shrouded—Shrouded padlocks offer superior resistance to cutting by minimizing shackle exposure.

Weather Tough™ Laminated Steel—Padlocks have chrome rustproofing for strength and longer life. Rekeyable cylinders provide tens of thousands of key changes.

Thermoplastic-Coated Laminated Steel—Padlock protects against moisture, dirt, and grime. Hardened steel shackle has molded cover for superior cut resistance. Non-rekeyable, 4-pin, W1 cylinder offers strong pick resistance.

GA Laminated Steel—Provide value and security. Exclusively from Grainger.

Solid Steel Padlocks

All solid steel padlocks have 5-pin tumblers and include 2 keys. Master Lock® and American Lock® padlocks feature rekeyable Pro Series® cylinders with special spool pin tumblers that are virtually impossible to pick. Nos. 1JAD5 and 1JAD7 have a round body to provide additional cut, saw, and hammer resistance.

GA GRAINGER APPROVED

Shrouded—Provide superior resistance to cutting by minimizing shackle exposure. GA padlocks are key retaining and have stainless steel bodies to provide enhanced corrosion resistance.

BumpStop®—Stops the transfer of force from the bump key to the pins, preventing rotation of the cylinder so the padlock remains locked.

Combination Padlocks

- **Key Override models do not include control keys; order separately this page**

Ideal for storage lockers, combination locks have a reinforced weather-resistant stainless steel outer case and 3-number combination.

Master Lock® High-Security—Boron shackle features dual ball-bearing locking mechanism. Double-armored stainless steel body with fully recessed dial resists knock-off attempts.

GA—Laminated steel, chrome, and stainless steel finished padlocks provide value and security.

Antishim Technology—Master Lock® items feature a unique flat latch technology that blocks shim tools from opening the lock. SmoothSpin™ models feature easy grip-and-turn combination locks with metal bodies and hardened steel shackles. Locks have the same key as traditional combination lock. No. 3HWJ5 uses a combination that is easy to remember and dial; ideal for people with disabilities.

U-Lock, Chain, and Cable Locks

Python™ Adjustable Locking Cables—Patented lock holds cable at any position. Protects portable and construction equipment, trailers, generators, power tools, and ladders. Rust-resistant lock body with bumper.

Cable Locks—Braided steel wires are vinyl coated. Nos. 6JD77, 6JD76, and 6JD75 have integrated locks for added convenience.

Security Cable—Durable braided steel wire cable offers superior strength and flexibility. Looped ends allow use with U-locks or padlocks. Vinyl coated.

U-Lock—Lock has double-locking hardened steel removable shackles and heavy-duty cable and chain. 7-pin tubular cylinders. Vinyl coating helps prevent scratching and is weather-resistant.

Cam Locks

- Keyed different - multiple key codes provided in a nonmaster key system
- Keyed alike - all lock cores are the same key code

A. TUBULAR

Tubular key design makes it more difficult to pick lock or duplicate keys. Use a 7-pin tumbler lock, 90° and 180° unlock radius. Include flat and offset cam. For vending, medical cabinets, HVAC, and other applications.

B. DISC

5-disc lock cylinder includes straight cam and offset reversible cam, 2 keys, and washer and mounting nut. For use on cabinets and access panels.

C. MINI

Have a smaller, ½"-dia. mounting hole. Use for standard key or hand actuated locking.

D. STRAIGHT CAM CABINET

Surface-mount units lock doors and drawers.

Key Ring Clips and Chains

Threaded closure opens and closes with a connector nut. Twist Lock opens into a "figure-8" shape to open and close the ring; a crimper tool closes ring permanently. Socket Lock uses a ball-knob and socket closure to lock ring. Chain on spools can be cut to any length, and couplings connect the chain.

Ilco®

Key Duplicators and Code Cutting Machines

- Key Duplicators create new keys by copying existing keys
- Code Cutting Machines create new keys from coded cards when existing keys are not available for duplication
- Key blanks available; see page 1964.

No. 52HN54 Flash 008 Manual Key Duplicator
- Tool steel cutter

Lightweight, space-saving, and economical. Use where occasional duplication is needed.

No. 52HN53 Manual Key Duplicator
- Titanium-nitride-coated cutter

Designed for cutting popular automotive and commercial cylinder keys, including double-sided types. Wide spacing between vise jaws accommodates longer keys. Depth limit device guards against cutter contact with vise jaws. Ideal for counter or mobile use. Circuit breaker protected.

No. 52HN52 Semi-Automatic Key Duplicator
- Titanium-coated milling cutter

For most residential, padlock, automotive, and double-sided key duplication. Particularly useful when multiple duplicates are needed. Semiautomatic design allows for speed and accuracy. Hardened carriage shaft and cutter spindle provide extended service life. ¼-HP motor allows mobile use. Circuit breaker protected.

No. 1GBB2 Bravo III with EZ Jaw Key Duplicator
- Cobalt steel cutter

Accurately and easily duplicates keys in less than 9 sec., once loaded; ideal for rugged, high-volume environments. Semiautomatic operation provides the necessary pressure; operator simply provides guidance.

No. 52HN51 Automatic/Manual Key Duplicator
- Tool steel cutter

A versatile automatic machine that can be used manually when needed, giving operator freedom to select the best key action. Accommodates large bow and long blade keys. Features titanium-coated cutter with permanently lubricated spindle shaft ball bearings. 4-position vise jaws provide secure clamping. Dial-type depth adjustment system simplifies calibration and improves accuracy.

2-Tag Key Cabinets

Cabinets are made of heavy-duty steel with baked-on powder-coated finish for durability. Each cabinet includes different numbered key tags and lock location charts. Hook-style key tags are numbered consecutively. Each hook holds 1 control key with a red permanent tag and 1 duplicate loaner key with a white reusable tag. In case loaner key is lost, the control key remains in cabinet. An "out key" tag is hung in the same position as the loaned key. Date, key number, and recipient can be recorded on receipt sheet.

Key Cabinets, Binder, and Hanging Files

CABINETS

Help keep track of loaned keys. Come with consecutively numbered, slotted-style, reusable key tags. Nos. 5KDJ7, 5KDJ8, and 5KDJ9 are hook style. Record loaner information (key number, date, and recipient) on the "out key" tags and hang them in the loaned keys area. Wall mount.

BINDER

Vinyl construction with metal-reinforced corners and a zipper to keep binder closed and contents secure. Binder comes with 3 base units, 42 snaps, 42 plastic key tags, and labels to organize up to 42 keys. Snap-in tabs allow keys to be removed and inserted easily.

HANGING FILES

Fit in a standard, letter-size filing cabinet.

Commercial Gate Operators

- 115V, single-phase
- ½-HP motor
- Continuous time interval

Includes a built-in LiftMaster® 312HM radio receiver for use with DIP Switch and Security+® remote controls. Rated for 100 cycles per hr. Commercial Gate Operators are compatible with Garage Door Openers Nos. 46X657 and 6UR95, available on Grainger.com®.

Slide Operator—Unit has alarm reset button, surge/lightning protection, weatherproof polyethylene cover, high-speed precision limit switches, and a gold zinc-plated chassis to help reduce corrosion. For use with slide gates, not included.

Swing Operator—Has "nonscissor action" function to help reduce injury. Feature an alarm reset button, surge/lightning protection, weatherproof polyethylene cover, high-speed precision limit switches, and a gold zinc-plated chassis to help reduce corrosion. For use with swing gates, not included.

Barrier Operator—DC-powered unit is for right- or left-handed operation. Features built-in battery backup, control inputs, inherent obstruction sensing, LED indicators, and an aluminum alloy chassis that resists corrosion. Gate Arm sold separately, go to grainger.com® and search for Gate Arms.

Gate Arms—Aluminum gate arms have yellow/black reflective stripes.

LiftMaster

Accessories—Photo Eyes Safety Device No. 5MKL9 stops and reverses the gate when an object is detected in its path.

evolis ZEBRA GA GRAINGER APPROVED

ID Badge and Card Printers

Create plastic IDs, badges, and loyalty and gift cards.

EVOLIS

Provide edge-to-edge printing for medium to large runs. Single-Side Printer No. 36J111 prints up to 190 cards per hr. Dual-Side Printer No. 36J112 prints up to 191 cards per hr. Both include software, drivers, USB, and power supply.

ZENIUS

Prints up to 150 color cards per hr. and up to 500 monochrome cards per hr.

DATACARD SD260™

Printers have full-color and monochrome printing capability. Easy to use with LCD panel and touch controls. Print up to 200 color single-sided cards per hr.; 155 color dual-sided cards per hr.; or 830 monochrome, single-sided cards per hr.

ZEBRA ZXP SERIES 8™

Retransfer printers provide photo-quality image and print resolution. Print up to 190 single-sided cards per hr. Security features include single- or dual-sided lamination, transfer film that shows tamper evidence, and lockable enclosure and card feeder to prevent unauthorized use.

Trilogy® Electronic Access Control Locks with Audit Trail, Grade 1

ALARM LOCK

- **Key override; standard core (included) or SFIC cylinder (not included)**

Electronic door locks help eliminate the problem of lost keys and rekeying costs. Replace a standard knobset. Work in conjunction with panic bars from Von Duprin, Yale, Sargent, or Adams Rite® on glass/narrow-stile doors. Use 5 AA batteries (included).

PIN/ID CARD CONTROL

Create multitiered security at 4 levels: master, manager, supervisor, or general user. Manage up to 500 automatic lock/unlock schedules (by day, date, weekend, or holiday). Operating temp.: -31° to 151°F. Field reversible.

No. 24U104 is a programmable double-sided lock with both proximity card and keypad PIN access.

Programmable Keypad No. 1HUZ8 has remote-release/request-to-exit input that allows use with REX switches. Wall- or single-gang box mount.

ID CARD CONTROL ONLY

Proximity-only locks have no keypad; accept both prox cards and keyfobs for access. Tap-and-add feature makes it easy to batch-add multiple ID cards with or without PC. PC programming/reporting.

CODE ONLY

No. 24Z459 provides multilevel security: master, manager, supervisor, and basic; can be programmed at the keypad with PC and/or data transfer module. Quick passage mode allows emergency access.

Double-Sided Proximity Lock No. 24U102 has direction-specific access that can be assigned, per user, for either side of the door.

Nos. 1HWL3 and 1HWL4 have a privacy button on inside of door to disable all other codes for a programmable duration when temporary sessions of privacy are needed. Programmable Keypad No. 1HUZ6 has remote-release/request-to-exit input that allows use with REX switches. Wall- or single-gang box mount.

ACCESSORIES

Trilogy® Windows® Software No. 1HYC3 can manage users and schedules, receive audit trail from lock, program lock using PC, and program/configure Handheld Data Transfer Module No. 1HYB8. Can transfer program data from PC to lock and receive audit trail from lock. Wireless Infrared Printer No. 1HYC4 is a handheld unit that can print time- and date-stamped audit trail. Batch Proximity ID Card Enroller No. 1HYB7 can add new users without the use of a PC.

Trilogy® Networx™ Networking Locks, Grade 1

- Key for manual override
- Weather-resistant; Operating temp.: -31° to 151°F
- Brushed chrome finish

Networked door access control systems eliminate door-to-door programming and audit trail retrieval by communicating wirelessly via 802.11B/G or Ethernet. No wires to run and no access panel or power supplies to install. Feature automatic schedules, event logs, and support for 2000 doors and 5000 existing proximity ID cards/badges.

PIN/ID CARD CONTROL

Programmable Locks Nos. 24U106 to 24U113 have built in HID proximity card reader, full-metal digital key pad, integral bidirectional radio, batteries, and serial number ID card. Starter Kit No. 24U117 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad No. 24U119 supports 3 to 6 digit numeric PIN codes and prox ID card users (virtually all HID format proximity technology ID cards, fobs, and credentials).

CODE ONLY

Programmable Locks Nos. 24U108 to 24U111 have full-metal digital keypad for code only use. Starter Kit No. 24U116 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad No. 24U118 supports 3 to 6 digit numeric PIN codes.

ACCESSORIES

Control Panel No. 24U120 includes circuit board with onboard flash memory and 12V power supply with transformer and rechargeable back-up battery. Supports 2 of any combination of NETDK or NETPDK keypads plus 2 Wiegand devices. Special 2-door mode allows 2 keypads and/or 2 Wiegand devices to separately control 2 doors. Gateway No. 24U121 supports up to 63 Networx™ locks using hardwire connection to the network via RJ45 Ethernet cable. Ceiling or wall mount. 1 antenna and 6VAC transformer included.

Trilogy® Keyless Electronic Control Locks, Grade 1

- Key override; standard core (included) or SFIC cylinder (not included, sold on Grainger.com®)
- Operating temp.: -31° to 151°F except Nos. 3ZM80, 3ZM83, and 3ZM81

Easily replace keyed locks with these electronic access control locks. Compatible with most doors that have a standard knob set. Fingertip-programmable keypad allows up to one hundred 3- to 5-digit codes. DL2700-series locks can create a 3-tiered hierarchy of custom codes: 1 master, 10 managers, 90 standard codes, and three 1-time-use codes. Low battery alert. Include 5 AA batteries (up to 150,000 cycles), except No. 3CCK6, which includes 2 lithium batteries (80,000 cycles). Double-sided models are for code control on both sides of the door.

NexTouch™ Electronic Touch Screen Locks

- Weather-resistant; operating temp.: -40° to 140°F
- Include 4 AA batteries

Install in minutes in nearly any standard cylindrical lock prep, with ¾"-dia. hole for wiring. Use 12-button touch screen to add, eliminate, or reprogram access codes in seconds; voice-guided instructions in 3 languages. Feature a vandal-resistant freewheeling lever handle. Ideal for access control management in offices, patient records, storerooms, hotels/motels, and other applications that may require frequent rekeying. No. 52WN32 accepts SFIC cylinders.

Electromagnetic and Keyless Access Control Locks

Use in a wide range of facilities, including large hospitals, small clinics, campus universities, single buildings, or entire office developments. Programmable keypads feature on-board controller access to simple electrified or battery-powered locking devices.

C0100 Series Offline Electronic Lock—Provide customized levels of security at each door, with a large selection of credentials and networking options. Allow addition/deletion of users, usage tracking, and data management without installing a facility-wide network. Upgrade to a network solution by replacing the network module, not the entire lock. Also provides an easy way to manage people, audits, locks, and other network panel interface devices for simple access control. Allows up to 5000 user codes and has a 6 pin full cylinder. Everest C123 Keyway with Sparta lever. Satin chrome finish.

Access Credential Reader—Provide flexible building security and security management solutions. Magnetic stripe card reader is full-swipe for maximum readability. Linked access available with keypad with card or iButton. Fully compatible with ABA Track 2 or Track 3 standards.

Keyless Access Control Locks—Illuminated keypad locks offer up to 19 individual user codes to provide secure access; program right at the keypad. Include 2 backup keys for emergency egress. Fit left- and right-handed doors from 1⅜"- to 1¾"-thick. All-metal chassis and escutcheons with wear-resistant silicone rubber buttons. Include 9V battery and low battery indicator light.

Electronic Access Control Locks with Audit Trail, Grade 1

- Key override; key-in lever cylinder (included) or SFIC cylinder (not included)
- Weather-resistant; operating temp.: -31° to 151°F
- Up to 300 users, 9000 audit events
- For 1¾"- to 2¼"-thick doors; 2¾" backset
- Include 4 AA batteries

Event audit trail provides a printable time/date-stamped log of all door activity. Features include audible low battery alert, timed relock, codes for 1-time use, antitamper function (invalid entry), and total user lockout codes. Lock can be programmed and audits downloaded via software and laptop PC (not included). Locks have a vandal-resistant all-metal keypad. Class/storeroom function requires no code for egress. Unique Lectro Belt eliminates wiring to or through the door. Retrofit standard ASA 161 door preps.

Biometric Access Door Lock

- Key override, up to 120 users
- For 1⅜"- to 2"-thick doors; 2⅜" or 2¾" backset
- Indoor use only
- Includes 4 AA batteries

Fingerprint reader allows only authorized individuals to have access to secure areas or items. Master user can manage, add, and delete user access by group. Processor stores memory when battery is removed for replacement. Nonhanded, field-reversible lever. Fingerprint, PIN, or mechanical key access. Zinc alloy construction.

Finish	Item No.
Satin Chrome	**2RUZ4**

2000 Series, Grade 1 Electronic Push-Button Locks

E-PLEX® BY KABA

- 100 individual user codes
- For 1⅜"- to 2½"-thick doors; 2¾" backset

No wiring to install. Nonhanded, field-reversible locks have a vandal-resistant, all-metal keypad and a solid cast exterior housing and lever. Classroom/storeroom function; no code required for egress. Come with a standard core or are prepped for a SFIC cylinder (not included). Include lock assembly, installation manual, template, reference guide, operations manual, and hardware. Retrofit standard ASA 161 door preps.

PowerPlex™ Self-Powered— Efficient and innovative electronic locks generate power with each turn of the lever; no batteries required and virtually no maintenance costs. No. 6NVN9 includes Schlage C keyway, 2 keys. No. 6NVP0 is for use with Best® SFIC 6- or 7-pin length, not included.

Battery-Powered—Feature audible low battery alert, timed relock, codes for 1-time use, antitamper function (invalid entry), and total user lockout codes. Include 3 AA batteries.

Knob Lockset	2⅜", 2¾"	Antique Brass, Bright Brass, Satin Stainless	**D0002**

900 Mechanical Access Control

SIMPLEX® BY KABA

- 1 user code
- 2½" backset

Classroom/storeroom function, no code required for exit. Nonhanded, field reversible. No batteries required. Can be used alone or with an existing lockset. Require a 1⅝"-dia. mounting hole. Measure 4"W x 5"H.

Note: All locks include a sheet metal strike for outswing doors and a cast box strike for inswing wood frame installation.

With Deadbolt—Deadbolt extends 1" from edge of door. Lock remains open and must be manually relocked. Egress by thumbturn.

With Deadlocking Latch and Holdback— Helps secure latch against prying. Automatically relocks after egress, except when latch hold-back is activated. No code is required for entry. Exit by thumbturn.

With Deadlocking Latch, No Hold-Back—Helps secure latch against prying. Automatically relocks after egress.

Metal Frame Adapter Kit—Includes surface-mounted strike with shims to adjust strike box. With ¼" x ⅜" reversible riser plate for aligning inside housing to strike.

Surface-Mount Magnalock® Electromagnetic Locks

SECURITRON
ASSA ABLOY

Fail-safe locks feature automatic dual voltage and instant release circuit. Brushed stainless steel finish. All ferrous metals plated to MIL specification. Mount using machine screws into blind finishing nuts; brackets and accessories available separately to configure any opening. Fully sealed electronics are tamperproof and weatherproof; safe for outdoor/marine use. All locks include 10 ft. of jacketed, stranded conductor.

M32 Series—M32-series locks provide 600-lb. holding force and are for use in medium-security applications. Require 2¼" flat mounting space. M32-series locks provide 600-lb. holding force and are for use in medium-security applications. Require 2¼" flat mounting space.

M62 Series—M62-series locks provide 1200-lb. holding force and are for use in high-security locations. Require 2½" flat mounting space.

Dual-Action Electromechanical Maglocks

SECURITRON
ASSA ABLOY

- 4000-lb. holding force
- Dual voltage 12/24VDC and dual current AC/DC

Hybrid design combines electromagnetic lock with 2 hardened steel electromechanical jaws. In a forced entry attempt, steel jaws rotate inward, clamping down and capturing the edges of the armature. Brushed stainless steel finish with included dress cover. Mount using machine screws into blind finishing nuts. Indoor use only. Brackets configure any opening, sold separately.

High-Security Electromechanical Gate Lock

SECURITRON
ASSA ABLOY

Designed for vehicle or pedestrian applications, gate lock operates with up to 100 lb. of preload. Fail-secure convertible to fail-safe. Self-aligning receiver adjusts ½" vertically and horizontally to compensate for gate sag or misalignment. Lock features manual key override for right or left hand. ³⁄₁₆"-thick zinc-plated steel gate bracket kits are designed for sliding and swinging gates. Post brackets are predrilled, and lock brackets are pretapped for easy installation. O.D. up to 3" for gate post bracket; up to 2" for fence post bracket.

Electromagnetic Locking Devices

SCHLAGE

Electromagnetic Lock

Touch Bar

LOCKS

Use to monitor a controlled area such as a hospital laboratory or a secure area in an airport. Also used to provide traffic control for doors in a commercial or education building. Utilize magnetic forces to maintain powerful bond between frame-mounted magnet and door-mounted armature. Available for surface-mount and concealed-mount applications in a variety of holding forces.

TOUCH BARS

Request-to-exit devices used to release electromagnetic locks. Designed for easy installation, smooth operation, and maximum durability.

LOCK ACTIVATION EXIT DEVICES

Magnetic spring design allows configuration of clockwise and counterclockwise key turn direction as well as momentary or maintained action.

Electromagnetic Door Releases

Hold doors open until released by a fire alarm system, remote smoke detector, or other switching device. Fail-safe operation—power failure releases door to a closed position. Door closer is required to close door. Surface-mount models require a surface adapter housing (junction box), which is included. Recessed-mount models are for concealed wiring applications and mount on 2" x 4" outlet boxes.

Electric Strikes

Electric strikes control access by either holding or releasing a latch bolt. Hard-wire electric strikes connect to a power source and a controller (typically a push-button switch, keypad, or card reader).

A fail-safe electric strike needs power to remain locked.

A fail-secure electric strike remains locked even without power. Device prevents entry; a doorknob or lever on the lock allows for egress.

Rectifiers—Convert AC power to DC.

Enclosures for Keypads, Buttons, and Light Switches

STI Safety Technology International

Multipurpose Keypad and Push-Button Enclosures— Polycarbonate enclosures protect against weather, vandalism, and theft. No. 3FVR4 is smoke-colored to help guard against password theft.

Flip-Up Polycarbonate Protectors—Rugged enclosures help protect keypads and push-button locksets from weather, vandalism, and theft. Easy to install.

Indoor/Outdoor Covers— Polycarbonate; include gaskets and mounting hardware. Large interior space protects dual-action pull stations, keypads, intercoms, push buttons, electrical switches, and duplex plugs.

Lock Functions

PASSAGE
Both outside and inside handles are always unlocked and free-turning. No keys are required.

PRIVACY
Inside handle push button locks the outside handle. Emergency release is on the outside knob. Closing the door or turning the inside handle releases the button.

ENTRANCE
Inside handle push button locks the outside handle. Outside handle opens with a key or by turning the inside handle.

STOREROOM
Inside handle is always unlocked and free-turning. Outside handle is always locked and unlocks with a key.

CLASSROOM
Inside handle is always unlocked and free-turning. Outside handle is free-turning except when it is locked by a key.

EXIT
Deadlocking latchbolt is activated by the inside knob. Nonremovable blank plate is on the outside.

DUMMY
For applications where a latch bolt is not needed.

TownSteel® Architectural Hardware MFG

Classroom Intruder Lockdown w/ LED Indicator, Grade 1

- Backset: 2¾"
- Door thickness: 1¾

Secure against unauthorized outside entry using a simple remote control unit button. Red LEDs both inside and out signify a lockdown is in progress. A designated individual can keep the room in lockdown until a lockdown cancellation code is entered from the outside. May be opened from the inside. During lockdown, a user code, office code, or key override may be used to gain access to the room.

Yale

- Backset: 2¾"
- Strike: 4⅞" x 1¼" x 1¼" ANSI

Nonhanded, field reversible. Zinc dichromate plating resists corrosion. Keyed different. Heavy-Duty 5400LN series includes Free Wheeling™ design that helps minimize vandalism by allowing the lever to rotate freely when locked. For 1¾"- to 2"-thick doors. Standard-Duty 5300LN series is for 1⅜"- to 1¾"-thick doors. Models without cylinders accept both Yale and Schlage cylinders. MicroShield® antimicrobial coating inhibits the growth of bacteria and lasts the lifetime of the finish.

FALCON

Lever Locksets, Grade 1 and 2

- Square corner faceplate: 1⅛" x 2¼"

Include 1" housing dia., ½" throw, and 6-pin solid brass cylinder. Schlage Classic C keyway. Keyed different. 2 nickel silver keys per lock.

Grade 1, T Series levers are heavy-duty cylindrical locks designed for facilities that are subjected to high-traffic/high-abuse conditions. Thru-bolted through the door. Chassis is secured by interlocking antirotation plate. Free-wheeling levers.

Grade 2, W Series levers are for high-use commercial applications such as schools, offices, and high-end residential. Solid stops in the lock and heavy-duty construction of all operating parts are designed to prevent damage when subjected to excessive force. Feature small format interchangeable cores (SFICs) that are compatible with SFIC products from other manufacturers.

Lever Locksets, Grade 1 and 2

BEST

- Backset: 2¾"

Cylindrical chassis fit common door preparation. These locksets feature through-bolt mounting studs for increased torque resistance and quick rekeying with BEST interchangeable cores. Hub torque springs provide extra resistance to lever sag. Preassembled hubs provide quick, simple installation.

9K Series—Low-maintenance design protects critical components from the damage that comes with everyday use. Vandal-resistant lever features a lost motion design that allows lever to move 45° to 60° without engaging retractor assembly. Attack-resistant design with slotted key release cam and locking lug assembly allow key access even if lock is damaged and ensure that lever is functional from inside of the door. Outside lever sleeve is a single piece of seamless, hardened steel alloy that delivers additional reinforcement in the locking lug slot.

7K Series—Keeper hole is not exposed on keyed levers providing increased security. Snap-on inside rose means no exposed mounting screws. Keyed lever is removable only after removal of core. Internal steel mechanisms are corrosion-treated for normal atmospheric conditions. The lockset is reversible for either hand of door without removing keyed lever.

Quiet Push-Pull Latch—Features built in sound dampening functionality to provide a zero decibel solution specifically for patient healthcare environments. Can be field configured for any paddle designation and ease of use.

Wide Paddle Push-Pull Latch—Provides additional area on the paddle when pushing or pulling. Ideal for use in operatiing rooms along with patient rooms when additional leverage is needed.

Flip Up Wide Paddle Push-Pull Latch—The push side of the paddle will flip up to be ligature-resistant, this application is used in behavioral health applications.

Ligature-Resistant Knob Locksets, Grade 1

TownSteel Architectural Hardware MFG

- Backset: 2¾"
- Strike: ASA
- Door thickness: 1¾"
- Stainless steel finish

Nonhanded lock design impedes ability to attach laces, cords, and clothing to the knob. Heavy-duty lock chassis is constructed from wrought steel. For use in healthcare, detention centers, and other high risk facilities such as behavioral institutions.

Norton ASSA ABLOY

Hydraulic Door Closers

Rack and pinion closers have a lightweight aluminum alloy body. Feature adjustments for closing, sweep and latch speed, and back-check. Closures with retrofit plates allow 7500 Series door closers to replace 4040 Series door closers without modifying the existing hole pattern in the door. The plates will work with regular and parallel arm applications.

EXTRA HEAVY-DUTY, 410 SERIES

Nonhanded feature self-closes the door each time the door is opened. Nonhanded Hold-Open closers are not permitted on fire doors.

HEAVY-DUTY, 7500 SERIES

Feature larger closer body and springs, plus advanced hydraulic flow for greater door control. Adjust for door sizes from 1 to 6.

Standard Arm Type—Suitable for doors with low exposure to wind and abuse. For regular, top jamb, and parallel arm installation.

Slide Track Arm Type—Single-lever arm allows components to be stacked to reduce projection and obtrusive arm angles. Pull or Push models depend on the side of the door where the closer is mounted.

CloserPlus® Arm Type—Heavy-gauge arm material, arm pivot/elbow with larger bearings, and positive stop help prevent door from opening too far. For doors with moderate exposure to wind and abuse. Parallel arm mount only.

Unitrol® Arm Type—Have same features as CloserPlus, but include a spring stop that absorbs 30 lb. of force. Highly controlled stop. Suitable for doors with high exposure to winds and abuse. Parallel arm mount only.

HEAVY-DUTY, 7570 SERIES

This series incorporates the 7500 Series closer with a security cover. Security arm joints are riveted to prevent disassembly. Torx drive screws and security pin are included. Closers are handed with Unitrol arms.

STANDARD-DUTY, 8500, 8300, 260, 1600 AND 160 SERIES

Closers have a medium-size body and springs for effective door control. 8300 Series has a slimline design that requires less mounting space than other closers. Nos. 45TY68 and 45TY69 size 4 door closers.

LIGHT-DUTY, 1700 SERIES

Grade 2 closers include cover. Have a smaller body, making them suitable for use on low- to medium-use doors. Compatible with door sizes 2 to 5.

Non Hold-Open

Hold-Open

Pot-Belly Door Closers

Norton ASSA ABLOY

Original style closers for a retro-look. Include spring power adjustment, backcheck cushioning, and sweep/latch regulating valve. Nonhold-Open feature self-closes the door each time the door is opened. Hold-Open closers are not permitted on fire doors.

Hydraulic Door Closers, Grade 1 and 3

- Interior/exterior installation
- Non-handed
- Aluminum closer body with plastic cover
- Full-surface mounting style

3100 Series Commercial Grade—Traditional style door control for use on commercial door applications. Common 9 1/16" mounting hole pattern permits simple installation on new or retrofit applications.

5500 Series Architectural Grade—Can be adjusted to comply with barrier-free opening force restrictions. Common 12" x ¾" mounting hole pattern for simple installation on new or retrofit applications.

GA GRAINGER APPROVED

7100 Series Heavy-Duty Closer—Constructed of high-strength cast-iron body and forged-steel arm assembly. Recommended for high-frequency, abusive installations.

Door Closers

Corbin Russwin ASSA ABLOY

Rugged design for high-traffic and high-abuse areas. Captured valves help make closers vandal- and tamper-resistant. Universal and Universal Hold-Open models include brackets and arms to install closer in top jamb, standard, and parallel applications.

Standard Arm—Allows inside mounting of closer on out-swinging doors. Arm does not project from the opening.

Hold-Open Arm—Combines regular hold-open arm with the parallel arm mounting bracket.

Powerglide® Door Closers

SARGENT ASSA ABLOY

1431 Series is suitable for interior or exterior doors in commercial settings.

Universal and Universal Hold-Open models include brackets and arms to install closer in top jamb, standard, and parallel applications.

281 Series is rugged cast-iron construction suitable for interior or exterior doors in high-use applications.

351 Series has aluminum body and is for use with doors exposed to strong drafts and winds.

Standard Arm—Mounts on the pull side of door with the arm mounted on the face of the frame.

Hold-Open Arm—Friction-type holder is easy to adjust and can hold door open from 80° to 180°.

Heavy-Duty Parallel Arm—Closer is suitable for narrower door frames, mounts on the push side of the door, and does not project into the room. For use in abusive and high-traffic areas.

Powered Door Operators

Norton ASSA ABLOY

- Nonhanded
- Acceptable for fire and smoke barrier doors

Low-energy operators function as standard spring-force closers during close cycles, when door is opened manually, or if power is lost or turned off. Hold-open time is adjustable from 0 to 30 sec. If door is obstructed, motor stops and the door closes with standard closer. Include 2 radio-frequency wall switches powered by 9V batteries, 6" x 6" face plates with Americans with Disabilities (ADA) logo, and built-in 1.1A power supply. Connect to wall outlet. Rated 120VAC, 60 Hz. Ideal for doctors' offices, retirement facilities, schools, churches, and other applications where noise may be a concern.

Door Closers

Yale

Rack and pinion closers have a lightweight aluminum alloy body. Feature adjustments for closing, sweep, latch, speed, and backcheck. Closers have a standard arm, which is suitable for doors with low exposure to wind and abuse. For regular, top jamb, and parallel arm installation.

Heavy-Duty, 2700 Series—Features larger closer body and spring. Adjust for door sizes 1 to 6 (Grade 1).

Standard-Duty, 1100 Series—Medium-size body and spring for effective door control. Adjust to door sizes 1 to 4 (Grade 1) or fixed at door size.

Standard, Standard Delayed-Action, and Extra Heavy-Duty 5800 Series—Extra Heavy-Duty feature cast iron construction that increases body life and reduces leakage. Adjustable backcheck, closing speed and latching speed. Tri-style packed regular and parallel arm and top jamb mounting.

Door Closers

LCN®

- Max. door opening up to 180°
- Includes self drilling screws and hardware

Closers have cast iron cylinders, forged steel arms, all-weather fluids, and double heat-treated pinions that help provide long life cycle. Powder-coated finish. Self-tapping/self-reaming screws, and peel-and-stick templates help ensure accurate installation.

1261 Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Does not include cover.

1461 Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 5 ft. and exterior doors to 4 ft.

4011 Series Closers are handed and mounted hinge side; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

4040XP Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 5 ft. and exterior doors to 4 ft. Tested for 10,000,000 cycles without failure.

4111 Series Closers are handed and mounted parallel arm; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

VON DUPRIN®

Exit Devices, Grade 1

- Fit doors 1¾" to 2¼" thick up to 7-ft. high

For heavy traffic applications. Use on flush and wide-stile doors.

Rim Pullman Bolt

Rim SquareBolt®

Surface Vertical Rod

Exit Devices

- Nonhanded

Nonfire-rated devices have a dogging feature that keeps the door unlatched, allowing traffic to enter and exit freely. "A" labeled fire doors. Fit 1¾"- and 2¼"-thick doors up to 7-ft. high. Include strike and mounting hardware. Heavy-duty devices have a hydraulic noise-dampening feature and a high-quality finish.

Rim Pullman Bolt— Devices resist vandalism and have a ¾" throw stainless steel latchbolt for single-point latching. A guardbolt deadlocks the latchbolt when door is closed and latched.

Rim SquareBolt®— Deadbolt-style, 1" throw latchbolt engages the roller strike with a flat surface for increased security. Stainless steel bolt design locks into place; resists shimming and door rattling/shaking.

Surface Vertical Rod— 2-point locking exit devices have an automatic deadlocking upper latchbolt with ¾" throw and lower deadbolt with ⅝" throw. For doors taller than 7 ft., order vertical rod extensions.

Exit Devices and Trim

- Thru-bolt trim design for increased security and durability
- For doors 32" to 36"W

Use in school, healthcare, industrial, office, and multifamily housing facilities. Hex dogging and cylinder dogging lock down the device bar so the latch remains retracted and the door can swing freely. Hex dogging locks down the bar with the use of a hex key. Cylinder dogging uses a keyed cylinder for increased access control.

Standard-duty devices tested to over 500,000 cycles and exceed requirements for Grade 1 certification.

ALARM LOCK Yale

Magnetic Exit Door Alarms

Help deter unauthorized use of emergency doors by sounding an alarm when door is opened. Alarm surface mounts on the interior side of the door, and magnetic contacts mount on the door frame. Alarms are reversible for right- and left-hand doors. For indoor use only; mounting hardware included. Key-controlled alarms require a mortise cylinder lock (sold separately).

Standard—Have a low battery warning. No. 1U109 has an amber strobe light for visual identification. Nos. 1U112 and 1U109 include a battery pack; No. 1ABN3 includes a 9V battery.

Slimline—Narrow design takes up less space. No. 6JD82 mounts on inside of door and has a programmable 6-digit keypad to arm and disarm the alarm; No. 6JD81 mounts on the outside. All include 9V battery.

Deadlatch

Handle

Paddle

Adams Rite ASSA ABLOY

Aluminum Door Hardware

Deadlatches—A reverse key turn while the bolt is held retracts the latchbolt, allowing 2-way traffic. When latchbolt is extended, exit-only traffic is allowed. Compatible with any standard 1⅝" mortise cylinder where an MS cam is installed. An auxiliary bolt helps prevent shimming.

Deadlatch Handles and Paddles—Include an activator camdisc that mounts on the handle escutcheon and fits into the cylinder hole of the latch.

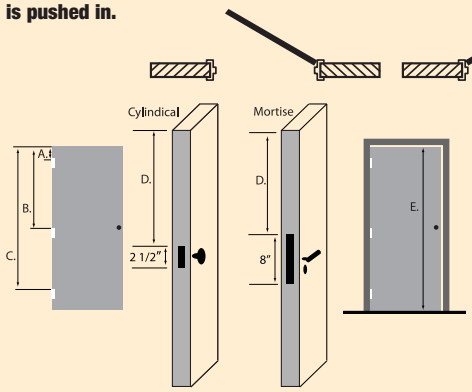
Door Selection Guide



Frame Handing - Select the proper handing.

Right Hand (RH) - Hinges are on the right, door is pushed in.

Left Hand (LH) - Hinges are on the left, door is pushed in.

Right Hand Reverse (RHR) - Hinges are on the right, door is pulled away.

Left Hand Reverse (LHR) - Hinges are on the left, door is pulled away.

A. Measure from top of door to top of upper hinge.

B. Measure from top of door to top of middle hinge.

C. Measure from top of door to top of bottom hinge.

D. Measure from top of door to top of door edge cutout.

E. Measure from inside edge of header to the floor to determine door height.

Door Frames

- 5-3/4" overall jamb depth with a 4⅞" throat opening
- Shipped unassembled

16-ga. cold-rolled steel frame has a 2" face and die-cut mitered corners. Prepped for 3 each of 4½" x 4½" x 0.134" or 0.180" hinges and a 4⅞" ASA universal strike and closer reinforcement. Identify door swing by standing with door swinging forward; if the hinges are on the left, the model is a left-hand door.

Weatherstripping and Seals

▪ Sold by the roll

Apply to inside of door frame and around windows to seal gaps quickly.

FIRE/SMOKE SEALS

For use with wood fire doors rated for 90 min.

Fire and Smoke Seals—Use to help seal off both fire and smoke.

Fire Seals—Graphite material expands at high temperatures to seal gaps and help prevent the spread of fire.

Smoke Seals—Help prevent smoke passage at temperatures up to 800°F.

FOAM SEALS

Nitrile Sponge Rubber—Highly compressible; can be used outdoors.

Closed Cell—Use to fill larger gaps; can be used outdoors.

Open Cell—Easy to compress; suitable for tight-fitting applications.

Pile—Polypropylene material helps reduce rattling.

EPDM RUBBER

Durable rubber stays flexible in extremely hot and cold temperatures. Blocks out drafts and dust around doors and windows.

Door Sweeps

GRAINGER APPROVED

Fill the gap below the door and help keep out drafts, light, dust, and weather. Mounting holes included. For inside or outside applications on residential and commercial doors.

A. Single-Fin—Seal door and threshold gaps up to ¾". Neoprene and EPDM material resist weather and remain flexible in cold temperatures.

B. Triple-Fin—Multiple layers provide a positive seal for uneven floors. Seal gaps up to ¾".

C. Nylon Brush Insert—Fibers fill gaps and sweep dirt, insects, and snow away from door. Oak flange can be painted or stained.

D. Reinforced Neoprene Insert, Looped—Create dead air space to insulate against drafts and hold sweep tightly against floor.

E. Drip Cap—Divert rain and debris away from door.

F. Spring-Loaded Door Bottom—Spring lowers door sweep automatically when door is closed. For use on swing-in doors.

Adjustable Door Frame Weatherstripping

NGP NATIONAL GUARD PRODUCTS

Adjustable door frame weatherstrip creates an interior sound seal on doors that do not sit plumb and square. Use with wood fire doors rated for 90 min. and metal fire doors rated for 3 hr.

Door Frame Weatherstripping

GA GRAINGER APPROVED

Mounts on top and sides of door frame to seal gaps.

Hollow Bulb Inserts—Compress easily, stay flexible in extremely low temperatures.

Sponge Insert—Material provides a dense, abrasion-resistant seal.

Flexible Nylon Brush—Dense fibers fill gaps and help keep out insects.

Magnetic—Flexible, vinyl-covered magnet seals against metal doors.

Corrosion-Resistant—Stainless steel flange holds up to harsh weather.

Kerf—Conforms to irregular surfaces to create a tight seal. Installs in kerf-in door stop. For use with steel doors.

Adjustable—Creates an interior sound seal on doors that do not sit plumb and square. Use with wood fire doors rated for 90 min. and metal fire doors rated for 3 hr.

Drywall
No. 2VE72

Plastic
No. 5YM02

Standard, Steel
No. 1UEX1

TOUGH GUY

Access Doors

Conceal wall openings with a secure cover that can be finished to match wall color.

ACOUSTICAL, FOR DRYWALL

16-ga. steel door with continuous piano hinge. Allen hex head operated cam latch.

ADJUSTABLE

20-ga. steel door. Adjustable by 1½" in height and width. Magnetic latching mechanism.

DRYWALL

16-ga. door and frame with drywall corner bead flange. Flush mounted with concealed pin hinge. Screwdriver operated cam latch.

FIRE-RATED, INSULATED, STANDARD

16-ga. steel frame and 20-ga. steel door with automatic panel closer and inside release. Self latching tool or ring operated slam latch. 2" mineral wool insulation for a 2-hr. fire barrier and 1½-hr., B label. Fire rating of 1½ hr. in walls, 3 hr. in noncombustible ceilings and 1 hr. in combustible ceilings.

Upward-Swinging—

For ceilings only. Same as fire rated insulated model but the panel swings up and shuts down by way of gravity instead of springs.

FIRE-RATED, UNINSULATED, STANDARD

16-ga. steel door for vertical fire-rated surface only where temperature rise protection is not required. Fire rating of 1½ hr. B-Label for 2-hr. rated walls.

HIDDEN FLANGE

16-ga. exclusive steel door. Flush mount with european-type hinge. Screwdriver-operated cam latch.

INSULATED, ALUMINUM

16-ga., corrosion-resistant aluminum door and frame. Feature 1"-thick insulation and gasket around perimeter.

MEDIUM SECURITY

14-ga. steel with baked-on paintable prime coat. Continuous piano hinge and key-operated cylinder lock.

PLASTIC

High-impact, noncorrosive ABS plastic doors are UV stabilized for exterior use. No. 5YM02 has punch-outs for electric and plumbing.

STANDARD

Steel—16-ga. steel door with flush-mount doors with pin hinge (continuous piano hinge for Nos. 2VE87 and 2VE88). Screwdriver-operated cam latch.

Stainless Steel—Corrosion-resistant door and frame.

GA GRAINGER APPROVED STANLEY

Template Mortise-Mount Hinges

Steel hinges have standard preplated countersunk holes arranged in a half-moon shape. Square hinges mount into recessed cutouts, attaching doors to frames. Use ball-bearing hinges with door closers to reduce friction in high-traffic areas. Removable pins make frequent door removal easier, while nonremovable pins provide increased security. Safety hinges have concealed bearings to prevent tampering and tapered tips. All hinges are mounted with #12 screws except for 3" hinges, which use #9 screws. Hardware included.

Note: Additional sizes and finishes available. Call 1-800-GRAINGER (472-4643) or search for "hinges" on Grainger.com®.

Nontemplate Mortise-Mount Hinges

GA GRAINGER APPROVED

- 270° range of motion.

Reversible nontemplate hinges have nonstandard hole patterns, providing flexibility as older/stripped holes can be ignored when mounting new hinges. Hinges mount into recessed cutouts, attaching hollow metal or wood doors to frames. Holes are predrilled and countersunk for easy installation and better corrosion resistance.

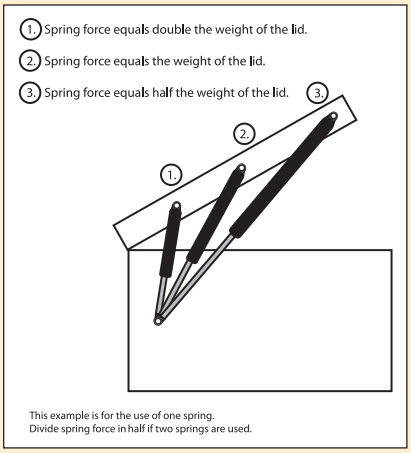
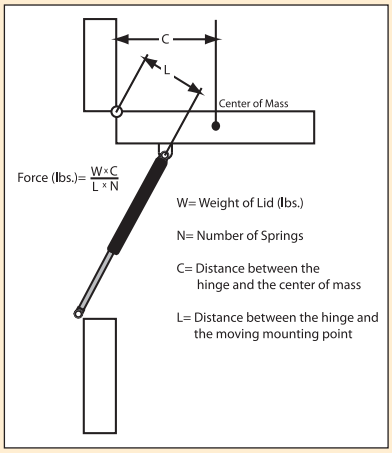
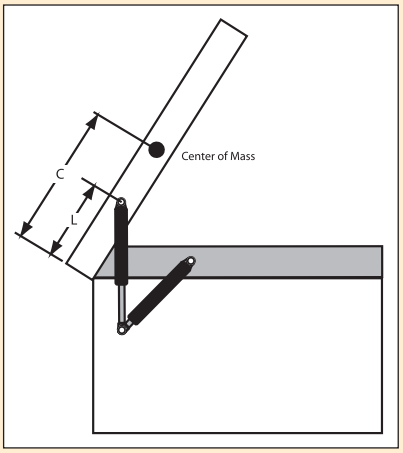
Load-Rated Continuous Hinges with Holes



Markar
ASSA ABLOY



- Hardware included



All hinges are heavy-duty, 14-ga. steel and are rated for doors weighing up to 600 lb., up to 1¾" thick, and with a max. door width of 4 ft. Min. door clearance of ⅛", except for Nos. 2YEY3 and 2YEY4 which are ⅜". Hinges have 1⅞" knuckles, ¾"-dia. 304 stainless steel hinge pins, and long-life split nylon bearings.

Choosing the Right Gas Spring

Gas springs are the perfect solution for almost any hinged application requiring lift assist. They can also be designed to hold a lid in the open position. Gas springs are filled with nitrogen, a nonflammable gas, as well as oil, to lubricate the internal components of the gas spring.

APPROXIMATING THE REQUIRED FORCE

The diagram above can be used to approximate the force required in the gas spring. A mounting point directly on the center of mass will result in a gas spring requiring about the same force as the weight of the lid. Directly between the center of mass and the hinge will require about double the force. Twice the distance from the hinge to the center of mass will require a force about half the weight of the lid.

CALCULATING THE REQUIRED FORCE

The gas spring force can be more closely approximated using the above diagrams and equation. The force calculated will be enough to hold the lid open in the fully extended position. Because of friction and other application variables, you may want to choose a spring with a force about 10% higher than calculated.

CHOOSING THE RIGHT LENGTH

To choose the right length gas spring, first determine the distance between the mounting points when the application is in the open or extended position. You will want to choose a gas spring with an extended length equal, or nearly equal, to this length.

Next, measure the distance between the mounting points when the application is closed or fully compressed. You will want to choose a gas spring with a compressed length that is less than this length. Choosing a gas spring with a longer compressed length will result in an application that will not work properly. The stroke length of the gas spring can be calculated as the difference between the extended length and compressed length.

Steel and 316L Stainless Steel Gas Springs

Bansbach easylift

- Temp. range: -22° to 176°F

Steel springs feature CeramPro®-treated rod technology to provide a smooth, durable surface. Powder-coated cylinders provide maximum resistance to corrosion. Springs are filled with nitrogen (N_2). Stainless steel springs are constructed of 316L stainless steel. Please be sure to note the thread sizes on either end of the gas spring and that of the fitting when matching the 2. More traction, locking and high temperature gas springs with elbow fittings are available on Grainger.com.

Steel Drawer Slides, Side Mount

GA GRAINGER APPROVED

Precision ball bearings and raceways ensure smooth drawer operation. Slides have a positive stop so drawer will not disengage from the slide, and a hold-in detent firmly holds the drawer in a closed position. Load rating based on 50,000 cycles. Mounting screws included.

A. FULL EXTENSION WITH LEVER DISCONNECT

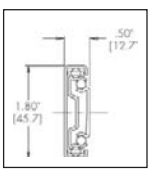
Drawer pulls out the entire length of the slide, except the 10" drawer travels only 9½". Slides have a lever release; just push the lever to release the drawer from the slide. Not for use on drawers that are wider than their length.

B. FULL EXTENSION, HOLD-OPEN WITH LEVER DISCONNECT

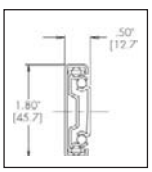
Same features as **A.**, but with an additional hold-open feature to hold the drawer in place when opened. Drawer requires greater pressure to close.

C. FULL EXTENSION WITHOUT DISCONNECT

Drawer can be pulled out the full closed length of the slide. Once installed, drawer cannot be removed without disassembling the slides.



D. FULL EXTENSION WITH HANDED RAIL LIFT-OFF



Lift-out release feature allows the drawer to be easily lifted up and out of the slide. Slides are full extension, allowing the drawer to be pulled out the full closed length of the slide.

Hospitality LED TVs

LYNK™ Remote Enhanced Control for Hospitality (REACH) helps you control your property's operating costs by allowing you to make remote updates to all rooms from one remote location. Digital television (DTV) normally requires a manual, room-by-room update process that increases the cost of running your property. REACH saves you time by updating and adjusting DTVs using radio frequency signals. This server and remote control combination offers near real-time updating, provides a residential TV experience to guests, and lets you deliver information to guests automatically using a headline style scrolling ticker. Integrated solution uses existing infrastructure assets and eliminates the need for set-top boxes and other components.

Motorola Two Way Business Radios

All radios include battery, belt clip, single-unit drop-in charging tray, and transformer. For additional accessories, see page 2031.

BUSINESS DIGITAL, DTR SERIES
- 900 MHz digital ISM band; require no license to operate
- Durable, digital radios provide clear audio quality
- Provide group or 1-to-1 private communication
- No. 10K212 provides private group communication
- Text messaging capable
- Programming Cable No. 2EUH6 required to access programmable features, sold separately on page 2031

BUSINESS, RDX SERIES
- FCC License required
- Narrowband compliant
- Durable analog radios provide clear audio quality and expanded frequency capability
- Operate on 89 UHF and 27 VHF business frequencies; up to 213 codes to ensure clear signal
- Allow for programmable frequencies to be added later; high-power models can be programmed to function with repeaters
- Programming Cable No. 29WJ59 required to program radio on licensed frequencies and to access programmable features, sold separately on page 2031

BUSINESS, RM SERIES
- FCC License required
- 12.5 kHz narrowband
- Designate 16 prerecorded channels
- Up to 20 floors communication coverage

BUSINESS, RMM SERIES
- Operate on license-free VHF MURS frequencies
- Programming Cable No. 29WJ59 required to access programmable features, sold separately on page 2031

LIGHT-DUTY, CLS SERIES
- FCC License required
- Narrowband compliant
- Operate on 56 UHF business frequencies; up to 121 codes to ensure clear signal
- Lightweight and compact

MOTOROLA SOLUTIONS

Motorola Commercial Portable Two Way Radios

- Li-ion battery type
- IP54 rating

Powerful, versatile radios combine reliable 2-way radio functionality. Push-to-talk button delivers crisp, clear audio, penetrating even in extremely noisy environments. Essential feature includes the ability to interrupt a transmission to prioritize emergency communications and selectable frequencies. Deliver increased coverage while maintaining a 40% longer battery life. Nos. 54HC92 to 54HC95 feature radio check, remote monitor, scan/dual priority, timer, and voice announcement.

Business Portable Two Way Radios

- FCC License required
- Narrowband compliant
- 5W VHF/UHF
- Encryption, priority scan
- 500mW audio output

Programmable 12.5/20/25 kHz channel spacing. High contrast display. Have multiple soft keys for features such as encryption mode, which scrambles the audio signal to prevent eavesdropping. Priority Scan mode allows listening to multiple channels at once with precedence on the main channel. Units come with 2-tone encode and decode, which allows sending/receiving of 2-tone pages. Battery life is 16 hr. on Digital 530 and 450 series. Include programming, battery, belt clip, whip antenna, and side cover.

VHF/UHF Mobile Two Way Radios

These radios have multi-configurations for dual band operation. 250-channel capacity, providing greater reach and has ability to program up to 20 memory groups. Built-in emergency alert with panic button ensures safety. ARTS™ (Auto-Range Transpond System) informs you when another ARTS™-equipped radio is within communication range. If out of range, the radio senses no signal and beeps to alert. Horn alert capability enables base station to issue a 2-Tone, 5-Tone or DTMF signal remotely to activate the car's horn to go off. Feature 8-character alphanumeric display, radio-to-radio cloning along with scanning for priority, dual watch, and group.

MOTOROLA SOLUTIONS

Two Way Business Radio Accessories

Audio Accessories—Talk and listen to 2-way radio without removing it from case or belt. Temple Transducer No. 2EUH1 is ideal for high noise environments. Can receive audio via bone conduction while wearing hearing protection. Unit comes with microphone and In-line Push-to-Talk button.

Remote Speaker Microphone No. 45EC28 allows communication without removing radio from belt.

Batteries and Chargers—Genuine Motorola batteries and chargers provide optimum performance and help ensure clear, reliable communication.

Carry Accessories—Designed to fit radios with a battery and permit audio to be heard clearly. Carrying cases are premium-grade leather and help protect radios from daily abuse.

Programming Accessories—Allow an interface with customer programming software to easily set up and maintain a radio fleet.

Radio Surveillance

EAR PHONE CONNECTION

Wireless Lapel Microphone—This push-to-talk microphone with Bluetooth™ technology has easy to connect alignment and distributes excellent audio quality. Provides up to 12 hr. talk time. Includes Fox listen only earpiece, ear tips (left and right), USB cable, and wall charger.

Surveillance Kits—These 2-wire kits feature a microphone that can fit into your palm. Extra long cables provide less tension at the connector. Clear acoustic long tube delivers quality sound. Includes hardwire adapter, and earpieces for both ears. Can be clipped-on.

Description	Item No.

EAR PHONE CONNECTION

Comfort Ear Tips

Ambidextrous ear tip cone that fits both left or right ear. Designed to fit into the opening of either ear canal without penetrating the inside of your ear, reducing ear fatigue. Ear tip is made of soft silicone gel, providing all day comfort. Open skeleton design allows more ambient sound to pass through your ear for improved situational awareness. Universal acoustic tube fit.

Weather Alert Radios

- 162.40 to 162.55 MHz

Specific Area Message Encoding (S.A.M.E.) feature provides localized weather and hazard alerts down to 1 county. Batteries not included.

TABLETOP HAZARD ALERT RADIO, AC- AND BATTERY-POWERED

Includes a 90dB alert siren.

TABLETOP HAZARD ALERT RADIO, AC-POWERED

Features full date display and 10 memory channels. Can add or remove up to 8 weather alerts (i.e. flood warning, storm watch). Radio receives both analog and digital signals.

HANDHELD HAZARD ALERT RADIO, BATTERY-POWERED

A weather Test button ensures weather alert feature is functioning and auto scan locates available weather channels. Weather scan feature allows scanning and locking onto the strongest weather channel signal. Receive alerts by tone, voice, or visual. Large backlit LCD display features tri-color LED with 3 alerts including Weather, Watch, and Advisory.

EMERGENCY SEVERE WEATHER SURVIVAL RADIOS

Crank handle to recharge included NiMH battery.

No. 22A871 includes digital tuner display, headphone jack, and beacon. NOAA alert notifications: Child Abduction Emergency (Amber Alert), Nuclear Power Plant Warning, Biological Hazard Warning, Civil Emergency Message, Fire Warning, and Landslide Warning. Also runs on solar, battery, or AC power. Nos. 31EX14 is an emergency crank radio and ideal for emergency preparedness, camping, beach, park, and everyday use. Nos. 33UD34 is rugged with a rechargeable Li-ion battery, large solar panel, and hand turbine power generator.

AIPHONE®

Audio Video Entry System

The JK series allows you to identify visitors while remaining safe behind locked doors. Ideal for single-family homes and small- to mid-sized buildings. Door stations are equipped with a 170° wide angle. Features zoom-in and zoom-out options to identify everyone at the entrance, PanTilt feature to see close up, and full-color video. Monitors adjust for low light and nighttime settings, as well as bright and heavy backlighting. JF model is designed for clear identification even in low light conditions. Includes LED talk indicator and both hands-free and push-to-talk options. For commercial, educational, government, healthcare, and residential applications. JO series features a 7" screen, light touch buttons, clear picture quality, sleek design, and 2-conductor wiring. Touch buttons allow you to select volume, discreet monitor, LCD adjustment, secondary device, door release, and hands-free communication.

Two Way Radio Callboxes and Callbox Systems

No. 48FX21

No. 41P015

No. 4RB70

- **Compatible with virtually any existing VHF or UHF business radio system operating on the same frequency**

Wireless technology installs quickly and easily without trenching and construction. Large speaker is audible even in noisy environments. Powered by 6 D batteries or 12VDC external power.

ClubCall® System—Food ordering system allows communication from the golf course to the clubhouse restaurant. Weatherproof, vandal-resistant design. Automatic shutoff. Programmable volume settings. Includes a 1 series radio callbox, AC-powered fixed-location base station, and matching 2-way portable radio with charging stand. Can be factory programmed for additional custom and repeater frequencies.

GateGuard® System—Voice intercom system enables control of gates and mag-lock doors using portable radio and fixed-location base station radio. Includes a 6 series weatherproof radio callbox with remote-control relay feature, 12VDC-110VAC power supply for callbox, matching business band 2-way portable radio with charging stand, and base station. Entry keypad models allow personnel to use preapproved codes for direct entry. Callbox and entry keypad require a hardwire connection to the gate controller or mag-lock for operation. Can be factory-programmed for additional custom and repeater frequencies.

Quick Assist® Shopper Call Buttons—Press of a button instantly alerts radio-equipped staff to the area where assistance is needed. Stand-alone, battery-operated buttons do not require wiring. indoor/outdoor use. Use with existing business band 2-way radios operating on the same VHF or UHF frequencies.

CAT® Smartphones

No. 420C68

Scratch-resistant touchscreen includes tracking feature, allowing you to use your hand or glove to swipe even in wet weather conditions. Waterproof, dustproof, and survives depths of up to 16 ft. (5m). Phone takes underwater photographs and video. Shockproof with a drop protection of up to 6 ft.

S60 Series—Camera features FLIR integrated thermal imaging that visualizes heat invisible to the naked eye, highlighting temperature contrasts. Helps identify gaps in insulation, and electrical faults, and monitors the performance of machinery. Includes laser app that measures distance and records it. Air app alerts you to levels of indoor air pollutants. Has up to 35 hr. of talk time. Operating system: Google Android™ Oreo.

S41 Series—Delivers a powerful battery that can even charge other devices and accessories with its battery share feature. Up to 38 hr. of talk time. Provides 44 days of stand by time. Operating system: Google Android™ Nougat.

S31 Series—Easy-to-grip design features a multifunction programmable key that is useful for Push-to-Talk (PTT) one-touch communication launching its flashlight or camera. Free screen repair with a 24 month gurantee warranty. Provides 30 hr. of talk time and has 38 days stand by time. Operating system: Google Android™ Nougat.

ClearSounds

TELEPHONES

Note: Use of Caller ID requires subscription to a Caller ID service.

CSC600 Series—Have UltraClear™ sound clarifying technology. Feature missed call indicator and Caller ID/Call Waiting with 99-name/number Caller ID history.

Hearing-Impaired Guest Room Phone Sets—Make sure your facility is ADA compliant to ensure your deaf or hearing-impaired guests are notified in an emergency.

If your property does not include audible and visual detectors, use Kit No. 5KZF8. Includes display TTY, telephone ring signaler, ClearSounds clock with telephone signaler, bed shaker, telephone in-line amplifier, door knock alert, and a visual strobe smoke detector.

If your property has smoke detectors that are both audible and visual, use Kit No. 41D240. Includes portable in-line telephone amplifier, Y-jack for phone attachment, digital TTY, door knocker, vibrating alarm clock with telephone signaler, (2) AC adapters, 9V battery, (6) AA rechargeable batteries, vibrating pad, and standard hotel soft case.

For main building fire alarms, if your current system does not signal visually in your hearing-impaired rooms, you must use a signaling device. Kit No. 29WJ96 is triggered by a continuous T3-T4 fire alarm sound and transfers the signal to the main flashing base. Includes base alerting device, bed shaker, door knock alert, telephone line cord, and fire alarm transmitter.

ACCESSORIES

Amplified Telephone Ring Signaler—Plastic signaler features bright LED light and is for use with any analog telephone line. Includes AC power adapter, telephone line cord, and instruction manual.

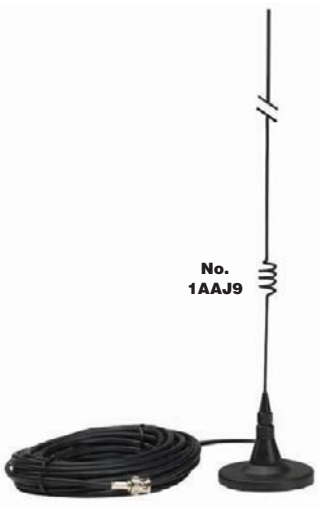
Go Beyond Normal Limits...
RITRON® WIRELESS SOLUTIONS

Wireless PA Systems



- 85dB max. at 50 ft.
- Works with 2 way-radios

Eliminate running wire, and put PA communication right where you need it. Can be programmed with custom frequencies to work with existing 2 way-radios in the same frequency band (PC programmer optional). Additional features include adjustable volume, message repeat function, and visual alert relay for optional strobe light. Includes compatible portable 2 way-radio, radio receiver, PA horn speaker with 25-ft. cable, flex antenna, mounting bracket, and a 110V AC adapter.

PA Systems and Accessories

AmpliVox Portable Sound Systems

No. 1YVX6

No. 36D054

SMALL AREA PERSONAL

BeltBlaster® and BeltBlaster Pro®

Battery-powered mini PA systems can be worn like a belt. Weigh only 2 lb. Systems include headset and lapel microphones and volume control. For indoor or outdoor use. 5W sound output is designed to reach audiences of up to 50 in rooms up to 400 sq. ft. No. 1YVX6 is powered by 6 AA alkaline batteries (sold separately). No. 2GXA8 includes carrying case, 6 rechargeable NiMH batteries, and an AC adapter for recharging batteries.

Mity-Lite

Portable 35W system is for audiences of up to 250 in rooms up to 1500 sq. ft. Line-in for CD, MP3, DVD, projector, and laptop. Plastic enclosure for durability. Ergonomic handle for comfort. For indoor and outdoor use. Includes UHF wireless handheld microphone, shoulder strap, and carrying case.

MID-RANGE PORTABLE

Voice Carrier Kits

Wireless systems reach audiences of up to 1000 in rooms up to 10,000 sq. ft. 50W amplifier has built-in UHF wireless receiver with 3 mic inputs and 2 speaker jacks. Include 3 tripods and 2 dual-module Jensen speakers with 40-ft. cables to connect to amp. All components fit into included carrying case with wheels and luggage handle. Designed to run on AC, Rechargeable 15V Ni-Cd Battery Pack No. 1YVZ2 (which requires No. 1YVZ1, available separately), or D-cell batteries for up to 200 hr. AC Adapter No. 1YVZ1, batteries, and Ni-Cd Battery Pack No. 1YVZ2, sold separately.

WIDE-RANGE PORTABLE HORNS

Half-Mile Hailer

Loudspeaker PA covers the length of a football field. Portable and weather-resistant for outdoor use. Use indoors in noisy manufacturing facilities. 50W amplifier with 3 mic inputs, line in for CD. Includes microphone. Designed to run on AC Adapter No. 1YVZ1, Rechargeable Ni-Cd Battery Pack No. 1YVZ2, or 10 D-cell alkaline batteries for up to 200 hr. (sold separately).

Radio Hailers with Transceivers

An excellent addition to mobile command centers for responding to and communicating general information and alerts in emergency situations. Hailers have a range of up to 1 mile and include amplifier, radio bracket, speaker, and 2 MURS radios. Designed to run on AC adapter No. 1YVZ1, Rechargeable Ni-Cad Battery Pack No. 1YVZ2, or for up to 200 hr. on 10 D-cell alkaline batteries (sold separately).

Horn Speakers

EDWARDS SIGNALING

GA GRAINGER APPROVED

speco technologies

Designed for telephone and microphone paging in loud environments, both indoors and out. Mounting brackets and hardware included.

Explosionproof Audible Signal—Multitone horn has a 55-tone capability. Has internal volume control.

Hazardous Location Multitone Horn—Multitone horn has a 55-tone capability. For use in dusty and hazardous areas where a distinctive alert is required. For Division 2 locations.

8 ohms—No. 36H458 is an amplified weatherproof P.A. speaker; designed for applications that can benefit by not having a dedicated amplifier.

Additional Transformers—Work with most brands of horn speakers. Flange mount.

Amplifiers and Tuner

speco technologies

AMPLIVOX PORTABLE SOUND SYSTEMS

PA Amplifiers—Provide power to paging and music address systems. On-hold feature assures customers hear supplied music or dialogue. Feature 600-ohm telephone connection, auto-mute background music during paging, and separate bass and treble controls.

Multimedia Stereo Amplifier—Features 16-channel UHF wireless frequencies. Condenser, dynamic, and wireless mics can be used simultaneously. Tape record or provide a mixed output to the room's built-in sound system that you control. Auxiliary input jack lets you make your own computer or video projector programs heard by connecting them to the stereo line input with separate volume and tone control or add prerecorded music.

Digital AM/FM Tuner—Works with most amplifiers to play radio broadcasts. Includes AM/FM antenna.

TENSABARRIER®

Portable Post Crowd Control Barriers

These Post Barriers help guide customers and pedestrians, informing of entrances and exits to use. Barriers feature SlowRetract™ technology that ensures slow, safe belt retraction and locking belt ends to prevent accidental release. Extend belt when a barrier is needed; retract when not in use. Belt material is heavy-duty woven polyester. Belts are 2"W x 7½"L, except Wide Webbing Belt No. D0025 is 6"W.

Retracta-Belt® Crowd Control Barriers

Visiontron Corp.

Guide traffic, mark off hazards and restrict access indoors and outdoors with stanchions.

Retracta-Belt® are designed to withstand heavy traffic areas. Universal belt-end works with most stanchions and locks to help prevent accidental release. Feature a strong and slow EZ Back brake for added safety and have a built-in rubber floor protectors, ensuring scuff protection.

Retracta-Belt PRIME® are economically priced to accommodate lower budgets, medium traffic or less abusive environments. These Barrier Posts feature EVERstraight Technology®: an innovative, self-straightening base connection that helps keep the post upright and in place.

Crowd Control Barriers

Mr. Chain

Supplier Diversity

Use plastic chains, stanchions, ground posts and other accessories to create an effective crowd control/warning barrier based on your specific needs. Ideal for indoor or outdoor use.

PLASTIC CHAIN

Use with stanchions and ground posts for crowd and traffic control. Lightweight chain is strong and durable; UV protectant added to help resist fading.

STACHIONS AND GROUND POST

Medium- and Heavy-Duty Stanchions—Highly visible stanchions provide guidance and safety when controlling crowds and directing traffic.

Stachions and Ground Post

Ground Posts—Maintenance-free posts are used to outline paths and driveways.

ACCESSORIES

Sign Adapters—Use to attach a sign to a stanchion. Replace ball top with sign adapter. Accommodate signs up to 1/16" thick.

S-Hooks—Enable a user to attach a plastic chain in a variety of applications. Each size S-hook corresponds to the matching chain.

Magnet Ring/Carabiner—Easy Lock Out Tag Out (LOTO) option for use in manufacturing facilities, distribution centers, and retail stores.

Metal Detectors

GARRETT METAL DETECTORS · FISHER RESEARCH LABS · BARSKA

HANDHELD

Nos. 10A457, 1ZRZ7, and 1ZRZ8 provide the ultimate sensitive response to metal objects. They are self-calibrating, easy and convenient to use, and offer increased durability. No. 20KZ01 provides precision locating for all types of metal to safeguard security areas. No tuning required. Features an optimum sensitivity level and allows you to choose between an audio alarm or silent vibrating. Can be used alone or in conjunction with No. 20KZ03. No. 20KZ02 is a high-performance detector for all types of metal. Choose between 3 frequencies for less chance of interference. Designed with "momentary low" switch to eliminate interference from steel rebar built into many concrete floors.

WALK-THROUGH METAL DETECTORS

Nos. 5ENY7, 53DU72, and 53DU73 detect 33 pinpoint zones to precisely identify multiple target locations across the entire body. Feature dual detection transmitters and receivers in each panel, over 20 standard program settings for optimal performance, and superior versatility with selectable settings designed for airports, courthouses, prisons, schools, facilities, special events, mass transit, loss prevention and many other applications. No. 20KZ03 transports to virtually any location and can be up and running within 5 min. Multizone detector features 100 sensitivity settings and requires only 1 operator. 40-hr. battery life. AC (110V or 220V) or DC power.

GROUND SEARCH METAL DETECTORS

No. 1ZTA2 features graphic target ID cursor, Accept/Reject notch for specific target detection and to ignore unwanted items. Designed with electronic pinpoint for easy target recovery. Also features continuous target depth indicator. 8 level sensitivity adjustment. No. 5ENY6 features increased durability and sensitivity, 360° side scan detection area, a wide range of operating temperatures, and includes woven belt holster. Also features proportional audible alarms and pinpoints targets faster.

VEXOR

Pepper Sprays

Self-defense spray is made of natural oleo-resin capsaicinoids. Contain the highest grade capsaicin. This formula allows for a low operating temperature range without the addition of other chemicals.

Network IP Cameras

Use for installations where a wide area or multiple areas need monitoring, or a large number of cameras are required. Cameras don't require multiple cables for hook up, can use existing network infrastructure, and allow centralization of security for data storage. Ideal where video needs to be viewable by multiple users in multiple locations. Allow mobile access via iPhone® and Android™ devices. Megapixel IP cameras provide more detail than traditional analog models. Feature higher resolution to improve camera zoom on live view and playback. Can transmit large data files and allow bandwidth throttling where the camera uses the bandwidth needed to transmit data, then throttles back to a lower preset bandwidth when there is no event to record.

Network Video Recorders (NVRs)

NVR is a software program that records video in a digital format to a USB flash drive, SD memory card, or other mass storage device. NVRs are similar to DVRs, but NVRs take video input over a network, as opposed to directly connecting to the NVR via a capture card or tuner. The video is streamed to the NVR for storage or remote viewing. An NVR contains no dedicated video capture hardware. Before installing an NVR, determine if the NVR software will run on a workstation or if a server required.

Digital Video Recorders (DVR)

speco technologies BOSCH

DVRs allow you to record CIF resolution videos at speeds for high-quality imagery and save storage space with 11.264 compression technology. In addition, they allow you to record audio from up to 4 channels and they support Digital Deterrent that triggers an audio message via motion detection or sensors. Up to 8 audio files are supported. LTS units include mouse, central management software, and power supply. They are designed with continuous motion recording mode. View locally or via the web including smart devices. Interlogix DVR includes power cord and Truvision navigator software. View with full screen, multiscreen, or sequential switching with preview, playback, local display, remote viewer, or mobile viewer.

Interactive Touchscreen Displays

- 50,000 hr. panel lifespan

Each interactive touchscreen display incorporates features that make them the ideal solution for collaborative sharing in places such as meeting rooms, conference rooms, or as a powerful learning tool in the classroom environment. These interactive displays surpass traditional interactive whiteboards that use projectors. Feature full HD 1080p resolution for crisp, bright display surfaces. A simple USB connection from the display to your computer enables the touchscreen function. Made with protective tempered glass, these models are designed with surface light wave technology. Support Windows 7 and 8, Mac OS, and Linux operating systems.

Edwards Signaling ★ GA GRAINGER APPROVED NAPCO

Fire Alarm Power Boosters and Accessories

Power booster panels have a self-contained 24VDC power supply to augment fire alarm panel power requirements, and 4 independent Notificiation Appliance Circuits.

ACCESSORIES

Digital Communicator—Acts as a modem to allow communication via a phone line from the control panel to a third-party monitoring service. LCD.

Remote Relay Module—Equipped with 5 form C relays rated at 1A, 30VDC each. May be programmed as zone relays or common system relays for alarm, trouble, supervisory, power, and monitor.

Remote System and Zone Indicators—Mount separately in a single-gang outlet box and display system or zone status in a location remote from the main panel. Remote System and Remote Zone Indicators can be mounted together using the multigang faceplates (sold separately).

Reverse Polarity Module—Interfaces with a reverse polarity receiver to provide communication to an off-site monitoring system.

City Tie Module—Allows the fire alarm control panel to communicate with the fire station.

Edwards Signaling NAPCO

Fire Alarm Initiating Devices

When activated, devices send signals on a hard-wired connection to initiate an alarm.

PULL STATIONS

Dual-action pull stations prevent accidental alarm activation. Replaceable glass indicates when a station has been activated.

Weatherproof—NEMA 4X rated.

HEAT DETECTORS

- Contact rating: 3A at 125VAC, 1A at 28VDC, 0.3A at 125VDC, 0.1A at 250VDC
- 2500 sq. ft. coverage

Rate of rise: Temperature increase at the sensor of 15°F (9°C) or more per minute activates the rate-of-rise feature; self-restoring.

Fixed temperature: If temperature of the center disk rises to the sensor's rated temperature, the fixed temperature element activates. Nonrestorable and nonreusable. Once activated, the detector must be replaced.

Weatherproof—For indoor or outdoor use.

Explosionproof—For installation in hazardous locations; indoor use only. Rated for Div. 1 and 2.

SMOKE DETECTORS

- Operating voltage: 8.5VDC to 33VDC

LEDs on units give visual indication of alarm activation. Include test switch.

Photoelectric—Units detect dark or thick smoke. Respond quickly to slow smoldering, high-smoke fires.

Smoke Detectors, Air Sampling—Central detection units draw air from a protected area and monitor the stream for the presence of smoke and other products of combustion. Ideal for mission critical settings and hostile environments.

AIR DUCT SMOKE DETECTORS

- Operating voltage: 24VAC/VDC or 120/240VAC

Activate when combustion particles exceed 2.3% per ft. in air moving at 100 fpm to 4000 fpm. Match the air duct size to the appropriate air sampling tube. Remote Test/Reset Station No. 1EYC1 (sold separately) easily monitors difficult-to-access duct smoke detectors.

REX PLUS® Electronic Watchdog

Audible Entry and Exit Alarms

Safety Technology International

ALARMS

Exit Stopper®—In Exit Alarm mode, alarm can be set to sound for 30 sec., 3 min., or indefinitely. In Annunciator mode, detector announces door entry. Select 15-sec. entry delay or immediate alarm. Warning horn can be set to 95 or 105dB.

Wireless Alarm Kit—REX PLUS® Electronic Watchdog detects movement in a selected indoor location. Features 4 selectable sounds: continuous rain forest, barking sound of an attack dog, rain forest sound to announce visitors, barking dog for 15 to 20 sec. then a continuous siren. Detects movement through walls, doors, and glass. Variable sensitivity (up to 30 ft.) plus a volume control. 110VAC.

ACCESSORIES

8-Channel Receiver No. 16D856 helps monitor up to 4 devices. Features a distinct beep and tone for each of the 4 devices. Latching memory LED (flashes until reset). Use with No.16D849 Add-on Wireless Exit Stopper®. No. 16D849 emits an ear piercing alarm when exit door is opened. Alarm announces door entry with a set of 10 beeps. Detects both unauthorized exits and entries.

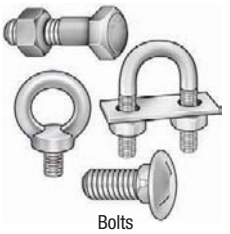
Magnetic Contacts

▪ Vertical or horizontal mount; hardware included



GRAINGER APPROVED

Low-current magnetic contacts send a signal to an alarm or a supervised monitoring system when the door magnet moves away from the frame magnet. A gap between the contacts compensates for ill-fitting doors and windows opened for ventilation. Aluminum switches are sealed airtight to resist corrosion. No. 2EXV4 mounts directly to the track or channel of an overhead door.

Hex Head Cap Screw Information

Hex head cap screws feature a thick, hexagonal head with a washer face under the head to provide an ample bearing surface for tightening with a wrench. They are general purpose threaded fasteners designed for insertion in pretapped holes or for use with nuts.

12-Pt. with Flange
Features a 12-pt. external head design that allows higher torques without rounding the head during tightening. Flange acts like a washer.

Self-Sealing Hex
Features a vibration-resistant silicone O-ring under the head to seal out air, water, lubricants, and liquid and gas contaminants.

Serrated Flange Hex
Has serrations under the flange that bite securely into materials to prevent loosening. Flange acts like a washer.

Grade 5 Steel Hex Head Cap Screws

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Grade 5 is comparable to metric Property Class 8.8. Meet ASME B18.2.1 standards.

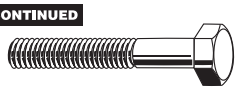
Grade 8 Steel Hex Head Cap Screws



Grade 8 is comparable to metric Class 10.9. Meet ASME B18.2.1 standards.

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Grade 9 Steel Hex Head Cap Screws

- Zinc Yellow CR+3 finish

Meet L9 standards.

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Flanged Alloy Steel 12-Point Head Cap Screws

Screws exceed the strength of SAE Grade 8 cap screws, including greater resistance to breakage and higher shear strength. 12-pt. external head design allows higher torques without rounding head. Meet ASTM A574 standard.

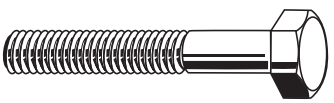
Grade B7 Steel Hex Head Cap Screws

- Plain finish

Meet ASTM A193/ASME B18.2.1 standards.



Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

316 Stainless Steel Hex Head Cap Screws

† Left-hand threaded.

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 150mm are available at Grainger.com®; search for "hex head cap screws."

Metric Class 8.8 Steel Hex Head Cap Screws

Comparable to SAE Grade 5 fasteners.

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 150mm are available at Grainger.com®; search for "hex head cap screws."

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 150mm are available at Grainger.com®; search for "hex head cap screws."

Metric Stainless Steel Hex Head Cap Screws

Fully threaded screws meet DIN 933; partially threaded meet DIN 931 standard.

Length	Thread Style	Pkg. Qty.	A2 Stainless Steel Item No.	A4 Stainless Steel Item No.

APM HEXSEAL®

18-8 Stainless Steel Self-Sealing Hex Head Cap Screws

Reusable silicone O-ring. RoHS compliant.

Length	Item No.	Pkg. Qty.
¼"-20 Thread Size		
½"	**5NA28**	5
¾"	**5NA36**	5
1"	**5NA38**	5
5/16"-18 Thread Size		
¾"	**5NA48**	5
1"	**5NA50**	5

Length	Item No.	Pkg. Qty.
⅜"-16 Thread Size		
¾"	**5NA62**	5
1"	**5NA64**	5
½"-13 Thread Size		
1"	**5NA76**	5

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 150mm are available at Grainger.com®; search for "hex head cap screws."

Grade A Low-Carbon Steel Hex Bolts

- Tensile strength: 60,000 psi

Use with Grade A/Grade 2 nuts. Comparable to metric Property Class 4.6. Threads are right-hand, Class 2A. Meet ASTM A307 and ASME B18.2.1 standards, , except Nos. 2BA81, 2BA83, and 2BA85 are ASTM A307 only.

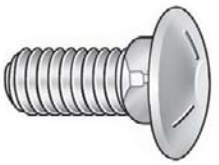
Heavy Hex Head Steel Structural Bolts

Controlled thread length allows the thread to stop before the joint ply interface to improve the fastener's direct shear performance. UNC thread type. Right-hand thread direction. Meet ASTM F3125.



Note: Additional sizes and bulk packs are available on Grainger.com®; search for "heavy hex head structural bolts."

Steel Carriage Bolts

Square neck cuts into wood to prevent turning while the nut is tightened.

Note: Additional sizes and bulk packs are available on Grainger.com®; search for "carriage bolts."

18-8 Stainless Steel Carriage Bolts

- Tensile strength: 85,000 to 140,000 psi
- Plain finish

Compatible with ACQ treated wood. Meet ASME B18.5 standard.

S-Hooks

Closed Eye—Secure attachment at 1 end to strap, wire rope assembly, or rope. To be used for pulling, hoisting, winching, or other rigging applications.
- 316 stainless steel

Open Eye—For use with light ceiling fixtures and canvas tie-downs. Do not use for lifting.
- Zinc-plated carbon steel

Elevator Bolts

- Tensile strength: 60,000 psi

Flat, smooth, countersunk head allows minimal extrusion from the wall; square neck provides a locking feature. For use where there is little space between elevator and wall. Made of zinc-plated low-carbon steel. Meet ASME B18.5 standards.

Machinery Eyebolts

With Shoulder

Without Shoulder

Drop-forged carbon steel is heat-treated after forging. Angular lifts will significantly lower working load limits and should be avoided. Loads are based on a safety factor of 5 to 1.

Metric Lifting Eyebolts

For vertical lifting only.

Note: Eyebolts must always be tightened flush against bearing surface.

KEN FORGING Forged Industrial Hardware | FABORY

Drop-Forged Eyebolts

Loads are based on a safety factor of 5-to-1. Heat-treated, forged carbon steel eyebolts have hot galvanized finish.

Note: Stainless steel also available; on Grainger.com®, search for "stainless steel drop-forged eyebolts".

Nut Information

NUT TYPES

Acorn
Blind tapped hex nuts with an acorn-shaped, peaked cap keep the end of the bolt or other threaded fastener from protruding to protect the threads. See page 2084.

Cap
Snap into place by hand and lock into the stud securely. See page 2085.

Captive
Also known as insert nuts, captive nuts help provide load-bearing threads in soft or thin materials. See grainger.com/fasteners.

Coupling
Elongated nuts are tapped from each side so threads meet in the middle, rather than entirely through in the same direction. See page 2084

Deformed
Feature irregular internal threads that lock onto the matting threads of a bolt or rod and prevent rotation or loosening. See page 2083.

Hex
General purpose hexagonal nuts for use with nonlocking applications on male threaded parts. See page 2079.

Jam
Used as a second nut; force against the main nut to bind threads and prevent loosening. Prevent 1 nut from moving in the direction of the other without turning both nuts. See page 2080.

Locknuts
Lock onto threaded bolts or rods to prevent rotation or loosening. Minimal reusability. See page 2083.

Push
Hold fasteners in-place before final assembly process occurs. Styles available for studs and bolts. See page 2085.

Spring
Reusable nuts provide the correct amount of spring tension without damaging surfaces, eliminating the need for lockwashers and spanners. See page 2085.

Thumb
Knurled tops allow easy hand tightening, even when wet or greasy or in tight locations. See grainger.com/fasteners.

T-Nuts
Nuts with prongs on 1 side that lock into wood. Often used for fastening metal to wood. See page 2085.

U-Nuts
Multithreaded, tapped barrel nuts for high-torque tightening. Clip over the edge of the panel and snap into place to replace weld or stake nuts. See page 2085.

Weld
Tab base nuts are used when working in confined spaces or when welding to thinner metals. See page 2086.

Wing
1-pc., round, threaded nuts have wing lugs for easy manual assembly. Especially suited to applications where frequent removal, replacement, or adjustment is required. See page 2084.

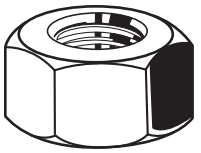
Metric Wind Power Hex Nuts and Locknuts

- Class 10 carbon steel

Used to build and maintain wind towers and turbines.



ARMOR COAT™ FASTENERS

Armor Coat® Hex Nuts—Grade 8

Armor coating provides exceptional rust and corrosion-resistance, with the strength of Grade 8 steel. Excellent for harsh environments. Meet ASME/ANSI B18.2.2 1987 (R1999) and SAE J995 standards. 1000-hr. salt spray tested.

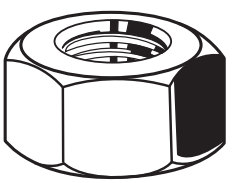
Heavy Hex Nuts

Extra-wide, extra-thick nuts have increased bearing surface and thread engagement for improved hold.



Brass—Meet ASME/ANSI B18.2.2 standards.

Grade 2 Steel—Meet or exceed ASME/ANSI B18.2.2, ASTM A563, and SAE J995 standards.

Grade 2H Steel—For use with structural bolts. Meet ASTM A194 standard.

Grade C Plain Steel & Galvanized Steel—Additional thickness increases bearing surface and engagement of right-hand threads. Meet ASTM A563 standard.

Hex Locknuts and Safety Wheel Nuts

- Carbon steel

Interlocking cams form a vibration- and shock-proof, free-spinning 1-pc. locking nut assembly that holds tight under forces that cause other locknuts to come loose. Can be used with Grade 5 (Class 8.8), Grade 8 (Class 10.9), and stronger bolts.

J-Style

U-Style

Rectangular

Cage Style

Spring Nuts

Steel construction with Black Phosphate finish, except where noted.

J-Style and U-Style— Reduce assembly time by eliminating welding and riveting.

Rectangular—For use with threaded screws and studs.

Cage Style—Nuts are well suited to blind-sided applications. Zinc finish.

Nut Retainers

U-Type—Commonly used in sheet metal applications. Particularly good for blind assembly applications.

G-Type—Cage fully encloses the nut and shields against protruding screw ends.

U-Nuts—For high-torque tightening in heavy-duty applications.

Locking Hole Plug

Locking Knockout Plug

Nylon Locking Hole and Knockout Plugs

- Temp. range: -40° to 250°F

Plugs close excess chassis holes, wiring outlets, and production access holes. Multiple locks snap into panels from 1/64" to 1/8" thick. Heat-stabilized nylon (UL94V2) construction is suitable for critical or elevated temperature applications.

Washer Information

WASHER TYPES

Beveled
Top-bearing surface is cut at an oblique angle to compensate for nonparallel surfaces in structural leveling and shimming applications. Can be round or square. See page 2093.

Conical or Spring
Slight dish shape and edges sheared parallel to the center line increase elasticity of joint for absorbing shock and maintaining tension under dynamic loads.

Countersunk
Allows flat or oval head countersunk screws to be flush with surface for finished appearance. See page 2096.

Disc-Lock™
2-pc. washer has interlocking cams and nonslip ridges that work together under vibration to prevent loosening and lock the assembly, maintaining joint integrity.

Fender
Large outside diameter provides extra-wide bearing surface for distributing force/stress; covers oversize holes. See page 2092.

Flat
The most common washer, with 2 flat surfaces for distributing force/stress of a nut or bolt and reducing friction and heat during installation of a threaded fastener. Can be round or square. See pages 2088, 2089.

SAE Flat—Very similar to the USS, except it has a smaller outside diameter and has a tighter fit to the bolt. Used in the automotive industry. See grainger.com/fasteners.

USS Flat—Most commonly used washer has a large outside diameter that helps distribute forces applied when tightening. See grainger.com/fasteners.

Friction
Rougher washer surfaces have embedded material to provide additional friction and help prevent loosening, even in high-vibration applications. See grainger.com/fasteners.

Nord-Lock®
2-pc. system serration and cams creates wedge locking action that prevents bolts from unintentional loosening. Bolt rotation is blocked due to tension between the pair of washers, regardless of high vibration or dynamic loads. See page 2093.

Ogee
Oversize, curved bearing surface keeps bolt heads and nuts from pulling into wood. The load-distributing ogee curve can serve as a force spreader in structural use. See grainger.com/fasteners.

Raised
Has a large bearing surface and raised reinforcements for structural use with wood fasteners. See page 2096.

Retaining
Feature a specially configured inner diameter that slides on the screw easily, but then grips the outside of the screw shank for retention. Ideal for preassembly and kitting. See grainger.com/fasteners.

Self-Sealing
Bonded silicone rubber to a stainless-steel compressible washer. High-pressure sealing, internally and externally.

Shoulder
Barrel protrudes from center hole of flat-bottomed washer to isolate or insulate a screw, shaft, or rivet. See grainger.com/fasteners.

Slotted
A slot the same width as the hole diameter is cut from the center to the perimeter. Slips on and off shaft without removing fastener. See grainger.com/fasteners.

Spherical
2-piece equalizing assembly with 1 flat washer and 1 dish-shaped washer. Eliminates unequal thread loads and stress from nonparallel surfaces. See grainger.com/fasteners.

Split Lock
Split with 1 end bent slightly outward to bite in and prevent loosening. Acts like a spring under compression to provide extra holding force and decrease frictional resistance during assembly and disassembly. See page 2094.

Tooth Lock
Also referred to as star washers. Directional teeth or serrated edges bite into fastener head/workpiece to prevent loosening. See page 2094.

Wave
Wavy shape provides compensating spring force, increases load-bearing capacity, absorbs shock and vibrations, and resists loosening and fatigue. See grainger.com/fasteners.

GRAINGER APPROVED

1-800-GRAINGER (472-4643)

Nonmetallic Flat Washers

Buna-N—Create a reliable seal against air, water, oils, and fuels.

Cork Rubber—Create a reliable seal against oils and fuels.

EPDM—Resistant to weather, sunlight, ozone, abrasion, and water.

Neoprene—Resists fuels, sunlight, ozone, and oxidation.

Nylon—Strong, abrasion-resistant material offers low friction coefficient, electrical insulation, and noise dampening. Natural finish.

- Bulk nylon washers are available on Grainger.com®

Phenolic—Tough, lightweight material resists distortion under pressure. Ideal insulation for electronic assembly requiring moisture resistance.

Polyurethane—Recommended for high-impact operations or intense load bearing applications. Resists ozone, oxygen, oil, and grease; also long-term resistant to water in temperatures up to 120°F.

PTFE—Offer high temperature and chemical resistance, low coefficient of friction, and excellent electrical properties. For cushioning and sealing applications.

Santoprene—Fatigue-resistant, low-compression set rubber is for use in automotive, consumer, and appliance applications.

SBR with Inserted Cloth—2-ply nylon cloth-reinforced for excellent abrasion resistance. Ideal for cold weather, hot water, and low-pressure steam applications.

Silicone—Semiorganic synthetic looks and feels like organic rubber. Offer excellent fatigue and flexibility. Resistant to a wide range of temperatures.

Viton—This specified fluoroelastomer is known for its excellent heat-resistance.

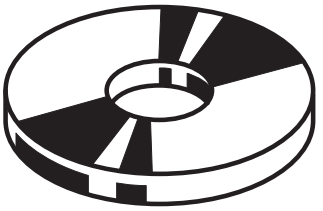
Armor Coat® Flat Washers



- Tensile strength: 150,000 psi

Coated to protect against harsh environments; provides 250% greater strength than stainless steel. Rust-resistant. Meet ASME B18.22.1 standard.

Fits Bolt Sizes	Outside Dia.	Item No.	Pkg. Qty.

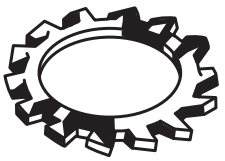
NORD-LOCK®
Bolt securing systems

Nord-Lock® Bolt Securing Systems

Provides safe locking for bolted joints, even when exposed to severe vibration and dynamic loads. Features wedge-locking action; bolt is locked with the tension created between the 2 washers. Rotation of bolt/nut is blocked by wedge effect of cams. Meets DIN 25201 standards.



Fits Bolt Sizes	Inside Dia.	Outside Dia.	Thickness	Item No.	Pkg. Qty.

Split Lock Washers

Light-Duty—Thin helical spring lock washers have a slight reduction in outside dimension.

Heavy-Duty—Load-bearing washers increase elastic properties of the joint to compensate for material expansion and contraction maintain tension under dynamic loads.

Extra-Duty—Washers have increased outside dia., thickness, and bearing area to absorb exceptionally high torques and retain tension under heavy loads.

Structural Washers

Square Beveled

Flat—Primarily used for structural bolting. Commonly used with higher strength fasteners. Meet ASTM F436 standard.

Square Beveled—Washers are primarily used for structural leveling and shimming applications. Hardened steel is commonly used in A325 and A490 structural bolting applications.

- Metric meet DIN 435 standard
- Malleable iron meets ASTM A47 standard

Raised—Large bearing surface provides added strength. Meet ASTM A47 standard.

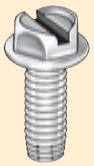
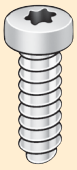
Screw Information



Machine

General purpose screws are typically used in noncritical applications. Machine screws are most commonly used to fasten metal to metal, and are designed to be inserted into a prethreaded hole or mated with a nut (in which case they may be called stove bolts). See page 2098.

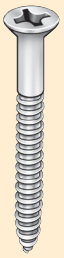
Sheet Metal



Designed for quick entry into sheet metal, plastics, wood, fiberglass, aluminum, plywood, and hard rubber. They tap their own internal mating thread when inserted into a predrilled or prepunched pilot hole; the resulting fit has close to zero clearance for a strong hold. See page 2105.

Thread-Cutting

Self-tapping screws cut away and remove the surrounding material instead of displacing it. Create a zero-clearance fit that resists vibration and prevents loosening. See page 2102.



- Used in harder, less pliable materials
- Not recommended for applications requiring frequent assembly and disassembly

Thread-Cutting

Self-tapping screws displace the surrounding material instead of removing it. They typically have higher drive and strip torque values than thread-cutting screws. Not recommended for materials that crack under sustained loads. See page 2105.

- Used in softer materials that can deform
- For applications requiring frequent assembly and disassembly

Wood

Form their own internal mating thread in wood or other resilient materials. They create a tight joint, but the screws can be removed easily without damage. See page 2108.

Note: Predrilling is recommended, especially when used in hardwoods.

Round Head Machine Screws

Phillips Drive

Combination Drive

High-profile domed head gives a decorative appearance. Meet ASME B18.6.3 standard.

Note: Additional sizes, materials, and slotted drive are available on Grainger.com®.

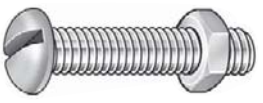
Pan-Head, Phillips Drive

Thread-Cutting Screws



Tapping screws create a zero-clearance, tight fit in hard materials such as plastic, heavy-gauge sheet metal, aluminum, cast iron, brass, zinc, and lead die castings. Meet ANSI/ASME B18.6 standard.

Note: Additional sizes, materials, and slotted drive are available on Grainger.com®.

Hex Washer

w/Neoprene Washer

ITW Buildex FABORY

Self-Drilling Hex Washer Sheet Metal Screws

- Package quantities are exact

1-pc., 1-side-installation fasteners have a drilling point tip that drills its own hole and forms its own internal mating threads.

Climaseal® corrosion-resistant finish provides excellent resistance to most forms of abrasion and torque.

Electro Zinc corrosion-resistant finish is applied to No. 36K129.

Gray Spex corrosion-resistant finish on No. 36K145 is an organic waterborne coating, applied with a state-of-the-art process that eliminates Phillips recess fill problems.

Flat Head, Square Drive

Deck Screws

Coarse thread and Type 17 point make it easier to assemble wood and vinyl decks, or any outdoor wood-to-wood project. Countersunk flat head produces a flat surface area. Number 2 drive size provides superior driving with 4 points of contact.

82° Flat Head

Drywall Screws

Attach drywall or wallboard to metal or wood studs and joists without the need for predrilling. Thread-cutting screws feature a thin shank, deep threads, and a very sharp point. With a #2 Phillips driver, the countersunk bugle head won't tear the surface paper of the drywall. Made of steel with black phosphate finish.

Socket Head Cap Screw Information

Standard
Features a relatively high cylindrical head with a recessed hexagonal socket. Use where maximum tensile strength is essential. See page 2113, 2114, 2115.

Button
Dome-shaped head has wider hex socket and lower profile than standard. Ideal for lighter applications with low limited clearance where loading capacity is not critical. See page 2121.

Flange
Projecting collar around bottom of head acts like a washer, dispersing the load on the bearing surface. Use when a wider bearing surface or a more-finished appearance is desired, and with thinner materials. Go to Grainger.com® and search for "Flange Socket Head Cap Screws."

Flat
Features an 82° countersunk flat head. Flush mounts so moving parts can pass over freely. Not ideal for applications that require optimal antifatigue properties. See page 2119.

Low
Head height is 50% lower than standard size; socket size is smaller. Used in thinner materials and where clearance is too limited to use a full-height cap screw. Cannot withstand the same preloads and standard socket-head cap screws. See page 2121.

Vented
A small hole drilled through the entire length of the cap screw allows gas and fluids to vent. See page 2115.

GRAINGER APPROVED | ITW Bee Leitzke | Kerr Lakeside Inc.

Socket-Head Cap Screws

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Socket-Head Cap Screws

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 6" are available at Grainger.com®; search for "hex head cap screws."

Min. thread length is calculated using the screw's length. The formula is dia. x 2 + 1/4". For example, 1/4-20 x 4: 1/4 x 2 = 1/2". 1/2" + 1/4" = 3/4". This item would have at least 3/4" thread. Longer than 150mm are available at Grainger.com®; search for "hex head cap screws."

Shoulder Screw Information

Also called stripper bolts or shoulder bolts, shoulder screws are used frequently in pulleys and linkages. They also function as precision spacers or guide screws.

SHOULDER SCREW TYPES

Both types of shoulder screws are reusable and come in ISO metric and USS measurements.

Precision (Smooth Head)

Manufactured with more-exacting tolerances. Hex socket drive allows high-torque wrenching. Slotted drive permits deeper access in hard-to-reach places where a hex key can't reach. Phillips drive provides excellent torque control.

Standard (Knurled Head)

Dimensions meet ASME standards for inch sizes and ISO standards for metric sizes. Shoulder dia. tolerances: -0.002" to -0.004". Suitable for use in machinery and other critical mechanical applications. Screws feature a hex socket drive.

SPECIAL VARIATIONS

Hex Head

Allows easy tightening with an adjustable wrench.

Self-Locking

A nylon patch on screw threads bonds with the material being fastened to hold the screw firmly in place and prevent loosening from vibration. Not reusable.

SHOULDER SCREW DIMENSIONS

Standard

FABORY GA GRAINGER APPROVED CAMCAR

Alloy Steel Shoulder Screws

- Hex socket drive
- Thread class: 3A standard, 5g6g metric
- Tensile strength: 140,000 psi standard, 159,500 psi metric
- Shear strength (metric): 95,700 psi
- Shoulder length tolerance: ±0.005" standard, +0.25mm metric

Knurled head. Metric sizes meet ISO 7379.

Notes: Additional dimensional information, self-locking screws with nylon patch, and additional sizes are available on Grainger.com®; search for "shoulder screws."

Metric are 12.9 alloy steel; due to undercut between shoulder and thread, be sure to lower the tightening torque normally used for Class 12.9 screws.

Made in North America

Hex Socket Drive

Phillips Drive

Slotted Drive

18-8 Stainless Steel Precision Shoulder Screws

- Tensile strength: 90,000 psi inch, 80,000 psi metric
- Thread class: 2A
- Shoulder length tolerance: +0.002" inch, +0.050mm metric
- Shoulder dia. tolerance: +0.000/-0.001"

Closer tolerances permit use in critical applications that require greater precision. Undercut beneath the head lets screws mount flush to surface.

Note: 416 SS precision shoulder screws, additional dimensional information, and additional sizes are available on Grainger.com®. Search for "shoulder screws."

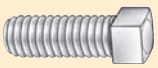
Set Screw Information

Set screws can be used to prevent relational motion of permanently located parts. They are typically used in electronics and for applications where space is a key concern.

Set screws feature these key characteristics:

- A hexagonal socket recessed in one end, or an external square or slotted head
- A point designed to bear against a mating part at the opposite end
- Threads extending the entire length of the shaft



HEAD TYPES

Hex Socket
Recessed drive makes screws ideal for flush mounting.

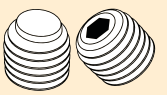
Slotted
Single slot for driving with a standard screwdriver.

Square™
Enables external wrenching of the screw. Use in environments in which grease or dirt might clog a recessed drive.

POINT TYPES

Cone
Pointed end generates highest torsional holding power in applications where parts must be permanently located. See page 2128.

Cup
Cup-shaped point features a conical depression for excellent holding power with slight penetration. See page 2126.



Flat
Minimizes shaft damage in applications where parts are frequently reset or when fastening into thin walls. See page 2130.

Knurled Cup
Provides more resistance to vibration than a plain cup point. Deep socket broach assures a good hex key fit. See pages 2128.

Oval
Rounded point reduces indentation and prevents deformation of parts in applications requiring frequent adjustment.

Half-Dog
Used for permanent setting of parts and can replace dowel pins when hole is threaded. Works well against hardened members or hollow tubing.

Socket Set Screw Assortments

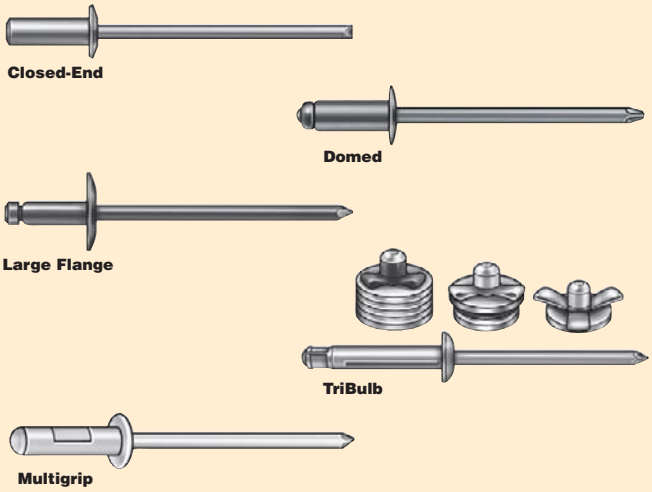
Rivet Information

RIVET TYPES

Open-End—Retains the mandrel head within the body of the rivet. A strong, cost-effective alternative to tubular rivets in industrial applications with materials that do not have high load-bearing requirements. Go to Grainger.com® and search for "open-end rivets."

Closed-End—Provides greater shear and tensile strength over open-end rivets of similar sizes and materials. Seals liquidtight, with 100% mandrel retention. Go to Grainger.com® and search for "closed-end rivets."



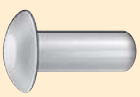
Blind—Designed for blind-side applications where only 1 side of the material is accessible. Will not mar or scratch painted or other finished materials. See pages 2131, 2132, 2133, 2134.

HEAD TYPES

Dome—Provides a low-profile finished assembly.

Large Flange—Provides greater bearing surface for fastening soft and brittle material. Also great to cover enlarged holes or slots.

TriBulb—Large blind-side footprint allows use in oversize holes. Use with both soft and brittle materials.



OTHER RIVET TYPES

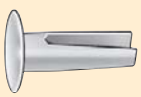
See grainger.com/fasteners for our expanded rivet selection including the following.

Push-In

Usually made of nylon, push-in rivets expand to lock material into holes. Use on soft or hard materials.

Tubular/Semitubular

Rivets can be used to fasten soft and hard materials.



Tubular rivets have a hole in the headless end. Most commonly used in self-piercing applications where a predrilled hole is not required.

Semitubular rivets are similar to tubular rivets, but require much less insertion force.

Solid

1-pc. fasteners are permanently set using a hammer or rivet press, and expand in the hole to securely lock parts together.

Split

Used to fasten soft materials together. 2 legs pierce the material and then fold over to fasten.

Blind Rivets

FABORY POP® Avdel®

Blind rivets have 2 parts: the rivet and the mandrel. The rivet fastens to the materials, and the mandrel is used to set the rivet and then is discarded.

Note: Countersunk, button, and structural domed rivets are available on Grainger.com®; search for the head type, such as "countersunk rivets."

Battery-Powered Rivet Tool

Lightweight, ergonomic tool sets rivets of all materials where compressed air is not available, indoors or out. No need for an air hose. 14.4V lithium-ion battery charges in less than 1 hr. with included charger. Attached collector bottle keeps spent mandrels until ready for disposal.

Knurled Flanged

Rivet Nuts

Once installed, nuts provide permanent, captive threads that won't loosen when vibrated, or rotate when attached to the mating material. Large-flanged head allows increased push-out strength and extends above the material to provide built-in spacer.

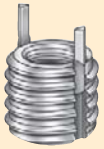
Threaded Inserts Information

Helical Wire Thread Insert
Converts threads, repairs stripped threads, or creates long-lasting threads in multiple materials



Knife Thread Insert
Provides sturdy machine threads in hardwood

Hex Drive Thread Insert
Provides sturdy machine threads in soft woods

Key Locking Thread Insert
Use to convert or repair threads with a positive mechanical lock that prevents spinning

Self-Locking Thread Insert
A locking adhesive on the external threads locks the insert in to place

Press Insert
Provides sturdy machine threads in plastic materials

HeliCoil®

Thread Repair Kits

- 304 Stainless steel

Contain inserts, high-speed screw thread insert (STI) plug tap, and installation tool.

Helical Wire Thread Inserts

HeliCoil® GA GRAINGER APPROVED

Free-running and locking internal designs are different. Nitronic® 60 stainless steel inserts are a lower-cost alternative to cobalt-bearing and high nickel alloy, with better corrosion resistance than Type 304 in most media, better chloride pitting resistance than Type 316, and nearly twice the yield strength of Types 304 and 316. Screw thread insert taps sold separately on page 2141.

Free-Running—Greater in diameter than tapped hole; compress when installed. Inserts evenly distribute load and stress.

Screw Locking—Eliminates backout of installed fastener from stress and vibration. Locking torque is retained over numerous assembly cycles.

Internal Thread Size	Length*	Free Coil Dia.	Drill Size	Insert Tap	Brand	Pkg. Qty.	INSERTS FREE RUNNING Item No.	INSERTS SCREW LOCKING Item No.

HeliCoil® RECOIL

Screw Thread Insert Taps

STI taps are oversized from standard taps to allow for the wire insert once installed. High-speed, steel intermediate (plug) lead taps cut threads to a precise dimension.

Note: Additional sizes are available; go to Grainger.com® and search for "Screw Thread Insert Taps".

2 Locking Key

4 Locking Key

Key Locking Thread Inserts

- For metal applications; not recommended for cast iron or brittle material

Repair damaged threads with a positive mechanical lock, preventing rotational spinout from vibration or torque.

Note: Units measured in inches have an internal thread class of 3B and an external thread class of 2A. Metric units have an internal thread class of 6H and an external thread class of 6G.

Stainless steel and key locking thread insert installation tools are available on Grainger.com®; search for "stainless steel key locking thread inserts" or "key locking thread installation tools".

Nut Insert

Knurled Nut Insert

Nut Inserts

Eliminate the need for tapping, welding, and brazing. Upper sleeve and base has both internal and external threads. Install in predrilled or punched holes in metal or rigid material of at least 3/32".

Note: Aluminum available; on Grainger.com®, search for "aluminum nut inserts".

Well-Nut®

Jack Nut®

STANLEY Engineered Fastening

Threaded Inserts

Jack Nut®—For use in thin, soft, or brittle materials. Can be set with manual or pneumatic tools. Steel material. Removable.

Well-Nut®—Flanged bushings have a brass machine nut molded on to 1 end. Seal against moisture and gases and help prevent galvanic corrosion. For isolating against shock-and-vibration and electrical conductivity. Rubber, chloroprene material. Removable.

Diamond-Knurled, Flush

Diamond-Knurled, Flanged

Reverse Slot

Press Inserts

- Use in plastic

Note: Stainless steel are available; on Grainger.com®, search for "stainless steel press inserts."

Diamond-Knurled—Inserts are installed cold, eliminating the need to chase threads. For blind and through holes; install with a hammer or arbor press.

Reverse Slot—Reverse slot puts head on the back side of the part for greater pull-out resistance. Simply drill or mold hole and press into place.

Flush

Flanged

Hex Drive Thread Inserts

- Die cast zinc alloy
- Use with soft woods, composition board, and MDF
- Install with a standard hex key or power driver

Flush models are for installation on curves or below surfaces. Flanged models help control the insert depth. For knock-down furniture, shipping crates, and cabinetry.

E-Z LOK

Self-Locking Thread Inserts

- Carbon steel

Adhesive on the external threads activates immediately after installation, locking the insert into place and sealing against liquids and gases to pressures of 6000 psi.

Note: Internal thread class for internal thread sizes is 2B; 6H for metric sizes. External thread class for external inch thread sizes is 2A; 6G for metric sizes.

303 stainless steel available; on Grainger.com®, search for "303 stainless steel self-locking thread inserts."

Double-End Threaded Stud w/Square Shank

Internally Threaded Stud

Double-End Threaded Stud w/Hex Shank

Threaded Rod and Threaded Stud Information

Threaded Rods—Headless, fully threaded metal bars are available in stock lengths of 1 ft. to 12 ft. Cut to length with a hacksaw or power band saw.

Threaded Studs—Headless metal rods are precut to standard lengths as short as ¼". Can be threaded on 1 or both ends, or along entire length.

Fully Threaded Studs—Threaded the entire length with conventional threads. Commonly used with a nut on either end to clamp 2 parts together.

Double-End Studs—General term for studs with an unthreaded portion in the middle and threads on both ends. Also known as stud bolts.

Threaded Rods

- Right-hand thread

Fully threaded rods can be used for hanging, mounting, bracing, supporting, and fastening in plumbing, heating, electrical, construction, and fabrication applications.

Note: Additional lengths and materials are also available; go to Grainger.com® and search for "Threaded Rods".

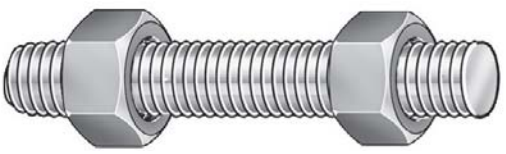
Nylon Fully Threaded Rods

- Class 2A to 2B threads
- Temp. range: -40° to 185°F
- Off-white color



Meet IFI standards.

Note: Metric and black nylon fully threaded rods are also available; on Grainger.com®, search for "black nylon fully threaded rods."

PTFE-Coated Fully Threaded Studs

- B7 alloy steel
- Tensile strength: 125,000 psi

Fluoropolymer coating prevents galling and seizing. Assembled with 2H hex nuts. Meet ASTM A193 standards.

SAMMYS® by MiTek Builder | DEWALT ENGINEERED BY Powers | SIMPSON Strong-Tie

Threaded Rod Hangers

- **Heat-treated, case-hardened steel**
- **Zinc-plated for corrosion resistance**

Hardened steel prevents snapping during installation or in high-stress environments 1-pc. design ensures a strong hold between screw and connector.

Notes: Nut drivers sold separately, this page.

Threaded rods are sold separately; see pages 2144, 2145.

SAMMYS®

UNC anchors can be used to hang threaded rod from wood, steel, concrete, and metal deck. Color-coded to make it easy to select the correct-size Sammys nut driver; sold separately, this page.

Sammy X-Press®—Anchors expand upon installation to stay in place without a retaining nut, for use where the back of the installed fastener is not accessible. Install quickly with Sammy X-Press It® Installation Tool No. 36C177, sold separately, this page.

DEWALT®

Wood and Steel hangers require no pre-drilling. Wood hangers have a Type 17 gimlet to help reduce splitting. Concrete hangers Nos. 54PD63, 54PD64, and 54PD65 are internally threaded; Nos. 54PD61 and 54PD62 have external 3/8" thread for direct attachment to anchors.

STRONG-TIE®

Install quickly with no special installation tools. Hanger anchors No. 4XFX3 is designed for hanging installations. Coupler anchors Nos. 4XFW8 and 4XFW9 are designed for concrete foundations.

ROD HANGER DRIVERS AND EXTENSION ROD

GA drivers are polished steel. Sammys® drivers are color-coded by size for quick selection on the job.

Right Angle

Weld Studs

All studs have right-hand thread direction. Steel material.

Bottom Projection—Styles offer a smooth, finished appearance on the outer surface.

Top Projection—Styles can be assembled into a prelocated hole.

Right Angle—Flat spade head style allows the installer to use various sizes of electrode tips and can be used when an offset is required.

Grooved Head and Headless Clevis Pins

Grooved

Grooved Headless

- Stainless steel pins have stainless steel E rings
- Zinc-plated steel pins have a phosphate finish Meet ASME B18.8 standards.

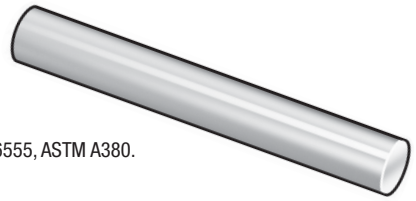
Dowel Pins



Note: A1 metric, 416 and 18-8 stainless steel dowel pins are also available; on Grainger.com®, search for "dowel pins."

Plain Alloy Steel
- Length tolerance: ±0.012"

Hardened Steel Metric—Solid cylindrical pins are chamfered on 1 end for easy insertion and feature a smooth radius on the other end for easy removal. Meet DIN 6325/ISO 8734A m6 standard.

416 Stainless Steel Metric Dowel Pins
- Length tolerance: +0.5/-0.0mm

416 Stainless Steel—Meet MS16555, ASTM A380.
- Length tolerance: ±0.010"

Carbon Steel Coiled Spring Pins

Reusable pins absorb and distribute shock-and-vibration throughout the pin cross-section. Meet ASME standard.

Note: 420 stainless steel are also available; on Grainger.com®, search for "coiled spring pins."

E-Style External Retaining Rings

Provide a large shoulder on small-diameter shafts. Snap directly into deep grooves from the side of the shaft to ensure extra thrust capacity. Inch-system rings meet ASME standard; metric-system rings meet DIN standard.

Note: Zinc-plated steel retaining rings are also available; on Grainger.com®, search for "retaining rings."

Spiral Retaining Rings

Provide 360° coverage of the retained surface. Unique circumferential metal structure provides exceptional strength, stability, and even distribution of thrust loads. Wound from pretempered flat wire to exact tolerances. Meet ANSI standards.

Note: Additional sizes are available on Grainger.com®; search for "retaining rings."

Self-Locking Retaining Rings

- Stainless Steel

Designed to push onto ungrooved shafts and bores. No groove required; frictional force is used to retain assemblies. Once installed, rings self-lock and are difficult to remove.

Note: Additional sizes are available on Grainger.com®; search for "retaining rings."

Split External Retaining Rings

Install with any standard pliers to provide 360° closure. Remove by pressing on lugs to open. Zinc-plated steel.

Poodle-Style External Retaining Rings

For large bearing surfaces. Unique, wide design offers extra retention surface against the retained part. Black phosphate-coated steel. Meet DIN specifications.
